*Price One Shilling.*

**Marriages:**—OCTOBER, NOVEMBER, DECEMBER, 1914. **Births and Deaths:**—JANUARY, FEBRUARY, MARCH, 1915.

During the quarter ended 31st March last, there were registered in the 831 Registrars' Districts in Ireland 25,773 births—a number equal to an annual birth-rate of 23·5 in every 1,000 of the estimated population\*—and 24,170 deaths, representing an annual rate of 22·1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 1,089 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·1 in every 1,000 of the estimated population, and the death-rate 19·3 per 1,000.

The birth-rate in Ireland for the quarter is 0·1 below the average rate for the corresponding quarter of the ten years, 1905–1914, but 0·6 above the rate for the first quarter of 1914. The deaths are 3,708 above those registered in the corresponding quarter of 1914; the death-rate is 3·4 above the rate for that quarter, and 2·3 above the average for the first quarter of the ten years, 1905–1914.

In comparison with those for the corresponding quarter of 1914, the returns of pauperism furnished by the Local Government Board show a decrease of 2,275 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 237 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years, 1905–1914, the number of Workhouse inmates shows a decrease of 8,143, and the number of persons on out-door relief shows a decrease of 12,582, the total under both heads being 21·8 per cent. under the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·1 per cent.

\* See page 64.

The annual rate (5·1 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1914, is 0·3 above the average rate for the corresponding quarter of the preceding ten years.

\* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (5,608) registered in Ireland during the fourth quarter of 1914 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being 0·1 above the rate for the corresponding quarter of 1913, and 0·3 above the average rate for the fourth quarter of the ten years 1904–1913. Of the total number of marriages, 3,880 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,728 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·0 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·5 above, and that under the latter heading 0·3 below the average rate for the corresponding quarter of the previous ten years.

Of the 23,717 marriages registered last year, 6,922 were registered in the first quarter, 5,570 in the second, 5,617 in the third, and 5,608 in the fourth.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1904–1914, and the average number for the ten years, 1904–1913.

## BIRTHS.

The number of births registered during the quarter ended 31st March last was 25,773—13,162 boys and 12,611 girls—being equal to an annual ratio of 1 in every 42·5, or 23·5 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1905–14, was 25,871, equivalent to an annual rate of 23·6 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 23·7 per 1,000 of the population according to the Census of 1911; Munster, 22·7; Ulster, 23·9; and Connaught, 23·1.

The highest county or county borough birth-rate\* is 32·5 for Dublin county borough, and the lowest 17·3 for Wicklow county. Of the intermediate rates the highest five are—Belfast county borough, 29·1; Mayo, 25·5; Limerick county and county borough, 23·9; Kerry, 23·8; and Longford, 23·7. The lowest are—Dublin county, 18·6; Westmeath, 19·5; Clare, 19·9; Monaghan, 20·0; and Meath and Armagh each, 20·3.

## DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 24,170—11,980 males and 12,190 females—affording an annual ratio of 1 in every 45·3, or 22·1 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1905–14, was 19·8 per 1,000.

The death-rate in Leinster was 25·3 per 1,000 of the population according to the Census of 1911; in Munster, 19·9; in Ulster, 22·4; and in Connaught, 18·5.

The county or county borough death-rates\* range from 14·4 in Kerry to 33·5 in Dublin county borough. Between these rates the lowest five are—Clare, 16·1; Mayo, 17·3; Roscommon, 18·0; Leitrim, 18·4; and Galway, 18·6; and the highest five are—Waterford county and county borough, 24·2; Wexford, 23·9; Monaghan, 23·5; Antrim, 23·3; and Tyrone, 23·2.

\* See note (\*) on page 2.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1905–1914, and the average number for that period; also the number registered during the first quarter of the year 1915:—

1915, .. ..	23·5	—	—	—	—	22·1	—	—	—	—

AGES.—Of the 24,170 deaths registered last quarter, 2,829, or 11·7 per cent., were of infants under one year of age; and 10,855, or 44·9 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 109·8 per 1,000 of the births registered. In the province of Leinster the number of deaths of infants under one year old equalled 12·4 per cent. of the total deaths registered therein; in Munster, 10·6 per cent.; in Ulster, 12·6 per cent.; and in Connaught, 9·0 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 41·4 per cent.; in Munster, to 46·1 per cent.; in Ulster, to 43·8 per cent.; and in Connaught, to 55·2 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases\* is 954, and is equivalent to an annual rate of 0·87 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the March quarter of 1915, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1910–1914.

Name of Disease.	Number of Deaths in March quarter, 1915.	Average number of Deaths in March quarter of the 5 years, 1910–1914.
Enteric Fever, .. ..	60	71
Typhus, .. ..	17	13
Small-pox, .. ..	—	—
Measles, .. ..	174	176
Scarlet Fever, .. ..	104	76
Whooping-cough, .. ..	271	278
Diphtheria, .. ..	93	97

\* See note (†) on page 9.

**ENTERIC FEVER.**—Deaths from enteric fever, numbering 57, 75 and 80 in the three preceding quarters, amounted to 60 last quarter, which number was 11 under the average for the first quarter of the five years, 1910–1914. There were 6 deaths in Limerick union, or superintendent registrar's district, 5 each in Dublin South and Omagh, and 3 deaths each in Dublin North, Listowel and Tullamore.

**TYPHUS.**—Deaths from this disease, numbering 17, are in excess of those registered in the three preceding quarters, namely, 12, 5 and 12, respectively, and also above the average (13) for the first quarter of the five years, 1910–14. Four deaths (all belonging to the urban district) were registered in the union of Londonderry, 3 in Dublin North, 3 in Galway, and one death each in Ballina, Belmullet, Castlebar, Fermoy, Kilkenny, Mount Bellew and Waterford unions.

**SMALL-POX.**—No death from this cause was registered.

**MEASLES.**—Of 174 deaths from measles, representing an annual rate of 0·16 per 1,000 of the population, 77 occurred in the union of Belfast, 13 in Lurgan, 8 in Cork, and 7 each in Castlebar and Coleraine. In the second quarter of the year 1914, the deaths from this cause numbered 452, in the third quarter they fell to 167, and in the fourth to 159. The average number of deaths in the first quarter of the past five years was 176, being 2 above the number recorded last quarter.

**SCARLET FEVER.**—To this cause 104 were ascribed; this number is 28 above the average for the corresponding quarter of the preceding five years, but 34 under the number registered during the first quarter of 1914, the deaths in the remaining three quarters of that year numbering 93, 75 and 166, respectively. In the following unions 5 or more deaths were registered:—Waterford (17), Lisburn (15, of which 10 appertained to Belfast county borough), Belfast (9), Cork (8), Newtownards (6), Dublin South (6), Dublin North (5), and Mallow (5).

**WHOOPING-COUGH.**—The number of deaths from whooping-cough registered during the quarter was 271, being equivalent to an annual rate of 0·25 per 1,000 of the population. Such deaths, although considerably in excess of those registered in the three preceding quarters, namely, 187, 163 and 139, respectively, are 7 under the average (278) for the first quarter of the preceding 5 years, the numbers for these quarters varying from 438 in the first quarter of the year 1910 to 173 for the corresponding period of 1913. Of the 271 deaths, 84 occurred in Dublin South union, 17 in Dublin North, 44 in Belfast, and 18 in Cork.

**DIPHTHERIA.**—Deaths from this disease, which in the three preceding quarters numbered 65, 60 and 100, respectively, were 93 last quarter, the average for the first quarter of the preceding five years being 97. Ten of the 93 deaths occurred in the union of Dublin South, 5 in Dublin North, 6 in Cork, 6 (5 appertaining to Belfast county borough) in Lisburn, 5 in Kilkenny, and 4 in Newry.

**DIARRHOEAL DISEASES.**—Of 232 deaths from diarrhoeal diseases, 187 were deaths from diarrhoea and enteritis of children under 2 years of age.

**TUBERCULOUS DISEASE.**—Under this heading, the number of deaths, as returned by the Registrars' was 2,483, equivalent to an annual rate of 2·27 per 1,000 of the population, as against 2·19 per 1,000 for the first quarter of 1914.

**CANCER.**—There were 877 deaths from cancer, a number representing an annual rate of 0·80 per 1,000; in the three preceding quarters the corresponding rates were 0·79, 0·80 and 0·81, respectively.

**CEREBRO-SPINAL FEVER.**—The Registrars of the following districts refer to this disease in their notes:—

**NAAS; Newbridge.**—Two fatal cases of cerebro-spinal meningitis occurred in this registration area.

**MULLINGAR; Mullingar.**—There were 5 cases of cerebro-spinal meningitis; 2 died.

**CORK; Cork Urban No. 1.**—One case of cerebro-spinal meningitis registered; duration of illness, 20 hours.

ANTRIM; *Randalstown*.—There have been several cases of cerebro-spinal meningitis in Randalstown; some cases also reported in the country.

BALLYMENA; *Toome*.—There was one death from cerebro-spinal meningitis.

BELFAST; *Belfast Urban No. 4*.—One death from cerebro-spinal fever.

NEWTOWNARDS; *Newtownards*.—Three urban cases of cerebro-spinal meningitis notified to me. Two died.

POLIOMYELITIS.—The Registrar of Coagh, in the union of Cookstown, reports:—One death registered from poliomyelitis.

The Registrars, in their Notes, report the presence of the following diseases:—Enteric fever in 7 districts, typhus in one, measles in 46, scarlet fever in 41, whooping-cough in 25, diphtheria in 16, mumps in 11, German measles in one, influenza in 153, cerebro-spinal fever or cerebro-spinal meningitis in 7, and poliomyelitis in one. [See Appendix to this Report commencing on page 65.]

INQUESTS.—There were 518 inquests reported to the Registrars during the quarter; this number being equal to one in every 47 of the total deaths registered.

In Leinster there was one inquest to every 49 deaths registered, in Munster one to 53, in Ulster one to 36, and in Connaught one to 128.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 24,170 deaths registered, 5,015, or 20·7 per cent., occurred in public institutions. In Leinster the percentage was 28·2, in Munster 24·8, in Ulster 14·7, and in Connaught 12·9.

UNCERTIFIED DEATHS.—According to the returns, 5,830 of the 24,170 deaths which were registered during the quarter were uncertified, being 24 per cent. of the total. In Leinster the percentage was 17, in Munster 28, in Ulster 20, and in Connaught the uncertified deaths were 51 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1915, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhœal Diseases.	Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.

## VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1915, there were 14,294 persons successfully vaccinated.

## EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st March last was 1,089 (760 males and 329 females), being 1,568 less than in the corresponding quarter of the year 1914, and 2,946 below the average number for the first quarter of the ten years 1905-1914.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1914 and 1915 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.
January,	319	272	—	47	178	94	—	84	497	366	—	131
February,	438	219	—	219	296	100	—	196	734	319	—	415
March,	849	269	—	580	577	135	—	442	1,426	404	—	1,022
TOTAL,	1,606	760	—	846	1,051	329	—	722	2,657	1,089*	—	1,568

\* Including 289 emigrants to the United States of America, viz. :—83 in the month of January, 86 in February, and 120 in March. Of 280 steerage passengers, 68 had their passages paid for in America.

## PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was  $6\frac{1}{2}d.$ , and the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited), bread, delivered, was  $6\frac{3}{4}d.$  In the first quarter of the year 1914 the average price for both firms was  $6d.$ , and in the corresponding quarter of 1905 it was also  $6d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 20s. per cwt. For the corresponding quarter of the year 1914 the average price was 16s., and for the first quarter of 1905 the average price was 14s. 6d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4s. 0d. to 5s. 0d. In the first quarter of 1914 the average prices were 2s. 5d. to 2s. 10d., and the prices for the corresponding quarter of 1905 were 2s. 9d. to 3s. 4d.

The average price per cwt. of beef at the Dublin Cattle Market was 50s. 6d. to 80s. 0d., as against 48s. to 65s. 6d. for the first quarter of 1914, the price for the first quarter of 1905 ranging from 45s. to 55s.

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 28s. to 33s. per ton nett.

The Dublin Stock Exchange, which had been closed owing to the financial situation created by the European war, was re-opened in January. The minimum price of Consols was then fixed by the Treasury at £68½. This was lowered to £66½ on 19th March, and remained at that figure to the end of the quarter.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which was 4 per cent. on 1st July, 1914, was raised to  $4\frac{1}{2}$  per cent. on 30th July, and to 10 per cent. on 1st August, falling to 6 per cent. on 6th August, and to 5 per cent. on 8th August. There has been no alteration in the rate from that date to the close of the first quarter of 1915.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1915 was 35,701 or 2,275 below the average for the corresponding period in 1914.

The average weekly number of persons receiving out-door relief during the quarter was 38,565, being 237 above the average for the first quarter of 1914.

Of the persons receiving in-door relief during the first quarter of 1915, an average number of 1,659 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1914 the average weekly number was 1,642.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1915, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.  
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.  
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the first

\* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1910 to 1915, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14).

The mean height of the barometer during the first quarter of 1915 was 29·701 inches, being 0·057 below the average for the corresponding quarter of the five years 1910–1914; the highest reading (30·588 inches) was on the 18th January, at 9 A.M., and the lowest (28·321 inches) on the 1st January, at 9 P.M.

The mean temperature of the air during the quarter was 39·8°, being 1·9° below the average for the first quarter of the 5 years, 1910–1914.

The maximum temperature of the air during the quarter was 55·8° and the minimum 14·9°. The maximum heat in sun was 106·2°.

Rain fell on 53 days during the quarter. The rain-fall measured 6·260 inches being 0·262 inches above the average for the first quarter of the five years, 1910–1914. The greatest monthly rainfall was in February, when 3·185 inches were registered.

*January.*—The mean height of the barometer during this month was 29·596 inches; the highest reading (30·588 inches) was on the 18th, at 9 A.M.; and the lowest (28·321 inches) on the 1st, at 9 P.M. The mean temperature of the air was 38·6°, the maximum registered was 52·8°, and the minimum 14·9°. The 31st was the warmest day, and the 24th the coldest night. The mean of the dry bulb was 37·8° and of the wet bulb, 36·8°. The maximum heat in the sun was 78·0°, and the minimum on the grass 14·5°. The total amount of sunshine recorded was 66·3 hours, the greatest daily amount being 6·6 hours on the 31st. The minimum on the grass was below 30° on 13 nights. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain or snow fell on 18 days. The rain-fall measured 2·265 inches; the greatest amount in 24 hours was 0·450 inch on the 15th.

*February.*—The mean height of the barometer during this month was 29·467 inches; the highest reading (30·376 inches) was on the 25th, at 9 P.M., and the lowest, (28·720 inches) on the 13th, at 9 A.M. The mean temperature of the air was 38·6°, the maximum registered was 55·8°, and the minimum 22·9°. The 6th was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 37·9°, and of the wet bulb 36·3°. The maximum heat in sun was 90·5°, and the minimum on the grass 18·1°. The total amount of sunshine recorded was 86·7 hours, the greatest daily amount being 9·7 hours on the 24th. The minimum on the grass was below 30° on 21 nights. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain or snow fell on 21 days. The rain-fall measured 3·185 inches; the greatest amount in 24 hours was 0·740 inch on the 14th.

*March.*—The mean height of the barometer during this month was 30·040 inches; the highest reading (30·534 inches) was on the 9th at 9 A.M., and the lowest (29·624 inches) on the 3rd, at 9 A.M. The mean temperature of the air was 42·1°, the maximum registered was 55·3°, and the minimum 25·0°. The 31st was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 41·4°, and of the wet bulb 39·4°. The maximum heat in sun was 106·2°, and the minimum on the grass 19·2°. The total amount of sunshine recorded was 119·7 hours, the greatest daily amount being 11·2 hours on the 21st. The minimum on the grass was below 30° on 18 nights. The maximum ozone was 1·0, the minimum 0·3, and the mean 0·7. Rain or snow fell on 14 days. The rain-fall measured 0·810 inch; the greatest amount in 24 hours was 0·215 inch on the 22nd.

## METEOROLOGY.

[*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*]

For the whole quarter the weather was rather cold, the mean temperature being a degree below the average. For the northern half of the country the mean temperature was  $40\cdot1^{\circ}$ , and for the southern division  $41\cdot4^{\circ}$ . The rainfall differed little from the normal. In the north the total amounted to 229 mm. (9·0 in.) 98 per cent. of the average, while in the south the fall was 273 mm. (10·7 in.) or 107 per cent. of the average. In the north the number of days of precipitation was 60, and in the south 58. Both the number of days and the actual fall were much less than for the corresponding quarter of last year. The duration of bright sunshine was also in close agreement with the normal. In the north the mean daily duration was 2·4 hours, a figure about equal to the average. In the south there was a slight excess, the daily mean, three hours, being 111 per cent. of the average. In both the districts the weather was brighter than during the corresponding quarter of last year.

**JANUARY, 1915.**—The temperature for the month as a whole was about a degree below the normal in both the northern and southern portions of the country, but the actual temperature in the north was  $1\frac{1}{2}^{\circ}$  lower than that in the south. After the first few days the thermometer became high for the time of year until after the 15th, when for about a week it was a little below the average and subsequently as much as about  $5^{\circ}$  below. The maximum warmth of the month occurred on the 13th, when a reading of  $58^{\circ}$  was recorded at Seskin, Carrick-on-Suir,  $56^{\circ}$  at some other stations in the southern division, and  $53^{\circ}$  in the north. Frost was rarely experienced until after the 23rd, and then it was mostly slight. There was, however, a minimum temperature as low as  $22^{\circ}$  at Newtownforbes on the 24th,  $15^{\circ}$  at Phoenix Park and  $19^{\circ}$  at Glasnevin on the 25th, and  $22^{\circ}$  at Markree Castle, Newtownforbes, and Cahir on the 30th. Even during the coldest days of the month the thermometer never failed to rise to a maximum higher than  $32^{\circ}$  in all parts of the country, and seldom remained as low as  $40^{\circ}$ .

**Rainfall.**—Considered generally the northern half of Ireland had more rain than the average, and the southern half less, but both the excess and deficit were very slight. Until the month was far advanced, rain was experienced almost daily in nearly all parts of the country, but many of the later days were dry in the east, and some of them in the west also. At stations in Sligo, Donegal, and Kerry rain fell on 26 or 27 days, but over a large area in the east and south-east of the country it was only reported on about 20 days, and at Trinity College, Dublin, and Newcastle on only 14 days. Very heavy downpours within a short time were uncommon, the most notable instance being 30 mm. at Blacksod Point on the 15th.

**Bright Sunshine.**—In Ireland North, the mean daily duration of sunshine was 1·38 hour, a figure just equal to the January average, and in Ireland South it was 1·97 hour, an excess of 0·32 hour. In the former district the percentage of the possible duration was 18, and in the latter 25. The mean daily amount was greatest, 2·94 hour, at Seskin, Carrick-on-Suir, and least, 0·90 hour, at Malin Head.

The main wind current was between south and west during the first fortnight, and its force frequently strong. A gale from the southward experienced on the 1st and 2nd was very violent. Subsequently the direction was much more variable, and the force often moderate to very light.

**FEBRUARY, 1915.**—The month, as a whole, was both cold and wet, although the duration of bright sunshine was slightly in excess of the normal. The general direction of the wind was between south and west, with an occasional brief visit to north-west or north. Strong boisterous winds or gales were frequent, and, as usual, they were more violent along the western coasts than elsewhere.

*Temperature.*—The highest mean temperature was experienced during the first week, when it was above the average over the whole country. The remainder of the month was persistently cold for the time of year, the coldest period being the last week, when in the northern half of the country the mean was no higher than  $36\cdot3^{\circ}$ , and in the southern half  $37\cdot8^{\circ}$ . Both these values were  $4^{\circ}$  below the normal. There was, nevertheless, no continuous frost, and there were very few days with the maximum temperature below  $40^{\circ}$  in any part of the country. The warmest day was the 3rd, when the wind was strong to a gale from south and south-west, and the thermometer rose to a maximum of  $58^{\circ}$  at Glasnevin. The subsequent weather gave few maxima above  $50^{\circ}$ , and some of the occasional night frosts were rather severe. On the 12th the thermometer fell to  $23^{\circ}$  at Markree Castle, and on the 15th or 16th it touched  $26^{\circ}$  in various localities. The coldest nights over the country generally were the 24th and 25th, and the lowest minimum reading reported  $20^{\circ}$  at Markree Castle on the former date. At Birr Castle and Kilkenny minima of  $24^{\circ}$  were recorded both on the 24th and 25th. For the month, as a whole, the mean temperature was  $38\cdot8^{\circ}$  in the north, and  $40\cdot3^{\circ}$  in the south, both values being  $1\frac{3}{4}$  below the average.

*Rainfall.*—In some parts of Kerry rain fell every day, but over a very large area in the eastern half of the country the number of days with rain was less than 20; at Clongowes Wood it was only 16. The total fall for the month was in excess of the average in every part of the country. More than 250 mm. (10 in.) fell locally in Kerry, and the total fall in the southern division generally, 150 mm. exceeded the average by 69 mm. In the north the total was 107 mm. and exceeded the average by 29 mm. The heaviest downpours within 24 hours were 56 mm. at Delphi, Co. Mayo, on the 2nd, 28 mm. at Killarney on the 3rd, 29 mm. at Seskin, Carrick-on-Suir, on the 16th, and 28 mm. at Valencia on the 26th. Snow showers occurred in most districts from time to time, but the ground at ordinary altitudes was seldom covered.

*Bright Sunshine* differed little from the normal. During the first fortnight it was a little below it, and then somewhat above it, the excess slightly outbalancing the deficit. In the north the mean daily duration was 2·4 hour, or 25 per cent. of the possible duration, and in the south 2·9 hour, or 30 per cent. of the possible.

MARCH.—The general state of the weather was dry after the first week, and the wind, usually from some point between north-west and north-east, seldom attained a very high force.

*Temperature.*—As in February the mean temperature was higher during the first week than at any subsequent time, and the maximum readings of the month were recorded as early as the 5th, when the thermometer rose to between  $57^{\circ}$  and  $58^{\circ}$  over a large portion of the country. Sharp or severe night frosts were experienced from time to time, but in no case did frost continue throughout the day, although the greatest afternoon warmth towards the end of the month was little more than  $40^{\circ}$ . On the 2nd the thermometer recorded a minimum of  $21^{\circ}$  at Parsonstown. On the 9th there was a minimum of  $22^{\circ}$  at Markree Castle, followed by a similar reading at Parsonstown on the 19th and 20th. In the south-west and south the thermometer fell to  $24^{\circ}$  at Killarney on the 19th, and to the same value at Kilkenny on the 21st.

*Rainfall.*—In both the north and south the total fall for the month was 25 mm., that amount being 43 mm. below the average in the north, and 51 mm. below in the south. At Killarney the fall was only 23 per cent., and at Foynes 15 per cent. of the average. The total number of days with a measurable quantity was only 12 in the south, and 15 in the north. The rainfall offered a striking contrast to that of March, 1914, when rain fell on every day but 2 in the south, and 4 in the north.

*Bright Sunshine* was almost identical with the average. In the southern division the mean daily duration was 3·9 hour, and in the north 3·4 hour. The first week, when the wind was strong and boisterous from the southward, was mostly dull, but for many days late in the month, when the weather was cold and the wind from between north and north-east, the sun shone in a cloudless sky.

\* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispersary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 29 and 30 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 3rd January, 1915, to 3rd April, 1915. With the exception of 180 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

‡ Exclusive of 8 deaths in the Rathdown Union Workhouse of persons admitted from Kingstown, to which Urban District they have been assigned.

1866	5,522,942	2,700,565	2,822,377	1892	4,633,808	2,282,392	2,351,416				

NOTE.—This table has been constructed for the year 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915.—In the exceptional circumstances of the present year the estimate of population for 1914 is still in use.

# APPENDIX.

## REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

### I.—PROVINCE OF LEINSTER.

#### Carlow County.

BALTINGLASS; *Rathvilly*.—Influenza was very prevalent in this district for the past quarter. There were, however, no deaths.

CARLOW; *Bagenalstown*.—Of the 15 deaths registered during the quarter, nine were those of persons 70 years of age and upwards. The district is healthy.

CARLOW; *Carlow, No. 1, W*.—There was an outbreak of typhoid fever in January confined to the urban area—ten cases, one fatal. An epidemic of influenza occurred in the last half of quarter.

CARLOW; *Fennagh and Myshall*.—A widespread epidemic of influenza prevailed during the quarter; broncho-pneumonia as a sequelæ caused one death.

CARLOW; *Leighlinbridge*.—Epidemic of influenza and bronchitis present. No infectious disease in district.

#### Dublin County.

BALROTHERY; *Lusk*.—Influenza of varied types rather prevalent during quarter. High mortality among old people.

CELBRIDGE; *Rathcoole*.—Much influenza during quarter.

DUBLIN, NORTH; *Finglas and Glasnevin (part of)*.—Influenza prevalent.

DUBLIN, SOUTH; *Crumlin*.—The death-rate for the district was abnormally high during the last quarter, and was altogether due to the ravages of influenza, from which few escaped. For the most part the bronchial type obtained and played sad havoc with those who suffered from chronic pulmonary or cardiac affection. Otherwise the health of the district was normal.

DUBLIN, SOUTH; *Donnybrook No. 1*.—District healthy.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—With the exception of a severe epidemic of influenza, the district was otherwise healthy during the quarter.

#### Dublin County Borough.

DUBLIN, NORTH; *Finglas and Glasnevin (part of)*.—Influenza prevalent.

DUBLIN, NORTH; *North City No. 3, W*.—Influenza and whooping-cough have both been very prevalent.

DUBLIN, SOUTH; *New Kilmainham*.—District is in a very good sanitary condition.

#### Kildare County.

ATHY; *Monasterevin*.—Sanitation good.

BALTINGLASS; *Baltinglass No. 2*.—Prevalence of influenza amongst children and infants.

CELBRIDGE; *Kilcock*.—Influenza has been very prevalent during the last quarter; pneumonia following.

CELBRIDGE; *Maynooth*.—District healthy.

EDENDERRY; *Carbury*.—Influenza and bronchitis very prevalent. Some cases of whooping-cough.

NAAS; *Ballymore Eustace*.—Influenza is prevalent; the death rate is low.

NAAS; *Naas and Carragh, W*.—An epidemic of whooping-cough in the district, also an epidemic of measles of a light type. Four deaths from whooping-cough.

NAAS; *Newbridge*.—Two fatal cases of cerebro-spinal meningitis occurred in this registration area.

NAAS; *Robertstown and Kilmeage*.—Health and sanitary condition of district good. I registered the death of one person aged 93 years.

#### Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Pilltown*.—The sanitary state of the district is good.

CASTLECOMER; *Ballyragget*.—The district is in a good sanitary condition. Bronchitis and influenza have been prevalent in the district.

CASTLECOMER; *Castlecomer, W.*—The district is free from any epidemic.

KILKENNY; *Gowran.*—The sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin.*—There has been a prevalence of influenza in my district for past three months.

KILKENNY; *Tullaroan.*—District healthy.

NEW ROSS; *Dysartmoon.*—District healthy.

THOMASTOWN; *Inistioge.*—District healthy.

THOMASTOWN; *Knocktopher.*—There was a regular epidemic of influenza during the quarter just ended. It accounted for a number of deaths in old delicate people. I had one case of diphtheria, otherwise district in a very satisfactory condition.

URLINGFORD; *Urlingford, W.*—Health of district fairly good, except an epidemic of influenza prevailed for some time past.

WATERFORD; *Ullid.*—Tuberculosis is increasing.

### King's County.

BIRR; *Birr, W.*—A large number of people had influenza of various kinds.

BIRR; *Ferbane.*—Epidemic of measles prevailed.

BIRR; *Frankford.*—The health of the district has been good, with the exception of an outbreak of influenza in the end of January and beginning of February. There were no deaths from this influenza.

BIRR; *Kinnitty.*—District healthy.

MOUNTMELICK; *Clonygowan No. 2.*—District fairly healthy.

ROSCREA; *Roscrea No. 2.*—Health of district good.

ROSCREA; *Shinrone.*—Sanitary arrangements fair. No infectious disease prevalent at present as far as I am aware.

TULLAMORE; *Clara.*—Sanitary arrangements fairly good. Influenza of gastro-intestinal type prevalent during quarter.

TULLAMORE; *Killoughy.*—A very severe form of influenza has been present in this district during past quarter.

TULLAMORE; *Phillipstown.*—District healthy.

TULLAMORE; *Tullamore, W.*—Severe epidemic of influenza during quarter, which proved fatal to a great many old people.

### Longford County.

BALLYMAHON; *Abbeyskrule.*—Of the 13 deaths registered, there were nine over 73 years, one being aged 94 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory. Two deaths—males—were registered, aged 100 and 106 years, respectively.

GRANARD; *Ballinalee.*—I beg to state that the district is in a good sanitary condition, and free from contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition, and free from contagious disease.

GRANARD; *Scrabby No. 2.*—Influenza and mumps very prevalent during the quarter. Most of the deaths recorded were old age pensioners; one death from pulmonary tuberculosis being an old woman who lived in a damp hovel.

LONGFORD; *Killashee.*—There were several cases of influenza during the quarter, but otherwise the district is particularly free from disease.

### Louth County.

ARDEE; *Castlebellingham.*—District healthy.

ARDEE; *Collon No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DUNDALK; *Barronstown.*—An outbreak of whooping-cough occurred in the district.

DUNDALK; *Dromiskin.*—Epidemic of mumps, and influenza of mild type.

DUNDALK; *Dundalk, W.*—An epidemic of whooping-cough prevailed during the quarter—it is only dying out now. Also influenza and pneumonia. The general health of the district is good at present.

### Meath County.

DROGHEDA; *St. Mary's.*—Sanitary arrangements are good.

EDENDERRY; *Ballyboggan.*—An epidemic of influenza visited the district during the quarter.

KELLS; *Moynalty.*—No deaths registered from tuberculosis. A few isolated cases of scarlatina occurred early in March.

KELLS; *Nobber.*—Very many were ailing in the district during the quarter; in fact, few but got a bout of cold or influenza, some mild, others severe. However, only one death is certified as caused by the latter, that of a person aged 78 years. The season was abnormally severe and trying, so complaints of its bitterness were general.

NAVAN; *Painestown.*—District free from epidemic disease. Catarrhal complaints common. Sanitation good.

TRIM; *Innfield.*—Outbreaks of whooping-cough and influenza occurred.

TRIM; *Summerhill.*—The one case of tuberculosis came from Dublin to die at home. Influenza was very prevalent in the district.

### Queen's County.

ABBEYLEIX; *Rathdowney.*—The sanitary arrangements in the district are good.

MOUNTMELICK; *Clonaslee.*—Severe epidemics of mumps and influenza during first two months of quarter. District at present very healthy. One death at 106 registered.

MOUNTMELICK; *Clonygowan No. 1.*—District fairly healthy.

MOUNTMELICK; *Maryborough.*—Influenza has been very prevalent during the past three months.

MOUNTMELICK; *Mountrath*.—Sanitary arrangements fair.

ROSCREA; *Borris-in-Ossory*.—There has been a good deal of sickness during past quarter. The number of deaths is over the average.

### Westmeath County.

BALLYMAHON; *Ballymore*.—There was an epidemic of influenza during the two last months of quarter.

DELVIN; *Clonmellon*.—Influenza prevalent. District otherwise healthy.

MULLINGAR; *Ballynacarrigy*.—The death rate has been abnormally low for the quarter, despite a rather severe winter. No death from tuberculous disease.

MULLINGAR; *Castletown Geoghegan*.—The district is healthy; one case of scarlatina occurred during the quarter; the case recovered, but no other case occurred to my knowledge.

MULLINGAR; *Killucan*.—A mild form of influenza prevalent during the quarter.

MULLINGAR; *Milltown*.—There was one death from tubercular pneumonia, two from cancer, and six uncertified deaths.

MULLINGAR; *Mullingar, W.*—There were five cases of cerebro-spinal meningitis; two died. There was one case of diphtheria died after a few hours. An epidemic of exceptionally severe character prevailed during the months of January and February, and increased the death-rate.

TULLAMOR; *Kilbeggan*.—Extensive epidemic of influenza occurred during the quarter, but no deaths were due to this cause. Two deaths from tuberculosis occurred, both of long standing, and both due to infection from a previous case in the same house. The number of uncertified deaths is due to the number of old people who succumbed during the severe winter. Sanitation satisfactory.

### Wexford County.

GOREY; *Camolin*.—The district continues healthy.

GOREY; *Killenagh and Wells*.—Influenza prevalent during the quarter.

NEW ROSS; *Fethard No. 1*.—The sanitary condition of the district is satisfactory. No infectious diseases during the quarter.

NEW ROSS; *Fethard No. 2*.—District healthy.

WEXFORD; *Bannow*.—The sanitary state of the district is satisfactory. Influenza was very prevalent during the past quarter.

WEXFORD; *Bridgetown*.—The increase in number of deaths was largely amongst very old people. I registered one at 117 years, one at 98, and three over 85. Influenza very prevalent during quarter.

### Wicklow County.

BALTINGLASS; *Baltinglass No. 1, W.*—Prevalence of influenza amongst children and infants.

BALTINGLASS; *Dunlavin*.—A very severe epidemic of influenza. Chest affections very prevalent.

BALTINGLASS; *Kiltegan*.—Health of district is normal.

NAAS; *Blessington*.—Influenza prevalent, also several cases of pneumonia; six deaths occurred from it; some were aged.

RATHDOWN; *Delgany*.—Influenza prevalent in my district.

RATHDOWN; *Powerscourt*.—District healthy during quarter; no case of infectious disease.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Aughrim*.—Sanitary arrangements fairly good on the whole. No infectious disease except influenza.

RATHDRUM; *Newcastle*.—An extensive epidemic of influenza prevailed for past three months.

## II. PROVINCE OF MUNSTER.

### Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Influenza prevalent during quarter. Mild form of laryngitis prevalent in children. Sanitary condition of district good except in one town.

CORROFIN; *Corrofin, W.*—"Colds" and influenza prevalent.

ENNIS; *Crusheen*.—I attended three cases of scarlatina, which recovered; otherwise the health of the district is good.

ENNIS; *Ennis No. 2*.—Influenza is prevalent in district.

ENNIS; *Killaniv*.—The health of the district is excellent.

ENNIS; *Newmarket*.—There has been an outbreak of scarlatina in the district, fortunately confined to the members of one family. The infection was of a mild type, and no deaths occurred. There were eight cases in all; otherwise the district is healthy.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory.

ENNISTIMON; *Milltown Malbay*.—The sanitary arrangements are fair. A majority of the deaths are of very old people. Colds were prevalent.

KILLADYSERT; *Labasheeda*.—The health of the district continues good.

KILRUSH; *Carrigaholt*.—Health of district continues very good.

KILRUSH; *Kilkee*.—The health of district very good, and the sanitary condition is satisfactory.

LIMERICK; *Bridgetown*.—District healthy.

**LIMERICK; Coolacasey.**—The health of the district is good. The weather was very inclement during the quarter.

**SCARRIFF; Kilkishen.**—Cases of scarlet fever occurred in several parts of the district during the quarter. One death, not yet registered, was due to this disease.

**SCARRIFF; Mountshannon, W.**—District continues in a healthy state.

**SCARRIFF; Quin.**—Influenza prevalent. A few cases of scarlet fever. Health of rest of district good.

### Cork County and County Borough.

**BANDON; Innishannon.**—Three cases of pertussis were attended, the only infectious disease during the quarter, if influenza, which was very prevalent, may be left out.

**BANDON; Kilbrittain.**—District healthy, except that whooping-cough was prevalent.

**BANDON; Murragh.**—Whooping-cough of rather severe type very prevalent.

**BANDON; Templemartin.**—The weather was severe, and whooping-cough re-appeared during the quarter.

**BANTRY; Bantry, W.**—One case of cancer. The sanitary condition of district is fairly good.

**BANTRY; Durrus and Kilocrohan.**—The general health of the district is exceptionally good. There was an epidemic of mumps during the whole of the quarter and the end of last quarter. The sanitary arrangements are, on the whole, good.

**BANTRY; Glengariff.**—There was an epidemic of measles during the quarter ended; some isolated cases still. The school children attending the schools at the extreme ends of the district had all practically had the disease; in fact, were closed for want of attendance, whilst a school, a mixed one, in the centre of the district had not a single school child affected. It was closed for three weeks on my recommendation when the first few cases came under my notice.

**BANTRY; Kealkill.**—District healthy; sanitary condition good.

**CASTLETOWN; Kilcatherine.**—District healthy.

**CLONAKILTY; Clonakilty, W.**—There have been a few cases of scarlatina and diphtheria (one death not yet registered).

**CORK; Blarney.**—Bronchial colds of an influenzal nature prevalent during the quarter.

**CORK; Carrigaline No. 1.**—In spite of the severe weather, the district has been very healthy during the quarter.

**CORK; Carrigaline No. 2.**—The district is very healthy this quarter.

**CORK; Carrignavar.**—District healthy.

**CORK; Cork Urban No. 1.**—One case of cerebro-spinal meningitis registered; duration of illness, 20 hours.

**CORK; Dripsey.**—Sanitary condition good.

**CORK; Queenstown No. 1.**—Measles prevalent.

**CORK; Queenstown No. 2.**—Measles has been very prevalent during quarter.

**DUNMANWAY; Coolmountain.**—There was a severe epidemic of whooping-cough during the quarter, four deaths resulting, with pulmonary complications. Three cases of scarlet fever occurred; otherwise the health of the district is satisfactory.

**DUNMANWAY; Dunmanway, W.**—The sanitary condition of the district continues fairly satisfactory. Influenza, accompanied by bronchitis and other chest affections, was somewhat prevalent during the winter months. There was one death registered as being due to pulmonary tuberculosis (not contracted in this district), and one to abdominal cancer.

**FERMOY; Ballynoe.**—Influenza with pneumonia and bronchitis as complications prevailed extensively during quarter.

**FERMOY; Rathcormack.**—Measles and pertussis were prevalent during the quarter. The district was otherwise healthy.

**KANTURK; Boherboy.**—The district continues healthy. Two cases of enteric fever and one of scarlatina were brought under my notice.

**KANTURK; Kanturk, W.**—One death of an old lady aged 100 years registered, who had been getting about doing her usual business until a few days before she died.

**KANTURK; Milford.**—The district is healthy.

**KILMALLOCK; Charleville.**—The district is very healthy. There has been a mild epidemic of influenza.

**KINSALE; Ballyfeard.**—The health of district has been very fair during quarter; ulcers on hands and feet have been prevalent; all recovered. Influenza in some cases complicated with pleuropneumonia and bronchitis epidemic; no deaths from it. I consider the manure heaps are placed too close to farmers' houses throughout the district, and I have reported same.

**KINSALE; Courneys.**—District in a good sanitary condition.

**KINSALE; Kinsale, W.**—Whooping-cough prevalent. A few cases of scarlatina in town.

**MALLOW; Ballyclogh.**—District healthy.

**MALLOW; Rahan.**—District healthy during past quarter, but many cases of influenza.

**MIDDLETON; Cloyne.**—Epidemic of mumps. Three isolated cases of diphtheria.

**MIDDLETON; Walshtownmore East.**—Whooping-cough and influenza prevalent at present.

**MILLSTREET; Cullen.**—Scarlet fever has been prevalent.

**MITCHELSTOWN; Kildorrery.**—There was an epidemic of mumps as well as influenza during the past quarter.

**SKULL; Skull, W.**—Health of the district remains very good.

### Kerry County.

**CAHERSIVEEN; Caher, W.**—The condition of the district is sanitary. The Inspection of Dairies and Cowsheds Order (1908) has improved the sanitary condition of the district to a great extent.

**CAHERSIVEEN; Darrynane.**—Some cases of influenza of a mild type with pulmonary complications were prevalent during quarter; no fatality occurred therefrom.

CAHERSIVEEN; *Emlagh*.—Owing to a very bad winter there was a severe epidemic of pneumonia and influenza in the Registrar's district, with no fatal result. I have registered the death of one man, who was over 102 years old.

CAHERSIVEEN; *Glanbehy*.—There are no deaths from cancer in my district for the quarter now ended. District healthy.

CAHERSIVEEN; *Valencia*.—The sanitary arrangements in this district are good, and the district is free from the diseases named in the abstract.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—One death entered, the age stated being 112 years; this age can be verified.

KENMARE; *Tuosist*.—District very healthy.

KILLARNEY; *Coom*.—District healthy during past quarter, with exception of one case of diphtheria.

KILLARNEY; *Killarney No. 1, W.*—Some cases of influenza during the quarter.

KILLARNEY; *Killorglin*.—There was a severe epidemic of whooping-cough in part of the district during the quarter. Measles was also prevalent, but did not prove serious until the advent of the whooping-cough.

KILLARNEY; *Molahiffe*.—The district is in a satisfactory sanitary condition. One death from tuberculosis has been registered during the quarter.

LISTOWEL; *Ballyhorgan*.—Influenza rather prevalent in some localities. District otherwise healthy.

LISTOWEL; *Ballylongford*.—Public health continues satisfactory.

LISTOWEL; *Listowel, W.*—Health of district satisfactory; no epidemic during quarter.

LISTOWEL; *Tarbert*.—District healthy on the whole.

TRALEE; *Brosna No. 1*.—No infectious diseases were reported during the quarter ended.

TRALEE; *Castlemaine*.—District very healthy.

### Limerick County and County Borough.

KILMALLOCK; *Bruff*.—District healthy.

KILMALLOCK; *Bruree*.—There was a lot of bronchial and rheumatic cases probably of influenzal source.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—Epidemic bronchitis prevalent. District otherwise healthy.

LIMERICK; *Annacotty*.—Sanitary arrangements good. District healthy.

LIMERICK; *Caherconlish*.—Health of district good. One death from epithelioma of lip. No death registered from tuberculosis.

LIMERICK; *Clarina*.—Five cases of scarlatina during the quarter. The district otherwise healthy.

LIMERICK; *Limerick No. 3*.—The health of my district has been good during the quarter, and the sanitary arrangements satisfactory.

LIMERICK; *Moroe*.—District in good sanitary condition. One death from cancer of stomach, three from pulmonary tuberculosis. Influenza, complicated by severe chest troubles, prevalent during quarter. Number of deaths exceptionally high—chiefly the aged and infirm; number of births also unusually high.

LISTOWEL; *Glin*.—The district, notwithstanding the severity of the weather for the past two months, has been very free from diseases usually considered infectious and contagious. No case of cancer, and only one of pulmonary tuberculosis.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy.

NEWCASTLE; *Ardagh*.—With the exception of a few cases of influenza, the district is in a decidedly healthy state.

NEWCASTLE; *Feenagh*.—The sanitary arrangements are fairly good. There has been no epidemic disease in the district during the quarter.

RATHKEALE; *Askeaton*.—During the last quarter there were three deaths registered from phthisis pulmonalis; diphtheritic croup caused one death, and debility from spina-bifida caused another death.

RATHKEALE; *Pallaskenry*.—During past quarter influenza very prevalent. It has lowered the vitality of the people, and prepared the way for pulmonary sequelæ, *e.g.*, tuberculosis. Sanitary condition generally good.

RATHKEALE; *Rathkeale No. 1, W.*—The public health of the district good, but four deaths were registered from tuberculosis; an epidemic of influenza with throat symptoms very prevalent but mild.

RATHKEALE; *Rathkeale No. 2*.—With the exception of a few cases of scarlet fever, my district was in a very healthy condition during the quarter ended.

### Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—Some cases of scarlatina prevalent in one part of my district, which has been unfortunate in this respect on and off for the past two years.

BORRISOKANE; *CloghJordan*.—Sanitary condition of district satisfactory. Influenza and bronchitis prevalent during February and March. Deaths mostly amongst old people ranging from 65 to 90 years.

BORRISOKANE; *Terryglass*.—Influenza rife; district otherwise healthy.

NENAGH; *Nenagh, W.*—Colds of an influenzal nature prevalent.

NENAGH; *Newport*.—District healthy. Sanitary condition fair.

NENAGH; *Portroe*.—District healthy.

NENAGH; *Silvermines*.—The condition of the district is absolutely healthy.

THURLES; *Thurles, W.*—Influenza prevalent during quarter.

**Tipperary County, South Riding.**

CALLAN; *Ballingarry*.—Catarrhal influenza was prevalent during the quarter.

CALLAN; *Mullinahone*.—Health and sanitary condition of district good; no contagious disease prevalent during quarter except influenza. No case of cancer or tuberculosis.

CASHEL; *Killenaule*.—Health of district has been very good during past quarter.

CASHEL; *Kilpatrick*.—District free from zymotic disease; one death is registered age 100 years; two deaths at age of 92 years.

CLOGHEEN; *Caher*.—Some cases of scarlatina occurred in the district during the past quarter, otherwise the health of district is good.

CLONMEL; *Kilsheelan No. 1*.—One case of scarlet fever.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy and free from epidemics.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—There was an epidemic of influenza during January and February, otherwise district was healthy.

**Waterford County and County Borough.**

CARRICK-ON-SUIR; *Rathgormuck*.—Health of district satisfactory. No infectious disease during last quarter.

CLONMEL; *Ballymacarbry*.—Sanitary condition fair, a good many cases of influenza in March. One death registered at 85 years, one 76, one 75, one 72, one 69, and one 68.

CLONMEL; *Kilsheelan No. 2*.—One death from cancer.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter.

DUNGARVAN; *Whitechurch*.—The epidemic of measles, which is mild in type, still continues in the district. No deaths have resulted therefrom.

LISMORE; *Cappoquin*.—An epidemic of measles during the quarter.

WATERFORD; *Kilmeadan*.—During the past quarter the health of the district was good, except during the past month, when influenza has been very prevalent.

WATERFORD; *Waterford Rural No. 1*.—Health of district average. A few cases of scarlatina which were removed to hospital.

• WATERFORD; *Waterford Urban No. 1, W.*—Scarlatina has prevailed in epidemic form during the quarter, as evidenced by sixteen deaths returned as due to that disease; the epidemic now appears to be abating.

YOUGHAL; *Ardmore*.—District very healthy.

YOUGHAL; *Clashmore*.—Whooping-cough and measles prevalent.

**III. PROVINCE OF ULSTER.****Antrim County.**

ANTRIM; *Crumlin*.—Epidemics of influenza, measles, and whooping-cough have made this last quarter one of the worst as regards sickness for many years.

ANTRIM; *Dough*.—There was an outbreak of diphtheria in the district during the quarter, also a great deal of influenza.

ANTRIM; *Randalstown*.—There have been several cases of cerebro-spinal meningitis, scarlatina and diphtheria at Randalstown. Some cases of cerebro-spinal meningitis and one case of scarlatina reported in the country.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Measles and influenza prevalent during the quarter.

BALLYCASTLE; *Ballycastle, W.*—Influenza has been very prevalent in the district during the quarter.

BALLYCASTLE; *Cushendall*.—Health of the district during last quarter has been very good. Epidemic of measles; no deaths.

BALLYMENA; *Ahoghill*.—District free from zymotic disease.

BALLYMENA; *Ballymena, W.*—Larger number of deaths than usual during the quarter. Influenza recently epidemic carried off a number of old people. Public health at present more satisfactory.

BALLYMENA; *Broughshane*.—Pneumonia and influenza very prevalent.

BALLYMENA; *Clogh*.—During this quarter there was a number of cases of diphtheria, but no deaths. In the month of March there has been a very extensive outbreak of measles, but no deaths so far; otherwise the district has been very healthy. Twelve of the 20 deaths were of persons aged over 65 years.

BALLYMENA; *Galgorm*.—District in good sanitary condition.

BALLYMENA; *Glenwhirry*.—Influenza prevalent; type not severe.

BALLYMENA; *Portglenone*.—A severe epidemic of influenza was prevalent during this quarter.

BALLYMENA; *Toome*.—Health of the district satisfactory. There was one death from cerebro-spinal meningitis.

BALLYMONEY; *Castlequarter*.—Epidemic of measles during the quarter.

BALLYMONEY; *Dervock*.—Influenza, with pneumonia and broncho-pneumonia as complications, has been widely prevalent in the district during the quarter.

BALLYMONEY; *Dirraw*.—One death registered at 105 years, and I have reason to believe this is quite correct. Eldest daughter 62 years old, and deceased was over 40 years old when married.

BELFAST; *Belfast Rural, No. 4*.—Influenza with throat and chest complications was prevalent during the quarter, but no deaths were registered directly attributable to this cause. The sanitary arrangements in the district are pretty well up to date.

LARNE; *Ballycarry*.—Sanitation of district fairly good. Whooping-cough, influenza, and bronchial affections very prevalent. A few scattered cases of diphtheria in south part of district; one death of an infant therefrom. Deaths of a large number of persons over 80 years, and some over 90 years registered.

LARNE; *Waterfoot*.—The health of the district has been exceptionally good during the last quarter. No epidemic of any kind.

LISBURN; *Dunmurry*.—The district has been very free from infectious diseases during the past quarter, with the exception of influenza, which has been very prevalent, but of a comparatively mild type.

LISBURN; *Glenavy*.—Influenza very prevalent during the quarter. Two cases each of diphtheria and scarlet fever were notified. The death rate is unusually high, but almost 65 per cent. of the deaths registered are of persons 65 years of age and upwards.

### Armagh County.

ARMAGH; *Blackwatertown*.—Bronchial affections prevalent amongst children.

ARMAGH; *Keady*.—There has been an epidemic of influenza during the quarter.

ARMAGH; *Markethill*.—Scarlet fever still lingers in the district. Four cases of typhoid fever, in two families, were removed to hospital.

LURGAN; *Lurgan No. 1, W.*—District practically free from zymotic disease.

LURGAN; *Lurgan No. 2*.—The district is in a good healthy condition, and free from any infectious disease.

LURGAN; *Portadown*.—Measles was present in district during quarter.

NEWRY; *Forkill*.—Whooping-cough and influenza prevalent during the quarter.

NEWRY; *Meigh*.—District healthy. Mostly old people sick owing to trying winter.

NEWRY; *Mullaghglass*.—For the past three months there has been an epidemic of influenza all over my district.

### Belfast County Borough.

BELFAST; *Belfast, Urban, No. 3*.—Whooping-cough was prevalent.

BELFAST; *Belfast, Urban, No. 4, W.*—One death from cerebro-spinal fever.

### Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—Influenza and bronchial colds have been prevalent during the quarter; otherwise the district is healthy.

BAILIEBOROUGH; *Shercock*.—Two cases of scarlatina occurred in the district during the quarter; disease did not extend owing to isolation and other sanitary precautions.

CAVAN; *Bellananagh*.—District very healthy during the current quarter.

CAVAN; *Belturbet*.—There was an epidemic of measles in urban and rural districts. Influenza and pneumonia very prevalent.

CAVAN; *Killashandra*.—One death from carcinoma of liver registered during the quarter. No epidemic.

CAVAN; *Stradone*.—Influenza prevalent in the district.

ENNISKILLEN; *Dowra*.—The district is very healthy.

ENNISKILLEN; *Holywell No. 2*.—The sanitation of the district is satisfactory.

GRANARD; *Scrabby No. 1*.—Influenza very prevalent during the quarter. Most of the deaths recorded were of old age pensioners.

OLDCASTLE; *Ballyjamesduff*.—District healthy, except for epidemics of influenza and mumps. One case of typhus fever.

OLDCASTLE; *Virginia*.—District healthy.

### Donegal County.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely*.—Influenza prevalent during quarter.

DONEGAL; *Laghy*.—District healthy. The death of one person aged 103 years was registered during the quarter.

DONEGAL; *Mountcharles*.—District healthy, considering the wet and stormy winter.

DONEGAL; *Pettigoe*.—Births under and deaths above the average. The health of the district was fairly good during last quarter.

DUNFANAGHY; *Crossroads*.—Three deaths from pneumonia following measles.

DUNFANAGHY; *Dunfanaghy, W.*—Severe epidemic of influenza from about Christmas to St. Patrick's Day followed in many cases by bronchitis or pneumonia.

GLENTIES; *Doocharry*.—Sanitary arrangements fairly good. None of the diseases mentioned in the abstracts prevalent at present.

GLENTIES; *Glenties, W.*—Influenza has been very prevalent during the quarter.

GLENTIES; *Killybegs*.—There has been an outbreak of measles during quarter.

INISHOWEN; *Carndonagh, W.*—Influenza of a very virulent type has been very prevalent during the latter half of the quarter.

INISHOWEN; *Clonmany*.—Influenza prevalent for the past four weeks. Three cases of diphtheria during the quarter, one of which proved fatal, but the death has not been registered yet.

INISHOWEN; *Malin*.—District free from disease except that there has been influenza of a mild type prevalent during the past month.

LETTERKENNY; *Church Hill*.—District healthy; no epidemic.

LETTERKENNY; *Manorcunningham*.—The sanitary state of the district is fairly good. Influenza the prevalent disease during the quarter.

LONDONDERRY; *Killea*.—Vast amount of sickness in the district. More deaths have been registered during this quarter than in any quarter for over twenty years.

MILLFORD; *Fanad*.—The severe weather during past quarter caused a good many deaths among the aged. No cases of contagious disease occurred. One death registered at age of 101 years.

MILLFORD; *Rosguill*.—An outbreak of typhus fever occurred during the quarter. Five cases affected and one woman died; death not yet registered. We have not been able as yet to trace the disease to the commonly accepted origin, viz., second-hand clothing, and tramps finding lodgings in the houses. A few cases of diphtheria also

occurred, but disease did not spread. Influenza very prevalent, causing an unusually large number of deaths in people over 65 years. Pulmonary form of disease prevailed.

STRABANE; *Raphoe*.—Scarlatina prevalent during January and February, and influenza prevalent during February and March.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory; a number of deaths registered were of an advanced age. No contagious disease during the quarter.

STRANORLAR; *Killygordon*.—Except for two cases of scarlatina, district has been free from zymotic disease. Two-thirds of deaths registered were "senile decay." Sanitation excellent.

### Down County.

BANBRIDGE; *Ballyward*.—This last quarter has proved particularly fatal to the aged and to phthisical cases. Many chronic phthisical cases developed acute symptoms rapidly.

BANBRIDGE; *Dromore*.—Influenza has been prevalent during the quarter.

BELFAST; *Castlereagh No. 2*.—Influenza has been very prevalent during the months of February and March, 1915.

DOWNPATRICK; *Ballynahinch*.—There has been a large number of cases of influenza of a severe type in the district during the quarter. One death was certified as due to typhoid meningitis, contracted, I believe, outside the district.

DOWNPATRICK; *Killyleagh*.—The public health has been good during the quarter just ended. There has been the annual visitation of influenza, but the chest complications have not been serious. There is no epidemic in the district at present; the death-rate is lower than usual.

DOWNPATRICK; *Portaferry*.—Influenza prevalent during March and February, but health of district otherwise good.

KILKEEL; *Rosstrevor*.—Sanitary arrangements of district quite satisfactory.

LISBURN; *Annahilt*.—The sanitary condition of the district is good.

LISBURN; *Ballylesson*.—The district is free from all acute infectious fevers.

LISBURN; *Drumbeg*.—Births about the average; deaths above the average. One-third of the total number of deaths registered was of persons aged 70 years and upwards. A widespread epidemic of influenza was present during March.

LISBURN; *Saintfield*.—A few mild cases of scarlet fever occurred during quarter.

LURGAN; *Moir*.—There has been an extensive epidemic of measles in the district during the past two quarters, but it has practically exhausted supply of susceptibles and disappeared. It has, however, been followed or accompanied by whooping-cough, which has been very hard on the children. Only one death has occurred from this latter cause. A few sporadic cases of scarlatina have also occurred, and it is difficult to trace the origin, although one may suspect a good deal. The deaths nearly balance the births, and the mortality of those over 65 is high, being more than half the total.

LURGAN; *Waringstown*.—District healthy. One case of scarlet fever was reported and sent to union hospital.

NEWRY; *Donaghmore*.—Epidemics of measles and influenza.

NEWRY; *Rathfriland*.—Sanitary condition of district good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good; public health good.

NEWTOWNARDS; *Comber*.—The scarlatina epidemic has died out after twelve months. Influenza has been very prevalent during the past three months.

NEWTOWNARDS; *Kilmood*.—A severe epidemic of influenza during the past two months; no deaths registered from it. Only two deaths in district between the ages of 6 months and 72 years. Four cases of scarlatina reported during the quarter, no deaths.

NEWTOWNARDS; *Newtownards, W.*—The general health of the district has been good. There have been some cases of influenza, and at present there is quite a number of cases of measles in the district. The measles is of a mild type. Five urban and two rural cases of scarlatina were notified during the quarter; they all went to hospital, and careful disinfection was carried out. Three urban cases of cerebro-spinal meningitis were notified to me. Two died.

### Fermanagh County.

BALLYSHANNON; *Church Hill*.—Influenza very prevalent, resulting in the deaths of a number of old people. District otherwise healthy.

ENNISKILLEN; *Enniskillen, W.*—The general health of the town is considered good.

ENNISKILLEN; *Florencecourt*.—One death registered at 100 years of age. Sanitary state of district fairly good. Bronchial affections present amongst children.

ENNISKILLEN; *Holywell No. 1*.—The public health of the district is good. With the exception of mumps there has been no epidemic disease.

ENNISKILLEN; *Lisbellaw*.—Sanitary state satisfactory.

ENNISKILLEN; *Tempo*.—Health of district very good.

IRVINESTOWN; *Clonelly*.—Health of the district good. No epidemic during the quarter.

IRVINESTOWN; *Ederney*.—Influenza very prevalent during last two months of quarter.

IRVINESTOWN; *Irvinestown, W.*—Three deaths registered from tuberculosis; of these, two occurred in Rossclare sanatorium. The other case makes three deaths in one family from pulmonary tuberculosis in past few years. In my private practice I had cases of diphtheria in two families.

LISNASKEA; *Derrylin*.—Influenza very prevalent during the quarter.

LISNASKEA; *Lisnaskea, W.*—Majority of deaths was of persons 60 years of age and upwards.

### Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—Scarlet fever has been present off and on all over district for last six months; otherwise conditions are fairly satisfactory.

COLERAINE; *Coleraine, W.*—Measles and whooping-cough very prevalent, also influenza of a severe type. Epidemic of parotitis commencing.

COLERAINE; *Garvagh*.—Influenza of a rather severe type has been very prevalent during the past two weeks; otherwise the health of the district is good.

COLERAINE; *Kilrea*.—District healthy. There was one case of diphtheria, resulting in recovery; but, owing to strict sanitary precautions having been taken, there was no further spread of the disease.

COLERAINE; *Portstewart*.—Whooping-cough and general sickness prevalent amongst children.

LIMAVADY; *Ballykelly*.—Severe epidemic of influenza during quarter, complicated with pneumonia in many cases. Two cases of scarlet fever in district during quarter.

LIMAVADY; *Bellarena*.—Influenza is prevalent throughout the district at present.

LIMAVADY; *Dungiven*.—There was a severe attack of influenza during the quarter, with an abnormal amount of pneumonia as a complication.

LIMAVADY; *Limavady, W.*—There is an outbreak of scarlatina in urban area.

LONDONDERRY; *Eglinton*.—One case of cancer: no family history. Influenza and pneumonia very prevalent during the quarter.

MAGHERAFELT; *Moneymore*.—Death-rate exceeds birth-rate, which seems to be owing to the severity of the winter months, causing many deaths of old people. Measles was prevalent during past month, causing one death. Scarlatina appeared in one family—isolated; no spread of disease. Birth-rate of females double the males.

### Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—One case of diphtheria in urban district, which was first attended a couple of hours before death. Death not yet registered. District in fair sanitary condition.

CARRICKMACROSS; *Raferagh*.—The sanitary condition of the district continues to improve.

CASTLEBLAYNEY; *Ballybay*.—Registration was well attended and up to average. The majority of deaths was of aged persons.

CASTLEBLAYNEY; *Castleblayney, W.*—Numerous cases of influenza with serious complications occurred during the quarter. Among the thirty deaths registered as aged 65 years and upwards, eight were between 79 and 98 years. There were two cases of tuberculosis and three of cancer.

CLONES; *Clones, W.*—There was an epidemic of measles, and a great prevalence of bronchopneumonia amongst children.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is good, with the exception of one village.

COOTEHILL; *Drum No. 1*.—One case of scarlatina has been reported recently.

MONAGHAN; *Castleshane*.—District sanitary. There has been an epidemic of influenza.

MONAGHAN; *Emyvale*.—No epidemic of any kind during quarter. There was a larger number of deaths than usual, particularly amongst old people.

MONAGHAN; *Kilmore*.—There has been a large number of cases of influenza at first of the gastro-intestinal type, but towards the close of the quarter taking the pulmonary form frequently with pneumonia.

MONAGHAN; *Monaghan, W.*—The sanitary condition of the district appears to be satisfactory. There are no special circumstances relating to the public health of the district to which it is necessary to call attention.

### Tyrone County.

CASTLEDERG; *Drumquin*.—The sanitary state of the district is satisfactory, with no infectious disease of any sort during the quarter.

CASTLEDERG; *Killeter*.—District healthy. A good many deaths among old people.

CLOGHER; *Aughnacloy*.—A mild epidemic of scarlatina during quarter; measles, mumps, and influenza also prevalent.

CLOGHER; *Ballygawley*.—Epidemic of measles and mumps during quarter.

CLOGHER; *Fivemiletown*.—The health of the district during the quarter was pretty good. There were some mild cases of influenza.

COOKSTOWN; *Coagh*.—Measles has been prevalent in portion of district during past quarter. Two deaths registered from enteric fever and one from polio-myelitis.

COOKSTOWN; *Cookstown, W.*—There were epidemics of measles and influenza.

COOKSTOWN; *Pomeroy*.—The health of the district is excellent.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Post-influenzal pneumonia very prevalent amongst infants and young children. Three cases of scarlatina and two of diphtheria occurred in my practice, and six cases of scarlatina notified by another medical man.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements in the district good. No infectious diseases.

DUNGANNON; *Coal Island*.—Influenza epidemic during the quarter. With the exception of one case of scarlatina and one of German measles, the district has been free from any further infectious disease.

OMAGH; *Dromore*.—A few cases of measles and influenza occurred; district otherwise healthy.

OMAGH; *Drumquin*.—Whooping-cough was prevalent in the district during the quarter, and occasional cases are still cropping up. There were a few cases of scarlet fever. Sanitary condition of district fair.

OMAGH; *Fintona*.—The health of the district has been very good during the past quarter, and, with the exception of catarrhal influenza, free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh No. 1, W.*—Health of district good. Sanitary condition: urban—fairly satisfactory, rural—no improvement; manure heaps and cesspools contiguous to dwellings and county road; no public interest regarding these conditions. Continued inclemency of weather proved disastrous to the aged and infirm.

OMAGH; *Omagh No. 2*.—No epidemic of any kind. The birth-rate is higher than it has been for years.

OMAGH; *Sixmilecross*.—The district is in very good sanitary condition at present. One case of scarlatina occurred. Of two of the deaths registered during the quarter, one was 90 years, another 93 years.

STRABANE; *Plumb Bridge*.—A small epidemic of measles exists at present; no deaths from this cause.

#### IV. PROVINCE OF CONNAUGHT.

##### Galway County.

BALLINASLOE; *Laurencetown*.—There was a widespread epidemic of influenza this quarter.

CLIFDEN; *Inishbofin*.—The district is in a healthy condition at present.

GALWAY; *Galway No. 3 (Arran)*.—Health of district good.

GALWAY; *Moycullen*.—Of the four deaths registered, three were approaching 90 years, while the fourth was 72 years. The number of births registered during the quarter was seventeen, twelve being about the average.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Spiddle*.—District healthy. One death at 100 years, and one at 90 years were registered.

GALWAY; *Turloughmore*.—District healthy and in good sanitary condition.

GORT; *Gort, W.*—There have been some cases of scarlatina during the quarter.

LOUGHREA; *Bullaun*.—Six of the fourteen deaths registered were of persons aged 79 (3), 82, 83, and 88 years, respectively.

OUGHTERARD; *Cloonbur No. 1*.—Influenza of the gastric type very prevalent.

OUGHTERARD; *Lettermore*.—Influenza is prevalent in this district at present.

OUGHTERARD; *Oughterard, W.*—Sanitary condition of district fair. Widespread epidemics of whooping-cough and influenza now dying out. Whooping-cough caused deaths of four children under four years. Of 20 deaths of people over 65 years, six were due to influenza, one to rodent ulcer, and one to accidental injury to head.

PORTUMNA; *Eyrecourt*.—Influenza and measles have been very prevalent during the quarter.

PORTUMNA; *Portumna No. 1, W.*—The sanitary condition of the district is seemingly fairly good.

TUAM; *Abbey*.—Sanitary arrangements fairly good.

TUAM; *Tuam No. 1, W.*—The health of the district was good during the quarter, but during the month of March a number of children had bronchial attacks.

TUAM; *Tuam No. 2*.—One of the cases of pulmonary tuberculosis was that of a young man who died a month or two after returning from America.

##### Leitrim County.

BAWNBOY; *Ballinamore*.—The sanitary conditions in the district good. No epidemics prevailing.

CARRICK-ON-SHANNON; *Drumshanbo*.—Whooping-cough prevalent during the quarter.

CARRICK-ON-SHANNON; *Jamestown, W.*—Measles and influenza prevalent. One death registered at 100 years.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district have been fairly good during the quarter.

MOHILL; *Rinn*.—The district is healthy and free from epidemics.

##### Mayo County.

BALLINA; *Ballina, W.*—Measles was prevalent during the quarter; four deaths recorded.

BALLINA; *Crossmolina*.—Measles and influenza prevalent during quarter. No cases of any other infectious disease.

BALLINROBE; *Cong*.—Health of district good.

BALLINROBE; *Hollymount*.—Births under the average. There was an epidemic of measles, and many cases of influenza occurred during the quarter.

BELMULLET; *Bangor*.—Public health fairly normal. A number of cases of measles during quarter; no deaths. One case of typhoid fever occurred; removed to hospital and died.

BELMULLET; *Knocknalower*.—An epidemic of measles, the first for fifteen years, occurred in the district during the quarter, and still continues. No deaths have been recorded so far.

CASTLEBAR; *Balla*.—There was an outbreak of measles during the quarter; otherwise the district is healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—An epidemic of measles occurred throughout the entire district. Some few deaths resulted from lung complications.

CASTLEBAR; *Castlebar No. 2*.—The sanitary arrangements in the district are good. An epidemic of measles broke out during the last two months of the quarter. The fatality of same was very low.

CLAREMORRIS; *Ballyhaunis*.—Lung diseases were very prevalent and of exceptional severity, causing many deaths among the aged and debilitated; influenza also prevalent; one case of cancer of stomach. Sanitation progressive.

KILLALA; *Killala, W.*—A severe epidemic of influenza was prevalent in the district during the quarter. The sanitary arrangements in most parts of the district are not satisfactory. Cattle and pigs are housed in many of the dwellings of the small farmers.

SWINEFORD; *Foxford*.—Influenza was epidemic in rather severe form, and often accompanied by symptoms of a trigeminal neuritis. In one fatal case death was due to peripheral neuritis. A dozen cases of lobar pneumonia were noted, none of which proved fatal.

SWINEFORD; *Swineford, W.*—There was a mild outbreak of whooping-cough during past quarter, and three deaths were registered. There was no other epidemic, and the general health of the district was comparatively good.

WESTPORT; *Ballycroy.*—Influenza prevalent during quarter—two types (a) rheumatic, (b) associated with tracheal cough, paroxysmal and very severe. Measles has just invaded district.

WESTPORT; *Islandeady.*—The sanitary arrangements of the district are good. There was a mild epidemic of measles.

WESTPORT; *Louisburgh.*—Sanitary arrangements satisfactory. Lobar pneumonia prevalent during the month of March.

WESTPORT; *Newport.*—This district at present, with the exception of an outbreak of measles, is in fair condition.

WESTPORT; *Westport, W.*—Outbreak of measles during latter part of quarter. Four deaths from tuberculosis registered.

### Roscommon County.

ATHLONE; *Kiltoom.*—A severe epidemic of influenza affecting almost every home was present in district; fortunately no deaths occurred. There was one case of measles.

BOYLE; *Boyle No. 1, W.*—A few cases of influenza occurred during last quarter.

BOYLE; *Keadew.*—Broncho-pneumonia and whooping-cough were prevalent amongst children.

CARRICK-ON-SHANNON; *Aughrim.*—There was no case of infectious disease during the quarter, and no death from tuberculosis.

CASTLEREAGH; *Frenchpark.*—There has been a number of cases of measles latterly. The sanitary condition of one village is very bad.

CASTLEREAGH; *Loughglinn.*—The health of the district has been remarkably good. There was one death from cancer and one from pulmonary tuberculosis.

ROSCOMMON; *Roscommon, W.*—Health of district good.

STROKESTOWN; *Roosky.*—One death from tuberculous pelvic tumour. No death from cancer this time. The bulk of the deaths was of persons whose ages ranged from 70 to 90 years. Influenza was rather prevalent, five deaths being said to have occurred from it.

STROKESTOWN; *Strokestown, W.*—The greater number of deaths registered during the quarter was of persons aged 65 years and upwards.

### Sligo County.

BOYLE; *Gurteen.*—Influenza of a very virulent type was prevalent during the past quarter.

DROMORE WEST; *Easky, W.*—Health of district good.

SLIGO; *Riverstown.*—District healthy and free from zymotic disease.

TOBERCURRY; *Aclare.*—Sanitary arrangements are improved. An epidemic of measles prevailed in the district from which four deaths occurred; it is now subsiding.

TOBERCURRY; *Coolaney.*—Sanitation satisfactory.

1915.]  
2nd Quarter.

[No. 206.]

# QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'  
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;  
Persons Vaccinated, &c., &c., &c.*

*By Authority of the Registrar-General.*

*Price One Shilling.*

**Marriages:—**JANUARY, FEBRUARY, MARCH, 1915.

**Births and Deaths:—**APRIL, MAY, JUNE, 1915

During the quarter ended 30th June last, there were registered in the 831 Registrars' Districts in Ireland 25,660 births—a number equal to an annual birth-rate of 23·4 in every 1,000 of the estimated population\*—and 19,800 deaths, representing an annual rate of 18·1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 2,972 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 22·9 in every 1,000 of the estimated population, and the death-rate 14·9 per 1,000.

The birth-rate in Ireland for the quarter is 1·0 below the average rate for the corresponding quarter of the ten years, 1905–1914, and 0·5 below the rate for the second quarter of 1914. The deaths are 1,384 above those registered in the corresponding quarter of 1914; the death-rate is 1·2 above the rate for that quarter, and 0·3 above the average for the second quarter of the ten years, 1905–1914.

In comparison with those for the corresponding quarter of 1914, the returns of pauperism furnished by the Local Government Board show a decrease of 2,803 in the average number of Workhouse inmates on Saturdays during the quarter, but an increase of 64 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years, 1905–1914, the number of Workhouse inmates shows a decrease of 8,047, and the number of persons on out-door relief shows a decrease of 13,941, the total under both heads being 23·7 per cent. under the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·1 per cent.

\* See page 140.

The annual rate (5·7 per 1,000 of the population) represented by the marriages registered during the first quarter of 1915, is 0·4 below the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,\* represented by the number of MARRIAGES registered during the Quarter ended 31st March, 1915, and by the BIRTHS and DEATHS registered in the Quarter ended 30th June, 1915.

\* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (6,275) registered in Ireland during the first quarter of 1915 are equivalent to an annual rate of 5·7 per 1,000 of the estimated population, being 0·6 below the rate for the corresponding quarter of 1914, and 0·4 below the average rate for the first quarter of the ten years 1905–1914. Of the total number of marriages, 4,965 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,310 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 6·1 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·6 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·5 below, and that under the latter heading 0·2 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1905–1914, and the average number for that period, also the number registered in the first quarter of 1915.

### BIRTHS.

The number of births registered during the quarter ended 30th June last was 25,660—13,109 boys and 12,551 girls—being equal to an annual ratio of 1 in every 42.7, or 23.4 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1905–14, was 26,705, equivalent to an annual rate of 24.4 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 24.4 per 1,000 of the population according to the Census of 1911; Munster, 22.5; Ulster, 23.9; and Connaught, 21.6.

The highest county or county borough birth-rate\* is 32.0 for Dublin county borough, and the lowest 17.7 for Dublin county. Of the intermediate rates the highest five are—Belfast county borough, 26.8; Limerick county and county borough, 25.4; Kerry, 25.2; Longford, 24.8; and Londonderry county and county borough, 24.7. The lowest five are—Leitrim, 18.7; Carlow, 19.6; Roscommon, 19.6; Sligo, 20.0; and Clare, 20.1.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 19,800—10,026 males and 9,774 females—affording an annual ratio of 1 in every 55.3, or 18.1 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1905–14, was 17.8 per 1,000.

The death-rate in Leinster was 19.3 per 1,000 of the population according to the Census of 1911; in Munster, 17.1; in Ulster, 18.3; and in Connaught, 16.7.

The county or county borough death-rates\* range from 14.8 in Kerry to 22.7 in Dublin county borough. Between these rates the lowest five are—Queen's, 15.3; Clare, 15.3; Tipperary, N.R. 15.6; Meath, 15.8; and Roscommon, 16.1; and the highest five are—Down, 20.0; Monaghan, 20.0; Londonderry county and county borough, 19.7; Louth, 19.2; and Wexford, 19.1.

\* See note (\*) on page 78.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1905–1914, and the average number for that period; also the number registered during the first and second quarters of the year 1915:—

1915, .. ..	23·5	23·4	—	—	—	22·1	18·1	—	—	—

AGES.—Of the 19,800 deaths registered last quarter, 2,128, or 10·7 per cent., were of infants under one year of age; and 8,273, or 41·8 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 82·9 per 1,000 of the births registered. In the province of Leinster the number of deaths of infants under one year old equalled 12·2 per cent. of the total deaths registered therein; in Munster, 9·3 per cent.; in Ulster, 11·8 per cent.; and in Connaught, 7·1 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37·1 per cent.; in Munster, to 43·3 per cent.; in Ulster, to 40·6 per cent.; and in Connaught, to 52·7 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases\* is 740, and is equivalent to an annual rate of 0·68 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the June quarter of 1915, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1910–1914.

Name of Disease.	Number of Deaths in June quarter, 1915.	Average number of Deaths in June quarter of the 5 years, 1910–1914.
Enteric Fever, .. ..	45	54
Typhus, .. ..	6	15
Small-pox, .. ..	—	—
Measles, .. ..	170	287
Scarlet Fever, .. ..	77	65
Whooping-cough, .. ..	179	240
Diphtheria, .. ..	68	75

\* See note (†) on page 85.

**ENTERIC FEVER.**—The deaths from enteric fever, which numbered 75, 80, and 60 respectively in the three preceding quarters, fell to 45 in the quarter ended 30th June, 1915. The latter number is 9 below the average for the corresponding quarter of the 5 years 1910-1914, and represents an annual rate of 0·04 per 1,000 of the population. Of these 45 deaths, 7 took place in Cork union, or superintendent registrar's district, 4 in each of Dublin South and Armagh, and 3 in each of Londonderry and Loughrea.

**TYPHUS.**—There were only 6 deaths from this disease during the quarter, one death having occurred in each of the unions of Ballinrobe, Cahersiveen, Carrickmacross, Clogheen, Dingle, and Millford. In the three preceding quarters the number of deaths were 5, 12, and 17 respectively, and the average for the June quarter in the 5 years 1910-1914 was 15.

**SMALL-POX.**—There was no mortality from small-pox.

**MEASLES.**—During the quarter, 170 deaths (equal to an annual rate of 0·16) from measles occurred, as compared with 167, 159, and 174 respectively in the three preceding quarters and an average of 287 in the second quarter of the past 5 years. Fifty-three deaths occurred in Belfast union, 21 in Rathdown, and 17 in Lurgan. Only 6 deaths were registered in the province of Munster during the quarter.

**SCARLET FEVER.**—To this disease 77 deaths (equivalent to an annual rate of 0·07) were ascribed, 38 of these having taken place in Ulster and 30 in Munster, whereas only 8 took place in Leinster and one in Connaught. The unions with the highest number of deaths were Waterford 15 deaths, Lisburn 13 (8 of which belonged to Belfast county borough), Newtownards 6, and Dublin South and Cootehill 3 each. In the three preceding quarters the deaths in Ireland numbered 75, 166, and 104 respectively, and the average for the June quarter of the five years 1910-1914 was 65.

**WHOOPING-COUGH.**—During the quarter 179 deaths from whooping-cough were registered, affording an annual rate of 0·16 per 1,000 of the population. This mortality compares favourably with that for the previous quarter, when 271 deaths were registered, and is also considerably below the average for the second quarter of the past 5 years, viz., 240. Of the unions in which the deaths took place, Belfast has the greatest number with 37 deaths, Dublin South comes next with 36, and then follow Dublin North with 17, Londonderry 11, Cork 8, and Naas and Coleraine 6 each.

**DIPHTHERIA.**—The number of deaths registered as from this cause in the quarter under review, viz., 68, is somewhat lower than the average (75) for the corresponding quarters in the last five years, and is considerably less than that for the two previous quarters, when 100 and 93 deaths, respectively, were registered. Eleven deaths took place in the Dublin South Union, 7 in Dublin North, 5 in Lisburn (4 of the 5 belonging to Belfast county borough), 4 in Cork, and 3 in each of Belfast and Middleton.

**DIARRHOEAL DISEASES.**—In 188 cases the cause of death was returned under this heading, 151 being from diarrhoea and enteritis of children under two years of age. This latter number represents an annual rate of 0·14 per 1,000 of the population.

**TUBERCULOUS DISEASE.**—An increase is shown in the number of deaths returned by the Registrars as having been caused by tuberculous disease, 2,718 being registered in the quarter under notice as compared with an average of 2,686 in the corresponding quarter of the last five years. The former number represents an annual rate of 2·48 per 1,000 of the population, which is higher than that for any of the three previous quarters, when the numbers and rates were:—September quarter, 1914, 2,041 and 1·86; December quarter, 1914, 2,005 and 1·83; and March quarter, 1915, 2,483 and 2·27.

**CANCER.**—Cancer caused 842 deaths, as against an average of 829 in the corresponding quarter of the five preceding years. The 842 deaths represent an annual rate of 0·77, as compared with 0·80, 0·81, and 0·80 respectively in the three previous quarters.

**CEREBRO-SPINAL FEVER.**—The following are extracts from Registrars' notes with reference to this disease:—

**NAVAN; Painestown.**—One death registered as caused by cerebro-spinal meningitis. No other case of this disease known or heard of in this or neighbouring districts.

MULLINGAR : *Mullingar*.—There was one death the result of exhaustion after recovery from cerebro-spinal meningitis.

LISMORE ; *Cappoquin*.—One case of cerebro-spinal fever.

ANTRIM ; *Antrim*.—Four cases of cerebro-spinal fever. One death.

ANTRIM ; *Randalstown*.—Cases of cerebro-spinal meningitis reported during the quarter.

LARNE ; *Carrickfergus*.—One death from cerebro-spinal fever, child aged two years.

LISBURN ; *Dunmurry*.—There has been one case of cerebro-spinal meningitis.

LISBURN ; *Knocknadona*.—Three cases of cerebro-spinal meningitis occurred and were sent to hospital. One recovered.

LISBURN ; *Lisburn*.—Two deaths were due to cerebro-spinal meningitis, both being from other districts.

LURGAN ; *Lurgan No. 1*.—Two cases of cerebro-spinal meningitis occurred in the urban district towards the end of the March quarter ; both died, one after removal to Purdysburn hospital and the other to workhouse infirmary. In each case death occurred within 48 hours from the onset of the disease.

BELFAST ; *Belfast Urban No. 12*.—One death from cerebro-spinal meningitis.

CAVAN ; *Bellananagh*.—Two cases of cerebro-spinal fever occurred in young children. Both died in hospital.

OUGHTERARD ; *Oughterard*.—One case of epidemic cerebro-spinal meningitis ended in death.

The Registrars, in their Notes, report the presence of the following diseases :—Enteric fever in 7 districts, typhus in 2, measles in 48, scarlet fever in 46, whooping-cough in 21, diphtheria in 15, mumps in one, German measles in one, influenza in 21, and cerebro-spinal fever or cerebro-spinal meningitis in 13. [See Appendix to this Report commencing on page 141.]

INQUESTS.—There were 436 inquests reported to the Registrars during the quarter ; this number being equal to one in every 45 of the total deaths registered.

In Leinster there was one inquest to every 39 deaths registered, in Munster one to 58, in Ulster one to 38, and in Connaught one to 106.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 19,800 deaths registered, 4,067, or 20·5 per cent., occurred in public institutions. In Leinster the percentage was 28·7, in Munster 24·8, in Ulster 14·7, and in Connaught 11·8.

UNCERTIFIED DEATHS.—According to the returns, 4,622 of the 19,800 deaths which were registered during the quarter were uncertified, being 23 per cent. of the total. In Leinster the percentage was 16, in Munster 25, in Ulster 19, and in Connaught the uncertified deaths were 49 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1915, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.

---

**TABLE V.—URBAN DISTRICTS.**

---

## URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 18·6, and the birth-rate 26·9 per 1,000 of the population; in the remainder of the country the death-rate was 17·8 and the birth-rate 21·7 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 1·2 per 1,000 of the population; in the remainder of the country the rate was 0·4 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1915, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †, from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-six Urban Districts marked thus (\*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 3rd July, 1915.

## VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1915, there were 30,482 persons successfully vaccinated.

## EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th June last was 2,972 (1,830 males and 1,142 females), being 7,280 less than in the corresponding quarter of the year 1914, and 10,897 below the average number for the second quarter of the ten years 1905–1914.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1914 and 1915 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.

June, .	769	770	1	—	691	353	—	338	1,460	1,123	—	337
TOTAL,	5,153	1,830	1	3,323	5,099	1,142	—	3,957	10,252	2,972*	—	7,280

\* Including 2,200 emigrants to the United States of America, viz. :—524 in the month of April, 805 in May, and 871 in June. Of 2,183 steerage passengers, 145 had their passages paid for in America.

## PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was  $7\frac{3}{4}d.$ , which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited), bread, delivered. In the second quarter of the year 1914 the average price for both firms was  $6d.$ , and in the corresponding quarter of 1905 it was also  $6d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 21s. per cwt. For the corresponding quarter of the year 1914 the average price was 16s., and for the first quarter of 1905 the average price was 14s.  $6d.$  per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4s.  $0d.$  to 5s.  $1d.$  In the second quarter of 1914 the average prices were 2s.  $10d.$  to 3s.  $7d.$ , and the prices for the corresponding quarter of 1905 were 2s.  $3d.$  to 3s.  $2d.$

The average price per cwt. of beef at the Dublin Cattle Market was 57s.  $6d.$  to 91s.  $6d.$ , as against 48s.  $6d.$  to 64s. for the second quarter of 1914, the price for the second quarter of 1905 ranging from 52s. to 55s.  $6d.$

The price (including cartage) of Whitehaven coal in the City of Dublin was 31s. per ton nett.

The Dublin Stock Exchange, which had been closed owing to the financial situation created by the European war, was re-opened in January of last quarter. The minimum price of Consols was then fixed by the Treasury at £68½. This was lowered to £66½ on 19th March, and again to £65 on 23rd June, at which figure it remained to the end of the quarter.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which was 4 per cent. on 1st July, 1914, was raised to  $4\frac{1}{2}$  per cent. on 30th July, and to 10 per cent. on 1st August, falling to 6 per cent. on 6th August, and to 5 per cent. on 8th August. There has been no alteration in the rate from that date to the close of the second quarter of 1915.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1915 was 32,687 or 2,803 below the average for the corresponding period in 1914.

The average weekly number of persons receiving out-door relief during the quarter was 37,919, being 64 above the average for the second quarter of 1914.

Of the persons receiving in-door relief during the second quarter of 1915, an average number of 1,651 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1914 the average weekly number was 1,690.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1915, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.  
(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.  
NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the second

\* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1910 to 1915, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 90).

The mean height of the barometer during the second quarter of 1915 was 30·061 inches, being 0·166 above the average for the corresponding quarter of the five years 1910–1914; the highest reading (30·481 inches) was on the 9th May, at 9 P.M., and the lowest (29·109 inches) on the 6th April, at 9 P.M.

The mean temperature of the air during the quarter was 49·8°, being 0·7° below the average for the second quarter of the 5 years, 1910–1914.

The maximum temperature of the air during the quarter was 68·8° and the minimum 27·9°. The maximum heat in sun was 126·9°.

Rain fell on 43 days during the quarter. The rain-fall measured 4·709 inches being 1·439 inches below the average for the second quarter of the five years, 1910–1914. The greatest monthly rainfall was in April, when 1·630 inches were registered.

*April.*—The mean height of the barometer during this month was 30·069 inches; the highest reading (30·442 inches) was on the 27th, at 9 A.M.; and the lowest (29·109 inches) on the 6th, at 9 P.M. The mean temperature of the air was 46·1°, the maximum registered was 59·7°, and the minimum 28·4°. The 1st was the warmest day, and the 2nd the coldest night. The mean of the dry bulb was 45·8° and of the wet bulb, 43·7°. The maximum heat in the sun was 115·1°, and the minimum on the grass 25·1°. The total amount of sunshine recorded was 178·9 hours, the greatest daily amount being 13·1 hours on the 28th. The minimum on the grass was below 30° on 5 nights. The maximum ozone was 1·0, the minimum 0·2, and the mean 0·6. Rain or snow fell on 19 days. The rain-fall measured 1·630 inches; the greatest amount in 24 hours was 0·205 inch on the 30th.

*May.*—The mean height of the barometer during this month was 30·076 inches; the highest reading (30·481 inches) was on the 9th, at 9 P.M., and the lowest, (29·669 inches) on the 17th, at 9 A.M. The mean temperature of the air was 48·6°, the maximum registered was 68·0°, and the minimum 27·9°. The 28th was the warmest day, and the 3rd the coldest night. The mean of the dry bulb was 48·8°, and of the wet bulb 46·9°. The maximum heat in sun was 123·2°, and the minimum on the grass 25·1°. The total amount of sunshine recorded was 210·5 hours, the greatest daily amount being 14·3 hours on the 24th. The minimum on the grass was below 30° on 5 nights. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·5. Rain fell on 12 days. The rain-fall measured 1·595 inches; the greatest amount in 24 hours was 0·650 inch on the 17th.

*June.*—The mean height of the barometer during this month was 30·039 inches; the highest reading (30·293 inches) was on the 12th at 9 P.M., and the lowest (29·726 inches) on the 29th, at 9 A.M. The mean temperature of the air was 54·6°, the maximum registered was 68·8°, and the minimum 31·9°. The 30th was the warmest day, and the 20th the coldest night. The mean of the dry bulb was 55·9°, and of the wet bulb 53·8°. The maximum heat in sun was 126·9°, and the minimum on the grass 29·1°. The total amount of sunshine recorded was 198·1 hours, the greatest daily amount being 14·7 hours on the 15th and 20th. The minimum on the grass was below 30° on one night. The maximum ozone was 1·0, the minimum 0·1, and the mean 0·6. Rain fell on 12 days. The rain-fall measured 1·484 inches; the greatest amount in 24 hours was 0·500 inch.

## METEOROLOGY.

[Prepared in the Meteorological Office under the direction of Sir Napier Shaw, F.R.S.]

APRIL.—For the month generally the mean temperature exceeded the average, while the rainfall and the duration of bright sunshine were deficient.

*Temperature.*—After about a fortnight of unsettled and rather cold weather there was a week of relatively fair and dry conditions, and although the temperature subsequently was never very low and the rain never heavy there was no marked increase in warmth until the month drew to its close, when readings between  $67^{\circ}$  and  $70^{\circ}$  became common. On rare occasions during the month the minimum temperature during the night was a little below the freezing point, the lowest reading recorded being  $28^{\circ}$  at Kilkenny on the 1st and at Phoenix Park on the 23rd. In the northern meteorological district the mean temperature was  $46.3$ , being  $0.7^{\circ}$  above the normal, and in the southern  $48.1$ , or  $1^{\circ}$  above the normal, while in both districts the mean diurnal range was about  $12.5$ .

*Rainfall.*—The total amount of rainfall for the month was below the average, but while in the North the fall was 57 mm., only 3 mm. below the average, in the South it was no more than 47 mm., showing a deficit of 20 mm. A measurable quantity fell on 19 days in the North and on 18 in the South, but the greater part of the total fall occurred between the 3rd and 10th, when the general level of the barometer was low, and the wind sometimes reached the force of a gale from between the south-west and north-west. After the 10th a decided rise of the barometer was accompanied by drier weather, while the wind became light from north-west and west, and finally from some easterly point. With the east wind late in the month the weather was rainless. The total number of days with rain did not differ materially from the normal, but on most occasions the amounts were slight, and falls of 13 mm. or above within 24 hours were very seldom recorded in any part of the country.

*Bright Sunshine.*—The mean daily duration was 4.5 hours in both the north and south, and below the normal. In the north the deficiency was 0.3 hour, and in the south as much as 0.8 hour. In both districts the percentage of the possible duration was 33. The only exceptionally bright weather accompanied the easterly wind towards the end of the month, but the sunshine duration also exceeded the normal during the unsettled period from the 6th to the 10th. The relatively dry fortnight after the 10th was generally very cloudy, the mean daily deficiency of sunshine being as much as 2 hours.

MAY.—The weather of May was unusually dry, and the wind almost continuously from some easterly or north-easterly point, while the temperature was generally above the normal except during the second week, and sunshine abundant during the second week only.

*Temperature.*—For the month as a whole the mean temperature was  $49.6^{\circ}$  in the northern, and  $52.6^{\circ}$  in the southern district, the former value being nearly a degree below the average and the latter about the same amount above it. The lowest readings occurred about the middle of the month. In most localities the value was some degrees above freezing point, but at Markree Castle and at some stations in the north-east of the country the thermometer fell a few degrees below it. Maximum readings of  $70^{\circ}$  or a little higher were recorded from time to time after the first week, but on the 22nd, 23rd, and 24th they were general over a wide area. At Newtownforbes the thermometer rose to  $75^{\circ}$  and at Killarney to  $76^{\circ}$ . The mean temperature for the warmest part of the country, the south-west coast of Kerry, was about  $54^{\circ}$ , or  $6^{\circ}$  above that in the coldest region—the neighbourhood of Donaghadee.

*Rainfall.*—Over Ireland generally the total amount of rainfall was only 62 per cent. of the average, while in several localities it was lower. At Blacksod, for example, the percentage was only 32 per cent., and at Birr only 21 per cent. At this latter station the aggregate fall was only 12 mm. Except for a period after the middle of the month the weather was nearly or quite rainless. In the north the total fall was 27 mm., divided between 9 days, a deficit of 35 mm. In the south there was 46 mm., divided between 12 days. This latter value was only 18 mm. less than the average.

*Bright Sunshine.*—Although the general condition of the weather was so dry it was seldom very bright, and during the greater part of the month the daily duration of sunshine was below the average. After the 22nd, however, an exceptionally bright period was experienced during which the mean daily duration exceeded 11 hours over the country as a whole, and in some places was more than 12 hours. As a result of this the mean daily amount for the north was 6·44 hours, or 0·37 hour per day in excess of the normal, but in the south, where the mean daily duration was 6·22 hours, there was a deficit of 0·29 hour per day. All through the period the north was more sunny than the south.

**JUNE.**—During the month as a whole the weather was very dry, the rainfall only amounting to 73 per cent. of the average. The temperature was slightly above the average, and, as in the preceding month, bright sunshine was more abundant in the north than in the south.

*Temperature* was mostly above the average during the first 18 days, but subsequently rather low for the time of year. In the north the mean was 55·1° and in the south 57·3°, the difference from the normal being 0·4° in both districts.

*Rainfall.*—Although the number of days with rain was not far below the normal the total fall was extremely slight. In the north the value was 50 mm., and in the south 47 mm., both figures being 17 mm. below the average. The number of days with rain ranged from 8 at Donaghadee on the most north-eastern coast to 18 on the extreme south coast. During the second and third weeks rain was seldom seen in any part of the country.

*Bright Sunshine.*—In its general character the duration of sunshine resembled that of May. All through the month, after the first few days, it was more prevalent in the north than in the south, and the daily mean duration was 0·5 per day greater in the north. Except for some days early in the month and towards its close the amount of bright sunshine was unusually abundant. In the north the mean daily amount was 6·90 hours, a figure as much as 1·25 hour in excess of the normal. In the south the daily mean was 5·85 hours, or 0·33 hour less than the normal.

#### *The Quarter.*

For the whole quarter the temperature in the north was 50·3°, a value just equal to the average, but in the south it was 52·7°, or 1° above it. In the north the total fall of rain was 134 mm., which is the lowest aggregate for the second quarter on record, and only 69 per cent. of the normal quantity. In the south the fall was 140 mm., a value lower than in any preceding second quarter except that of 1914. The mean daily duration of bright sunshine for the quarter was 6 hours in the north and 5·5 hours in the south. The former value is lower than that of 1911, but with that exception it is a record for the second quarter.

---

ABSTRACTS I., II., III., IV.

---

**MARRIAGES** Registered during the Quarter ending 31st March, 1915, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th June, 1915; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS, INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER of UNCERTIFIED DEATHS Registered during the Quarter ending 30th June, 1915, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

# ABSTRACT I.—PROVINCES AND COUNTIES.

\* Including accidental deaths, homicides, and suicides.  
† The Returns for Killough District in Tullamore Union, for Newmarket District in Ennis Union, for Brosna No. 1 District in Tralee Union, and for Brideswell District in Athlone Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1914 have been adopted.  
‡ Boundaries altered as from 1st April, 1915, by the transfer of a portion of the Registrar's District of Portlough, in the Union of Coleraine and County of Londonderry, to the Registrar's District of Portlough, in the Union of Ballymoney and County of Antrim.

\* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispersary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked (+) on pages 105 and 106 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 3rd April, 1915, to 3rd July, 1915. With the exception of 169 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these

districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased persons from tenancies outside the Dublin Registration Area, the tenants in public institutions in these

NOTE.—This table has been constructed for the year 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915.—In the exceptional circumstances of the present year the estimate of population for 1914 is still in use.

## APPENDIX.

### REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

#### I.—PROVINCE OF LEINSTER.

##### Carlow County.

CARLOW; *Bagenalstown*.—Influenza was prevalent during the quarter.

CARLOW; *Carlow*, No. 1, W.—District very healthy during quarter. Sanitation of urban area is being steadily improved.

CARLOW; *Fennagh and Myshall*.—Four cases of scarlet fever occurred in one house. The cases having been removed to hospital, there was no further outbreak. Nine of the ten deaths were over seventy years.

CARLOW; *Leighlinbridge*.—Health of district fairly good. Some cases of mild scarlet fever. More recently German measles. Quarter harsh, dry, and cold, with severe frosts in May and June, which injured potatoes in places.

##### Dublin County.

BALROTHERY; *Lusk*.—Measles of a mild type very prevalent during the quarter.

CELBRIDGE; *Rathcoole*.—Measles of a mild form in Saggart district. Two cases (mild) scarlatina.

DUBLIN, SOUTH; *Donnybrook*, No. 1.—District healthy.

RATHDOWN; *Blackrock and Stillorgan*, No. 2.—District very healthy during the quarter.

RATHDOWN; *Kingstown*, No. 1.—The health of the district is now very satisfactory, the epidemic of measles has entirely cleared off. With this outbreak was associated a very severe form of laryngitis.

##### Dublin County Borough.

DUBLIN SOUTH; *New Kilmainham*.—The sanitary condition of my district is very good; there has been no serious epidemic in the district.

##### Kildare County.

ATHY; *Castledermot*.—Mild epidemic of measles.

ATHY; *Monasterevin*.—The sanitary condition very good.

BALTINGLASS; *Baltinglass*, No. 2.—Whooping-cough and measles prevalent during the quarter.

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—Influenza prevalent in early part of quarter, also whooping-cough.

NAAS; *Ballymore Eustace*.—The district is healthy.

NAAS; *Naas and Carragh*, W.—An epidemic of measles occurred in the urban district, also whooping-cough in urban and rural district; otherwise no prevailing disease.

##### Kilkenny County.

CALLAN; *Callan*, W.—One death from tuberculosis and one from carcinoma.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Piltown*.—Sanitation of district in excellent condition.

CASTLECOMER; *Ballyragget*.—The district is in good sanitary condition and free from all infectious disease.

KILKENNY; *Freshford*.—Some cases of influenza with remarkably high temperatures.

KILKENNY; *Gowran*.—The sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin*.—There were two deaths registered during past quarter from tuberculosis, and one from cancer of colon.

KILKENNY; *Tullaroan*.—Health of district remains good.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District very healthy.

THOMASTOWN; *Knocktopher*.—There was one case of diphtheria in quarter just ended, otherwise district in a very healthy condition.

URLINGFORD; *Balleen*.—Public health fairly satisfactory.

URLINGFORD; *Urlingford*, W.—Health of district good. No epidemics.

**King's County.**

BIRR; *Banagher*.—There was an epidemic of measles during the quarter. Four deaths occurred.

BIRR; *Birr, W.*—One death 100 years of age.

BIRR; *Frankford*.—The district is at present in a healthy condition.

BIRR; *Kinnitty*.—In June, 1915, there was an epidemic of scarlet fever in Kinnitty of a very mild type. The sanitary condition of the district is good. Of the six deaths in the quarter, the ages of three were as follows:—85, 89, and 92 years.

MOUNTMELICK; *Clonygowan, No. 2.*—Health of district good.

ROSCREA; *Roscrea, No. 2.*—District very healthy.

ROSCREA; *Shinrone*.—Sanitary arrangements fairly good.

TULLAMORE; *Clara*.—Sanitary arrangements good.

TULLAMORE; *Phillipstown*.—District healthy, no deaths from contagious diseases; two from tuberculosis, one non-certified cancer, all of old origin.

TULLAMORE; *Tullamore, W.*—District fairly healthy, but a great number of old people succumbed during quarter.

**Longford County.**

BALLYMAHON; *Abbeyskrule*.—Sanitary arrangements fair.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory. Rheumatism in its various forms was very prevalent in the district.

GRANARD; *Ballinalee*.—The sanitary condition of the district is fair. District free from contagious disease.

GRANARD; *Granard, W.*—The sanitary condition of the district is good. District free from contagious disease.

GRANARD; *Scrabby, No. 2.*—Health of the district fairly good; one case of enteric fever occurred during the quarter, source unknown.

LONGFORD; *Killashee*.—Influenza was prevalent in early part of the quarter. Health of the district is very good at present.

**Louth County.**

ARDEE; *Castlebellingham*.—Influenza prevalent during quarter, otherwise district healthy.

DUNDALK; *Barronstown*.—District healthy.

DUNDALK; *Dromiskin*.—District in a healthy state.

DUNDALK; *Dundalk, W.*—District very healthy.

**Meath County.**

ARDEE; *Collon, No. 2.*—District in a very healthy condition; free from all epidemics.

ARDEE; *Drumcondra*.—District free from all zymotic diseases.

DROGHEDA; *St. Mary's*.—The sanitary arrangements are good.

DUNSHAUGHLIN; *Ratoath, W.*—Sanitary arrangements very good.

KELLS; *Nobber*.—This is the largest quarterly birth-rate for over a decade of years with a predominance of the gentler sex, the numbers being 12 males and 19 females. The death-rate has been the lowest for a like period. The district consequently holds a conspicuous position as a healthful one.

NAVAN; *Castletown*.—The district is remarkably healthy.

NAVAN; *Painestown*.—District healthy. One death registered as caused by cerebro-spinal meningitis. No other case of this disease known or heard of in this or neighbouring districts.

OLDCASTLE; *Oldcastle, W.*—District continues healthy.

TRIM; *Trim, W.*—The district is free from epidemic disease.

**Queen's County.**

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in district are good.

CARLOW; *Carlow, No. 2.*—District free from disease.

MOUNTMELICK; *Clonygowan No. 1.*—Health of district good.

MOUNTMELICK; *Mountrath*.—District in very healthy condition.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

**Westmeath County.**

BALLYMAHON; *Ballymore*.—Health of district good.

DELVIN; *Clonmellon*.—Sanitation satisfactory in the district.

MULLINGAR; *Ballynacarrigy*.—The death-rate during the month of May was abnormally great.

MULLINGAR; *Castletown Geoghegan*.—The district is in a good sanitary condition, and free from zymotic disease.

MULLINGAR; *Milltown*.—A new danger to the health of the people, and one that has originated tuberculosis in a family always free from this disease is too small a dwellinghouse for the family living in it. No matter how a dwellinghouse is kept if the cubic space is not sufficient for the people occupying it, disease of some form or other is the result. Emigration satisfactory. The rush for America and the numerous "American Wakes" were conspicuous by their absence this Spring. District healthy and free from zymotic disease.

MULLINGAR; *Mullingar, W.*—There was one death, the result of exhaustion after recovery from cerebro-spinal meningitis. Health of district good.

TULLAMORE; *Kilbeggan*.—Sanitation continues good, epidemic disease absent. Health of district, on the whole, extremely good.

**Wexford County.**

ENNISCORTHY; *Killann*.—Number of cases of epidemic pneumonia.

GOREY; *Camolin*.—The district continues healthy. No epidemic during quarter.

GOREY ; *Killenagh and Wells*.—District healthy.

NEW ROSS ; *Fethard, No. 1*.—Sanitary condition of the district satisfactory.

NEW ROSS ; *New Ross, W*.—District healthy.

WEXFORD ; *Bannow*.—The health of the district continues satisfactory.

### Wicklow County.

BALTINGLASS ; *Baltinglass, No. 1, W*.—Some cases of measles and whooping-cough in the district.

BALTINGLASS ; *Kiltegan*.—Health of district good.

NAAS ; *Blessington*.—Measles and whooping-cough prevalent during the quarter ; one death registered at the age of 90 years.

RATHDOWN ; *Delgany*.—Health of district very good.

RATHDOWN ; *Powerscourt*.—District healthy during quarter. Measles outbreak, 10 cases.

RATHDRUM ; *Annamoe*.—District healthy during quarter.

RATHDRUM ; *Newcastle*.—The health of the district is good.

## II. PROVINCE OF MUNSTER.

### Clare County.

BALLYVAGHAN ; *Ballyvaghan, W*.—Health of district good. Sanitary arrangements good, except in one town.

CORROFIN ; *Corrofin, W*.—With the exception of sporadic cases of influenza, district exceedingly healthy.

ENNIS ; *Crusheen*.—Health of the district satisfactory.

ENNIS ; *Killaniv*.—The health of the district is satisfactory. Condition of the poor improving.

ENNISTIMON ; *Ennistimon, W*.—The sanitary arrangements are satisfactory.

ENNISTIMON ; *Milltown Malbay*.—The district is in a fairly healthy condition.

KILLADYSERT ; *Labasheeda*.—The health of the district continues good.

KILRUSH ; *Carrigaholt*.—Health of the district continues very good.

KILRUSH ; *Kilkee*.—The sanitary state of district is good, but in the town of Kilkee a good many houses are still unconnected with the new sewerage system.

LIMERICK ; *Bridgetown*.—District healthy. Sanitary condition of the district improving.

SCARRIFF ; *Mountshannon, W*.—District continues in a healthy state.

SCARRIFF ; *Quin*.—Condition of the district healthy.

### Cork County and County Borough.

BANDON ; *Innishannon*.—District healthy. Ages of uncertified deaths—81 (sudden death), 88, 75 and 86 years.

BANDON ; *Templemartin*.—There is a mild epidemic of pertussis.

BANTRY ; *Bantry, W*.—Sanitary condition of district is fairly good.

BANTRY ; *Durrus and Kilcrohane*.—The sanitary arrangements of the district are in an exceptionally good condition taken as a whole.

BANTRY ; *Kealkill*.—District healthy.

CASTLETOWN ; *Kilcatherine*.—District healthy. One case of carcinoma.

CORK ; *Blarney*.—Two cases of scarlatina and one of measles during the quarter. District otherwise healthy.

CORK ; *Carrigaline, No. 1*.—District healthy.

CORK ; *Carrigaline, No. 2*.—The district is very healthy.

CORK ; *Carrignavar*.—District very healthy.

CORK ; *Dripsey*.—There were three cases of scarlet fever and three of diphtheria during the quarter. The sanitary condition of the district is good.

CORK ; *Queenstown, No. 2*.—Health of district satisfactory.

DUNMANWAY ; *Coolmountain*.—The district is in a very healthy state.

DUNMANWAY ; *Dunmanway, W*.—A rather widespread epidemic of measles prevailed in the district during the quarter. Three deaths were registered under tubercle ; one case, however, was not medically attended, and therefore indefinite. One death was certified cancer of the stomach.

KANTURK ; *Kanturk, W*.—Several cases of scarlatina have occurred throughout the district during the quarter.

KANTURK ; *Milford*.—There were seven deaths from pulmonary tuberculosis.

KINSALE ; *Ballyfeard*.—Health of district fairly good. Four deaths from tuberculosis.

MACROOM ; *Clonmoyle*.—Scarlet fever is reported to be very prevalent in the district. I was called only to four cases ; these I isolated or got removed to fever hospital, and had their houses disinfected.

MALLOW ; *Ballyclogh*.—Whooping-cough prevalent, district otherwise healthy.

MALLOW ; *Buttevant*.—Scarlatina was prevalent during the latter part of the quarter.

MALLOW ; *Rahan*.—District healthy. No infectious disease during past quarter.

MIDDLETON ; *Cloyne*.—Whooping-cough is prevalent in the district ; also some cases of diphtheria, and one case of measles occurred during the quarter.

MIDDLETON ; *Middleton, No. 2*.—The health of this district has been very good, except for an outbreak of whooping-cough during the quarter.

MILLSTREET ; *Cullen*.—Influenza has been prevalent during the quarter.

MITCHELSTOWN ; *Kildorrery*.—Mumps was prevalent during past quarter amongst children of school-going age, but a few adults were also affected.

MITCHELSTOWN ; *Mitchelstown No. 1, W*.—Cases of enteritis and gastro-enteritis were very frequent during the month of May. One case of scarlatina.

SKULL ; *Goleen*.—Health of district very good

**Kerry County.**

CAHERSIVEEN; *Caher, W.*—Sanitary condition of the district good.

CAHERSIVEEN; *Darrynane.*—During the quarter I have registered the death of a female whose age (104 years) was well authenticated.

CAHERSIVEEN; *Emlagh.*—District healthy. Great improvement in sanitation.

CAHERSIVEEN; *Glanbehy.*—Sanitary state of district good.

CAHERSIVEEN; *Valencia.*—Sanitary arrangements in the district good. The district is clear of all of the diseases mentioned in the abstracts.

DINGLE; *Anascaul.*—The district is healthy.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—District healthy.

KENMARE; *Tuosist.*—District very healthy. Senile decay usual cause of death.

KILLARNEY; *Coom.*—District healthy during quarter.

KILLARNEY; *Killarney, No. 1, W.*—District very healthy during quarter.

KILLARNEY; *Killorglin.*—Whooping-cough is still present in the district, but complications are less numerous and severe than they were during first quarter. Otherwise district is healthy, except for about the average number of tubercular cases.

KILLARNEY; *Molahiffe.*—Five deaths from tuberculosis have been registered during the quarter. In each case the premises where the disease existed have been disinfected and lime washed.

LISTOWEL; *Ballyhorgan.*—The district is in a good sanitary condition. There was one case of scarlatina.

The patient was removed to hospital and ultimately recovered.

LISTOWEL; *Listowel, W.*—An epidemic of enteric fever occurred in the urban district in the beginning of June, forty cases having been admitted to hospital.

LISTOWEL; *Tarbert.*—Thirty-one births were registered during last quarter, of which twenty-one were male births and ten female births, so that the males more than doubled the females.

TRALEE; *Castlemaine.*—District healthy.

TRALEE; *Kilgobban.*—The district is healthy.

**Limerick County and County Borough.**

CROOM; *Castletown.*—Sanitary arrangements good. One case of diphtheria.

KILMALLOCK; *Bruff.*—The district is healthy. The sanitary condition is fairly good.

KILMALLOCK; *Bruree.*—District healthy. There were two cases of measles.

KILMALLOCK; *Hospital.*—District healthy.

KILMALLOCK; *Kilfinnane.*—District healthy.

KILMALLOCK; *Kilmallock, W.*—District healthy. No zymotic disease.

LIMERICK; *Annacotty.*—Sanitary arrangements good, district healthy.

LIMERICK; *Caherconlish.*—District healthy. There were a few cases of scarlet fever. Two deaths were registered from phthisis, and another boy suffering

from same died in Limerick union. He was sent in from this district, and had previously been in a sanatorium.

LIMERICK; *Clarina.*—District healthy.

LIMERICK; *Limerick, No. 3.*—The health of the district has been good, and the sanitary arrangements satisfactory during the quarter.

LIMERICK; *Moroe.*—District generally healthy. Sanitary condition good. There was one case of diphtheria and one of cancer. Tuberculosis none.

LISTOWEL; *Glin.*—There was no case of cancer in the district during the quarter, but pulmonary tuberculosis was responsible for one death. The public health of the district was remarkably satisfactory.

MITCHELSTOWN; *Galbally.*—District exceptionally healthy, save a few cases of scarlatina, one of which was fatal owing to pneumonia (not yet registered).

MITCHELSTOWN; *Mitchelstown, No. 2.*—District healthy, and in a sanitary condition.

NEWCASTLE; *Ardagh.*—The district is in a particularly healthy state. A quite unusual number of deaths from phthisis has been registered for this quarter, viz., three. But worthy of note in an especial degree is the fact that four deaths have been registered of persons whose ages have been respectively 107 years, 81 years, 93 years, and 86 years.

RATHKEALE; *Askeaton.*—During the past quarter the health of the district was very good, free from all forms of epidemic disease. One death was registered from carcinoma of stomach, and one from chronic pulmonary tuberculosis.

RATHKEALE; *Pallaskenry.*—Sanitary condition of district is good. Influenza prevalent.

RATHKEALE; *Rathkeale, No. 1, W.*—There is an epidemic of scarlet fever at present in the district, several of the cases are in the hospital, and the schools have been closed. There were eight deaths registered from tuberculosis during the quarter—a very heavy death-roll from this disease.

RATHKEALE; *Rathkeale, No. 2.*—During the month of June there were four cases of scarlet fever in my district. Otherwise my district was in a healthy condition.

TIPPERARY; *Grean.*—Three cases of enteric fever in one family occurred during the quarter. There were also some cases of whooping-cough.

**Tipperary County, North Riding.**

BORRISOKANE; *Borrisokane, W.*—One case of scarlet fever in first month of quarter. Otherwise the district is healthy.

BORRISOKANE; *Cloughjordan.*—One death from pulmonary tuberculosis was registered during the quarter. Patient came from America to die.

BORRISOKANE; *Terryglass.*—Sanitary arrangements good.

NENAGH; *Nenagh, W.*—District healthy.

NENAGH; *Newport.*—District at present in a healthy condition.

NENAGH; *Portroe.*—The sanitary condition of the district is excellent, and no infectious diseases have occurred.

NENAGH; *Silvermines.*—District free from infectious disease.

### Tipperary County, South Riding.

**CALLAN**; *Mullinahone*.—Health of the district good, sanitary arrangements fairly good. No infectious or contagious disease prevalent. Two deaths registered from cancer of stomach, and one from pulmonary tuberculosis.

**CASHEL**; *Kilpatrick*.—District healthy.

**CLOGHEEN**; *Caher*.—No cases of an epidemic character occurred in the district during the past quarter. The sanitary condition of town and country is good.

**CLONMEL**; *Kilsheelan, No. 1*.—District healthy.

**TIPPERARY**; *Cappagh*.—The district is healthy.

**TIPPERARY**; *Emly*.—District very healthy.

**URLINGFORD**; *Kilcooly*.—Sanitary arrangements in district good. District has been healthy during the quarter.

### Waterford County.

**CLONMEL**; *Ballymacarbry*.—Sanitary condition good. Very little sickness during the quarter, and no infectious case.

**CLONMEL**; *Kilsheelan, No. 2*.—District healthy.

**DUNGARVAN**, *Dungarvan, W*.—Measles epidemic in district during the past quarter.

**DUNGARVAN**; *Seskinan*.—Epidemic of measles with no deaths.

**LISMORE**; *Ballyduff*.—Sanitation and general health of district very satisfactory.

**LISMORE**; *Cappoquin*.—One case of cerebro-spinal fever, twelve cases of scarlet fever, and many cases of measles occurred during the quarter.

**LISMORE**; *Tallow*.—An outbreak of measles occurred early in June and still continues. Scarletina almost entirely disappeared; only one case seen, and that early in June.

**WATERFORD**; *Kilmeadan*.—During the past quarter there has been a mild epidemic of scarlatina. There was one death from the malignant type, the patient having no medical attendance. The epidemic has now abated, there having been no fresh cases during the past fortnight. With this exception the health of the district has been very good during the quarter.

**WATERFORD**; *Woodstown*.—The health of the district is good.

**YOUGHAL**; *Ardmore*.—District healthy.

**YOUGHAL**; *Clashmore*.—District healthy.

## III. PROVINCE OF ULSTER.

### Antrim County.

**ANTRIM**; *Antrim, W*.—There were four cases of cerebro-spinal fever. One death.

**ANTRIM**; *Doagh*.—There were 17 cases of diphtheria notified during the quarter, with one death. Also a few cases of scarlet fever.

**ANTRIM**; *Randalstown*.—Cases of cerebro-spinal meningitis, scarlet fever, measles, whooping-cough, mumps and chicken-pox reported during the quarter.

**ANTRIM**; *Templepatrick*.—A few cases of mumps, measles and diphtheria, and a considerable number of

cases of influenza occurred throughout the district during the quarter.

**BALLYCASTLE**; *Ballycastle, W*.—Whooping-cough and measles were prevalent in the district during the quarter.

**BALLYCASTLE**; *Cushendall*.—Of the sixteen deaths registered during the quarter, ten were above 70 years of age, five above 80 years, and one above 90 years.

**BALLYMENA**; *Ahoghill*.—Pulmonary tuberculosis on the decrease, cases of cancer more numerous. Measles has been prevalent during the quarter. Health of the district at present good.

**BALLYMENA**; *Ballymena, W*.—A few cases of measles recently, otherwise town and district healthy.

**BALLYMENA**; *Broughshane*.—Pneumonia was very prevalent in the early part of the quarter. Mumps also epidemic.

**BALLYMENA**; *Clogh*.—District very healthy. Sanitary matters very fair.

**BALLYMENA**; *Portlengone*.—Health of the district is good.

**BALLYMENA**; *Toome*.—The district is in a good sanitary condition.

**BALLYMONEY**; *Bushmills*.—The birth-rate down to half the usual on account of the number of recruits—married men—who have left.

**BALLYMONEY**; *Dirraw*.—Health of district most satisfactory.

**BELFAST**; *Belfast Rural, No. 4*.—The sanitary arrangements are pretty well up-to-date. Several isolated cases of scarlatina during the quarter, but no death registered from this cause. Birth-rate for quarter very low.

**LARNE**; *Ballycarry*.—Slight epidemic of scarlatina, but so far no death therefrom.

**LARNE**; *Carrickfergus*.—One death from cerebro-spinal fever, child aged 2 years.

**LISBURN**; *Dunmurry*.—The district, on the whole, has been healthy during the past quarter. There have been a few cases of scarlatina during the past month, and one of cerebro-spinal meningitis, otherwise it has been free from infectious disease.

**LISBURN**; *Glenavy*.—District fairly healthy. No case of infectious disease during quarter.

**LISBURN**, *Knocknadona*.—Measles and whooping-cough very prevalent. Three cases of cerebro-spinal meningitis occurred and were sent to hospital. One recovered.

**LISBURN**; *Lisburn, W*.—Two deaths were due to cerebro-spinal meningitis, both being from other districts.

**LURGAN**; *Aghalee*.—A few cases of summer diarrhoea, one death from same.

### Armagh County.

**ARMAGH**; *Blackwatertown*.—The influenza prevalent during the past quarter has in many cases been followed by considerable cardiac weakness.

**ARMAGH**; *Loughgall*.—During the quarter an outbreak of measles and mumps occurred in district, but no deaths occurred from same.

**ARMAGH**; *Markethill*.—The district has been very healthy during the past quarter. Three cases of typhoid were reported.

LURGAN; *Lurgan, No. 1, W.*—Two cases of cerebro-spinal meningitis occurred in the urban district towards the close of the March quarter; both died, one after removal to Purdysburn Hospital and the other to the Workhouse Infirmary. In each case death occurred within 48 hours from the onset of the disease.

LURGAN; *Lurgan, No. 2.*—The district is in a good healthy condition.

NEWRY; *Forkill.*—District healthy.

NEWRY; *Meigh.*—District healthy.

NEWRY; *Mullaghglass.*—District healthy.

### Belfast County Borough.

BELFAST; *Belfast Urban, No. 3.*—Whooping-cough was prevalent during the quarter.

BELFAST; *Belfast Urban, No. 11.*—The health of the district is generally good. There have been a few cases of scarlatina.

BELFAST; *Belfast Urban, No. 12.*—One death from cerebro-spinal meningitis.

### Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District healthy and free from any infectious disease.

BAWNBOY; *Swanlinbar.*—Sanitation in this district is improving. Two cases of diphtheria occurred in June. Both recovered.

CAVAN; *Bellananagh.*—Two cases of cerebro-spinal fever occurred in district during quarter in young children. Both died in hospital. Otherwise district healthy.

CAVAN; *Belturbet.*—In the early part of the quarter, measles, complicated with pneumonia, was very prevalent, with only one death from measles. The district generally is clean and healthy.

CAVAN; *Killashandra.*—Two deaths from pulmonary tuberculosis registered during the past quarter. District healthy, no epidemics.

ENNISKILLEN; *Dowra.*—The sanitary condition of district is fairly good.

ENNISKILLEN; *Holywell, No. 2.*—Scarlatina occurred in three families during the first and second months of the quarter, and was the cause of one death. The local school was closed, and every other precaution taken. The disease is now at an end.

GRANARD; *Scrabby, No. 1.*—Health of the district good. No cases of infectious nature have occurred.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

OLDCASTLE; *Virginia.*—District healthy.

### Donegal County.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely.*—Measles prevalent during quarter, also influenza.

DONEGAL; *Laghy.*—District healthy.

DONEGAL; *Mountcharles.*—No outbreak of any infectious disease occurred during the quarter until the last two weeks, when measles of a mild type occurred.

DONEGAL; *Pettigoe.*—The health of the district has been satisfactory. No infectious disease.

DUNFANAGHY; *Dunfanaghy, W.*—There has been an epidemic of whooping-cough in the district for the past three months.

GLENTIES; *Ardara.*—Measles prevalent and rife in district.

GLENTIES; *Carrick.*—There has been an epidemic of measles in the district during the quarter.

GLENTIES; *Killybegs.*—There was an outbreak of measles of a severe type during quarter.

INISHOWEN; *Clonmany.*—District healthy.

INISHOWEN; *Malin.*—District healthy.

LETTERKENNY; *Church Hill.*—District healthy. No epidemic.

LETTERKENNY; *Manorcunningham.*—The sanitary state of the district is fairly good.

MILLFORD; *Rosguill.*—One death from typhus which occurred during quarter ended 31st March registered during quarter. No further cases. Of the twenty-one deaths registered, twelve were aged 65 years and upwards. District healthy.

STRABANE; *Raphoe.*—Scarlatina and whooping-cough have been prevalent.

STRANORLAR; *Cloghan.*—District healthy at present. A few of the deaths registered were of an advanced age.

STRANORLAR; *Killygordon.*—District healthy. Two-thirds of the deaths registered were those of persons over 65 years of age.

### Down County.

BANBRIDGE; *Loughbrickland.*—Epidemic of measles during the quarter.

BELFAST; *Castlereagh, No. 2.*—The epidemic of influenza continued into April. During May and June there has been a number of cases of measles.

DOWNPATRICK; *Ballynahinch.*—There have been numerous cases of influenza of a severe type with meningeal and pulmonary complications in the district during the quarter. There have also been some cases of measles during the last month.

DOWNPATRICK; *Clough.*—No deaths from infectious illness.

DOWNPATRICK; *Downpatrick, W.*—The sanitary arrangements are fairly satisfactory. The number of deaths from tuberculosis is mainly due to deaths from that cause in the District Asylum.

DOWNPATRICK; *Killyleagh.*—During the quarter the public health was excellent. Of the 42 deaths registered, 21 were of persons who died at age periods "under one year" and "65 years and upwards." A mild epidemic of measles occurred in a part of the district, but all the cases made excellent recoveries.

DOWNPATRICK; *Portaferry.*—Five cases of scarlet fever of a very mild type occurred during the quarter. Otherwise health of district was very good.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district good at present. During first and second months of quarter bronchial diseases were prevalent, also some cases of meningitis.

KILKEEL; *Rosstrevor.*—During the quarter we had a rather severe epidemic of influenza, complicated chiefly with pneumonia. There was a great number of deaths amongst the old people this quarter.

LISBURN; *Annahilt*.—There were no cases of infectious disease during the quarter.

LISBURN; *Ballylesson*.—The district has not yet experienced a single case of cerebro-spinal fever during the present outbreak in neighbouring localities.

LISBURN; *Drumbeg*.—Births and deaths below the average. Health of district good. Several cases of measles occurred during the quarter, and one case of scarlatina was notified.

LURGAN; *Moira*.—I am very much pleased to be able to state that the births more than doubled the number of deaths. This is the first time this has occurred since I became Registrar, and at times the deaths balanced the births. Unfortunately the number of illegitimate births are far in excess of any yet recorded. There has been a good deal of pulmonary disease through the quarter, but few deaths save of old people, more than half being over sixty-five years of age.

LURGAN; *Waringstown*.—District healthy. No epidemic.

NEWTOWNARDS; *Bangor*.—Public health good.

NEWTOWNARDS; *Comber*.—District clear of epidemics. Two cases of diphtheria and one of scarlatina, all brought in from Belfast district.

NEWTOWNARDS; *Kilmood*.—A few cases of scarlatina in one corner of the district, also a few cases of measles.

#### Fermanagh County.

ENNISKILLEN; *Ely*.—Health of district very good.

ENNISKILLEN; *Holywell*, No. 1.—No epidemic disease in district.

IRVINESTOWN; *Clonelly*.—Health of district good. No infectious disease during the quarter.

IRVINESTOWN; *Ederney*.—District healthy.

IRVINESTOWN; *Irvinestown*, W.—District healthy.

LISNASKEA; *Lisnaskea*, W.—The majority of the deaths registered were those of persons aged 60 years and upwards.

#### Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District healthy.

COLERAINE; *Garvagh*.—Two cases of mild diphtheria occurred during the quarter, and measles has appeared in one part of the district during the past week. Otherwise health of district good.

COLERAINE; *Kilrea*.—District healthy. In the first month of the quarter there were five cases of scarlatina, with one death resulting therefrom; also one of diphtheria ending in recovery. In these infectious diseases strict sanitary precautions were taken to prevent the further spread of them.

COLERAINE; *Portstewart*.—District healthy.

LIMAVADY; *Ballykelly*.—Severe epidemic of influenza, with numerous cases of pneumonia, in early part of quarter. Outbreak of scarlatina in district during latter part.

LIMAVADY; *Bellarena*.—Two cases of scarlatina occurred in Myroe division of the district. Both recovered.

LIMAVADY; *Limavady*, W.—Slight outbreak of scarlet fever in urban district.

MAGHERAFELT; *Moneymore*.—A severe type of measles with complications was prevalent during the quarter. It is now subsiding. Six deaths were due to it. There were some cases of influenza with bronchitis which caused three deaths.

#### Monaghan County.

CARRICKMACROSS; *Donaghmoynne*.—One case of scarlet fever and one case of typhus occurred in June, but source impossible to trace. Whooping-cough of a very mild type has spread from neighbouring Union into one corner of district.

CASTLEBLAYNEY; *Ballybay*.—Enteritis and diarrhoea were prevalent. A few isolated cases of diphtheria were reported.

COOTEHILL; *Dawsonsgrove*.—Six cases of scarlatina and one case of diphtheria occurred during the quarter.

MONAGHAN; *Emysale*.—Health of district very good. No epidemics.

MONAGHAN; *Kilmore*.—There have been cases of scarlatina and also of diphtheria during past quarter in the district. Influenza of various types also has been prevalent.

#### Tyrone County.

CASTLEDERG; *Castlederg*, W.—Scarlatina of mild type very prevalent, principally among the better class. No deaths.

CASTLEDERG; *Drumquin*.—None of the infectious diseases mentioned in the Abstracts occurred during the quarter, with the exception of two cases of scarlatina simplex, which are progressing satisfactorily.

CASTLEDERG; *Killeter*.—The public health is good, and there has been no death during the quarter from any infectious disease.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter.

COOTEHILL; *Pomeroy*.—The health of the district is excellent.

DUNGANNON; *Benburb*.—Health of district good.

DUNGANNON; *Caledon and Ballymagran*.—Scarlatina and measles both prevalent during the quarter.

DUNGANNON; *Clonavaddy*.—No infectious diseases in district during the quarter.

DUNGANNON; *Coal Island*.—Some cases of enteritis, but only a very few of a severe nature. No other disease of an exceptional class.

OMAGH; *Drumquin*.—General health of district good. Sanitary condition only fair.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and with exception of two cases of scarlatina reported free from epidemic disease. The majority of the deaths reported were those of persons from 70 to 98 years of age. The sanitary arrangements are fairly good.

OMAGH; *Omagh*, No. 1, W.—Health of district good. Sanitary condition: urban—fairly satisfactory, rural—no improvement, manure heaps and cesspools contiguous to dwellings and county road, no public interest regarding these conditions. Continued inclemency of weather proved disastrous to the aged and infirm.

OMAGH; *Omagh*, No. 2.—District healthy and in good sanitary condition.

OMAGH; *Sixmilecross*.—The district is at present in very good sanitary condition. One case of typhoid fever occurred in a labourer's cottage. There is a slight improvement in cleanliness in the cottages in this district, still there is room for more improvement.

#### IV. PROVINCE OF CONNAUGHT.

##### Galway County.

BALLINASLOE; *Laurencetown*.—The general health and sanitary condition of the district is good.

CLIFDEN; *Inishbofin*.—The district is presently in a healthy condition.

CLIFDEN; *Roundstone, No. 2*.—Health of the district satisfactory.

GALWAY; *Galway, No. 3 (Arran)*.—The health of district is good.

GALWAY; *Moycullen*.—The health of the district continues good.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Spiddle*.—District healthy.

GALWAY; *Turloughmore*.—District sanitary. Influenza prevalent during last quarter, also pneumonia.

LOUGHREA; *Bullaun*.—Of the thirteen deaths registered, four were aged respectively 76, 77, 79, and 87 years.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district good.

OUGHTERARD; *Lettermore*.—Health of the district is good.

OUGHTERARD; *Oughterard, W*.—Health of district good. One case of epidemic cerebro-spinal meningitis ended in death. Two deaths from pulmonary tuberculosis, three from abdominal cancer. Very little infectious disease, two cases of scarlatina, one death from whooping-cough complicated from pulmonary tuberculosis.

PORTUMNA; *Portumna, No. 1, W*.—Sanitary condition of district appears good.

TUAM; *Tuam, No. 1, W*.—Health of district good during quarter. Most of my attendances were for old women and men.

TUAM; *Tuam, No. 2*.—One case of tuberculosis, a young man, a coalminer, who had returned from England a short time before his death. No epidemic disease during quarter.

##### Leitrim County.

BALLYSHANNON; *Kinlough*.—Parotitis epidemic in Kinlough dispensary district.

BAWNBOY; *Ballinamore*.—The sanitary condition of the district is very satisfactory.

CARRICK-ON-SHANNON; *Drumshambo*.—District healthy and in good sanitary condition.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district were fair during the quarter. Of the eleven deaths registered, seven were of persons over 65 years old. One case of enteric and three of scarlatina (in one family) occurred without any death or spread of these diseases. Cancer and pulmonary tuberculosis each caused one death.

MOHILL; *Mohill, W*.—No complaints regarding the sanitary state of the district, and it is also free of infectious diseases.

MOHILL; *Rinn*.—The district is quite healthy, and free from epidemic disease.

##### Mayo County.

BALLINA; *Ballina, W*.—Over half of the total deaths registered during the quarter were of persons over 65 years of age, including one of 107 years—the age being well authenticated. Eleven deaths registered from different forms of tuberculosis, one from whooping-cough and three from cancer.

BALLINA; *Crossmolina*.—Measles prevalent—no case of any other infectious disease during quarter.

BALLINROBE; *Ballinrobe, W*.—Health of the district is good. Of the 29 deaths registered, 15 were 65 years and upwards. Two deaths were registered in each case at 102 years.

BALLINROBE; *Cong*.—Health of district good.

BALLINROBE; *Hollymount*.—Deaths rather over and births much under the average. There have been many cases of influenza, and chest affections were very prevalent especially in old people.

BELMULLET; *Knocknallower*.—The condition of the district is very healthy, except that the epidemic of measles so prevalent during last quarter has not yet quite cleared off.

CASTLEBAR; *Balla*.—District healthy. There have been two deaths registered at 97 years of age during the quarter.

CASTLEBAR; *Castlebar, No. 1, W*.—Measles prevalent during last quarter, otherwise health of district is good. Thirteen deaths during the quarter were registered at 80 years and upwards, and one at 101 years.

CASTLEBAR; *Castlebar, No. 2*.—The sanitary arrangements in this district are fairly good. There were three cases of measles reported during the quarter; from enquiries I have made, I find there are no further cases.

CLAREMORRIS; *Ballyharinis*.—Health of district good, no zymotics or cancer. Sanitation progressive.

KILLALA; *Killala, W*.—Measles and whooping-cough were generally prevalent in the district during the quarter. Three deaths from cancer were registered. One case of enteric fever was admitted to hospital. Sanitary arrangements fairly satisfactory.

SWINEFORD; *Foxford*.—Measles prevalent. No fatal cases.

SWINEFORD; *Kiltimagh*.—The single case of pulmonary tuberculosis is one of the usual returned Irish-Americans—sent home to die.

SWINEFORD; *Swineford, W*.—The general health of the district has been good, except two or three isolated cases of scarlatina.

WESTPORT; *Achill*.—There has been an epidemic of measles here for the past four or five weeks. There has been one death (not yet registered).

WESTPORT; *Ballycroy*.—Some cases of measles in district. A considerable number of cases of influenza (tracheal and bronchial type).

WESTPORT; *Islandeady*.—District healthy. An epidemic of measles of a mild type occurred during last quarter.

WESTPORT; *Louisburgh*.—The sanitary condition of the district is satisfactory. During the first month of the quarter acute pneumonia was prevalent.

WESTPORT; *Newport*.—The general condition of the district is good.

WESTPORT; *Westport, W.*—District healthy. Sanitation improving.

### Roscommon County.

ATHLONE; *Kiltoom*.—Sanitary condition satisfactory. Registered the death of an old man 103 years, sensible until the day of his death, and spent his life at outdoor exercise, fishing and shooting along the Shannon.

BOYLE; *Boyle, No. 1, W.*—There was no epidemic in the district during the past quarter.

BOYLE; *Keadew*.—Influenza very prevalent during month of May.

CARRICK-ON-SHANNON; *Aughrim*.—The sanitary condition of the district is good. The number of deaths from tuberculosis is in excess of what it has been for a considerable time past.

CASTLEREAGH; *Ballaghaderreen*.—The sanitary arrangements of the district are improving. The public health is good.

CASTLEREAGH; *Loughlinn*.—The district is healthy. One death from cancer; two deaths from pulmonary tuberculosis.

STROKESTOWN; *Roosky*.—Nearly all the deaths registered were of persons varying in age from 70 to 92 years. Two deaths from pulmonary tuberculosis, no death from cancer. It appears strange that there are nearly five male deaths to every single female death this quarter.

STROKESTOWN; *Strokestown, W.*—The death occurred of one person aged 100 years.

### Sligo County.

BOYLE; *Gurteen*.—District healthy.

DROMORE WEST; *Easky, W.*—Health of district very good.

DROMORE WEST; *Skreen*.—The health of the district is good.

SLIGO; *Carney, No. 1*.—Sanitary condition of district good.

SLIGO; *Riverstown*.—District healthy.

TOBERCERRY; *Coolaney*.—Sanitation in district satisfactory.

TOBERCERRY; *Tobercurry, W.*—Many cases of scarlatina and a few of diphtheria occurred during the past quarter, also several cases of measles and whooping-cough.

1915.]  
3rd Quarter.

**Marriages:**—APRIL, MAY, JUNE, 1915.

**Births and Deaths:**—JULY, AUGUST, SEPTEMBER, 1915.

During the quarter ended 30th September last, there were registered in the 831 Registrars' Districts in Ireland 22,779 births—a number equal to an annual birth-rate of 20·8 in every 1,000 of the estimated population\*—and 14,670 deaths, representing an annual rate of 13·4 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,511 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 21·0 in every 1,000 of the estimated population, and the death-rate 11·6 per 1,000.

The birth-rate in Ireland for the quarter is 2·1 below the average rate for the corresponding quarter of the ten years, 1905–1914, and 1·4 below the rate for the third quarter of 1914. The deaths are 542 below those registered in the corresponding quarter of 1914; the death-rate is 0·5 below the rate for that quarter, and 0·9 below the average for the third quarter of the ten years, 1905–1914.

In comparison with those for the corresponding quarter of 1914, the returns of pauperism furnished by the Local Government Board show a decrease of 2,992 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 625 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years, 1905–1914, the number of Workhouse inmates shows a decrease of 7,885, and the number of persons on out-door relief shows a decrease of 12,235, the total under both heads being 22·9 per cent. under the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·1 per cent.

\* See page 214.

The annual rate (5·64 per 1,000 of the population) represented by the marriages registered during the second quarter of 1915, is 0·75 above the average rate for the corresponding quarter of the preceding ten years.

\* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (6,179) registered in Ireland during the second quarter of 1915 are equivalent to an annual rate of 5·64 per 1,000 of the estimated population, being 0·55 above the rate for the corresponding quarter of 1914, and 0·75 above the average rate for the second quarter of the ten years 1905–1914. Of the total number of marriages, 4,260 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,919 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·26 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·71 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·74 above, and that under the latter heading also 0·80 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1905–1914, and the average number for that period, also the number registered in the first and second quarters of 1915.

### BIRTHS.

The number of births registered during the quarter ended 30th September last was 22,779—11,700 boys and 11,079 girls—being equal to an annual ratio of 1 in every 48.1, or 20.8 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1905–14, was 25,132, equivalent to an annual rate of 22.9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 21.4 per 1,000 of the population according to the Census of 1911; Munster, 20.7; Ulster, 20.8; and Connaught, 19.3.

The highest county or county borough birth-rate\* is 29.5 for Dublin county borough, and the lowest 15.7 for Dublin county. Of the intermediate rates the highest five are—Limerick county and county borough, 23.9; Belfast county borough, 23.7; Kerry, 22.7; Armagh, 21.4; and Donegal, 21.0. The lowest five are—King's, 16.7; Kildare, 17.0; Queen's, 17.0; Roscommon, 17.0; and Clare, 17.0.

### DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 14,670—7,418 males and 7,252 females—affording an annual ratio of 1 in every 74.7, or 13.4 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1905–14, was 14.3 per 1,000.

The death-rate in Leinster was 14.3 per 1,000 of the population according to the Census of 1911; in Munster, 13.1; in Ulster, 13.7; and in Connaught, 11.1.

The county or county borough death-rates\* range from 8.9 in Leitrim to 18.7 in Dublin county borough. Between these rates the lowest five are—Sligo, 10.4; Louth, 10.6; Carlow, 10.9; Mayo, 11.0; and Kildare, 11.0; and the highest five are—Armagh, 14.7; Down, 14.7; Londonderry county and county borough, 14.7; Westmeath, 14.6; and Waterford county and county borough, 14.6.

\* See note (\*) on page 152.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1905–1914, and the average number for that period; also the number registered during the first, second and third quarters of the year 1915 :—

AGES.—Of the 14,670 deaths registered last quarter, 1,759, or 12·0 per cent., were of infants under one year of age; and 5,788, or 39·5 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 77·2 per 1,000 of the births registered. In the province of Leinster the number of deaths of infants under one year old equalled 14·6 per cent. of the total deaths registered therein; in Munster, 10·9 per cent.; in Ulster, 12·3 per cent.; and in Connaught, 6·8 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 34·6 per cent.; in Munster, to 41·2 per cent.; in Ulster, to 39·2 per cent.; and in Connaught, to 48·6 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases\* is 905, and is equivalent to an annual rate of 0·83 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the September quarter of 1915, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1910–1914.

Name of Disease.	Number of Deaths in September quarter, 1915.	Average number of Deaths in September quarter of the 5 years, 1910–1914.
Enteric Fever, .. ..	33	65
Typhus, .. ..	8	8
Small-pox, .. ..	—	—
Measles, .. ..	83	145
Scarlet Fever, .. ..	89	82
Whooping-cough, .. ..	144	172
Diphtheria, .. ..	53	67

\* See note (†) on page 159.

**ENTERIC FEVER.**—There were 33 deaths from enteric fever during the quarter, as against an average of 65 for the third quarter of the preceding five years, the number registered in the third quarter of 1914 being 75, and in the three subsequent quarters the deaths from this cause numbered 80, 60 and 45, respectively. Of the 33 deaths, 12 were registered in the province of Ulster, 10 in Leinster, 6 in Munster, and 5 in Connaught.

**TYPHUS.**—Eight deaths from this disease were registered, being equal to the average for the corresponding period of the preceding five years. Two of the deaths occurred in Ballinrobe union, and one death each in Ardee, Dingle, Dundalk, Galway, Glenties and Shillelagh.

**SMALL-POX.**—There was no record of mortality from small-pox.

**MEASLES.**—To measles 83 deaths were attributed, affording an annual rate of 0·08 per 1,000 of the population. In the three preceding quarters, deaths from measles numbered 159, 174 and 170, respectively, and in the third quarter of the five years, 1910-1914, the average number was 145. Of the 83 deaths, 36 took place in the province of Ulster, 17 (all occurring in the county of Mayo) in Connaught, and 15 each in Leinster and Munster.

**SCARLET FEVER.**—The deaths from scarlet fever, numbering 89, and equivalent to an annual rate of 0·08 per 1,000, are 7 above the average for the third quarter of the preceding five years. In the fourth quarter of the year 1914, the number of deaths from this disease amounted to 166, falling to 104 in the following quarter, and to 77 in the second quarter of the present year.

In Lisburn union 20 deaths (18 appertaining to Belfast county borough) were registered; in Belfast, Granard, Sligo and Waterford unions, 5 deaths each; and in each of Antrim, Castlederg, Cootehill, Dublin North, Dublin South and Tralee, 3 deaths were registered.

**WHOOPING-COUGH.**—Whooping-cough caused 144 deaths, representing an annual rate of 0·13 per 1,000 of the population, which number is 28 below the average (172) for the third quarter of the past five years. In the three quarters preceding that under notice the respective numbers registered were 139, 271 and 179.

Of the 144 deaths, there were 88 in the province of Ulster (42 of these occurring in Londonderry county and county borough and 29 in Belfast county borough); 23 in Leinster (11 having been registered in Dublin county borough); 22 in Munster (of which 17 occurred in Cork county and county borough) and 11 in Connaught (6 of these having been registered in the county of Sligo).

**DIPHTHERIA.**—Fifty-three deaths from this disease were recorded, the average for the corresponding quarter of the preceding five years being 67, and the mortality for the three preceding quarters being 100, 93 and 68, respectively. Of the 53 deaths, 12 occurred in Dublin South union, 4 in Dublin North, 7 (6 belonging to Belfast county borough) in Lisburn union, and 2 each in Cork, Lismore, Macroom, Thomas-town and Wexford.

**DIARRHOEAL DISEASES.**—Of 495 deaths, 433, or 0·40 per 1,000 of the population, were deaths of children under 2 years of age from diarrhoea and enteritis. The average number of deaths of children from the latter during the third quarter of the four years, 1911-14, was 800.

**TUBERCULOSIS.**—There were 2,016 deaths (affording an annual rate of 1·84 per 1,000) returned by the registrars as from tuberculous disease, as against an average of 2,091 for the corresponding period of the preceding five years.

Deaths from tuberculosis in the three preceding quarters numbered 2,005, 2,483 and 2,718, respectively.

**CANCER.**—This disease caused 860 deaths, or 0·79 per 1,000 of the population. The corresponding rates for the three preceding quarters were 0·81, 0·80 and 0·77.

CEREBRO-SPINAL FEVER.—From the Registrars' Notes on the quarter, the following have been extracted :—

NAAS; *Newbridge*.—Two deaths from cerebro-spinal fever were registered this quarter.

KINSALE; *Kinsale*.—A few cases of cerebro-spinal meningitis.

LIMERICK; *Caherconlish*.—One death from cerebro-spinal meningitis.

LISBURN; *Lisburn W.*—Two deaths registered as due to cerebro-spinal meningitis, one being inside the urban district and one from outside.

BELFAST; *Belfast Urban No. 12*.—One death from cerebro-spinal meningitis.

NEWTOWNARDS; *Greyabbey*.—One death, registered cause, cerebro-spinal fever; another acute case of cerebro-spinal fever, which was removed immediately to Purdysburn Fever Hospital, recovered after treatment by serum. Those cases occurred in Ballywalter.

ROSCOMMON; *Roscommon, W.*—One death from cerebro-spinal fever.

The Registrars, in their Notes, report the presence of the following diseases :—Enteric fever in 11 districts, typhus in 4, measles in 18, scarlet fever in 53, whooping-cough in 24, diphtheria in 21, mumps in one, German measles in 3, influenza in 3, cerebro-spinal fever or cerebro-spinal meningitis in 7, and chicken-pox in 2. [See Appendix to this Report commencing on page 215.]

INQUESTS.—There were 382 inquests reported to the Registrars during the quarter; this number being equal to one in every 38 of the total deaths registered.

In Leinster there was one inquest to every 42 deaths registered, in Munster one to 37, in Ulster one to 32, and in Connaught one to 85.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 14,670 deaths registered, 3,150, or 21·5 per cent., occurred in public institutions. In Leinster the percentage was 30·2, in Munster 25·3, in Ulster 15·4, and in Connaught 12·1.

UNCERTIFIED DEATHS.—According to the returns, 3,209 of the 14,670 deaths which were registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 24, in Ulster 17, and in Connaught the uncertified deaths were 48 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1915, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhoeal Diseases.	Total	Percentage of Total Deaths.	Number in every 100,000 of the Population.

(a) Including one death from cerebro-spinal meningitis.

(b) Boundaries extended as from 1st April, 1915.

## VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1915, there were 22,230 persons successfully vaccinated.

## EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th September last was 3,511 (2,069 males and 1,442 females), being 637 less than in the corresponding quarter of the year 1914, and 3,907 below the average number for the third quarter of the ten years 1905-1914.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1914 and 1915 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.
July, .	607	654	47	—	601	350	—	251	1,208	1,004	—	204
August, .	481	673	192	—	548	461	—	87	1,029	1,134	105	—
September,	849	742	—	107	1,062	631	—	431	1,911	1,373	—	538
TOTAL,	1,937	2,069	132	—	2,211	1,442	—	769	4,148	3,511	—	637

\* Including 2,153 emigrants to the United States of America, viz. :—567 in the month of July, 666 in August, and 920 in September. Of 2,144 steerage passengers, 215 had their passages paid for in America.

## PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 8*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited), bread, delivered. In the third quarter of the year 1914 the average price for both firms was 6½*d.*, and in the corresponding quarter of 1905 it was 6*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 21*s.* per cwt. For the corresponding quarter of the year 1914 the average price was 16*s.* 6*d.*; and for the third quarter of 1905 the average price was 14*s.* 6*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 7*d.* to 4*s.* 1*d.* In the third quarter of 1914 the average prices were 3*s.* 10*d.* to 4*s.* 6*d.*, and the prices for the corresponding quarter of 1905 were 3*s.* 3*d.* to 3*s.* 8*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 52*s.* 6*d.* to 56*s.* 6*d.*, as against 48*s.* to 66*s.* for the third quarter of 1914, the price for the third quarter of 1905 ranging from 50*s.* 6*d.* to 55*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 31*s.* to 32*s.* per ton nett.

The minimum price of Consols (which was fixed by the Treasury, in January, at £68½) was lowered to £66½ on 19th March, and again to £65 on 23rd June, at which figure it still remained on 30th September.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter was 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1915 was 30,842 or 2,992 below the average for the corresponding period in 1914.

The average weekly number of persons receiving out-door relief during the quarter was 36,989, being 625 below the average for the third quarter of 1914.

Of the persons receiving in-door relief during the third quarter of 1915, an average number of 1,622 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1914 the average weekly number was 1,677.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1915, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									No. of PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.	BEEF (at the Dublin Cattle Market), per Cwt.	In-door.	Ordinary relief.	By means of works devised for the relief of distress.	Total Outdoor.	Out-door,

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the third

\* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1910 to 1915, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 162).

The mean height of the barometer during the third quarter of 1915 was 29·972 inches, being 0·067 above the average for the corresponding quarter of the five years 1910–1914; the highest reading (30·357 inches) was on the 22nd August, at 9 P.M., and the lowest (29·277 inches) on the 16th July, at 9 P.M.

The mean temperature of the air during the quarter was 56·1°, being 0·5° below the average for the third quarter of the 5 years, 1910–1914.

The maximum temperature of the air during the quarter was 72·8° and the minimum 31·9°. The maximum heat in sun was 131·0°.

Rain fell on 55 days during the quarter. The rain-fall measured 8·720 inches being 2·227 inches above the average for the third quarter of the five years, 1910–1914. The greatest monthly rainfall was in July, when 5·496 inches were registered.

*July.*—The mean height of the barometer during this month was 29·884 inches; the highest reading (30·220 inches) was on the 9th, at 9 A.M.; and the lowest (29·277 inches) on the 16th, at 9 P.M. The mean temperature of the air was 56·5°, the maximum registered was 70·2°, and the minimum 38·0°. The 4th was the warmest day, and the 27th the coldest night. The mean of the dry bulb was 56·2° and of the wet bulb, 53·5°. The maximum heat in the sun was 127·2°, and the minimum on the grass 36·0°. The total amount of sunshine recorded was 147·2 hours, the greatest daily amount being 12·2 hours on the 5th. The maximum ozone was 0·9, the minimum 0·2, and the mean 0·6. Rain fell on 24 days. The rain-fall measured 5·496 inches; the greatest amount in 24 hours was 0·717 inch on the 6th.

*August.*—The mean height of the barometer during this month was 30·032 inches; the highest reading (30·357 inches) was on the 22nd, at 9 P.M., and the lowest, (29·527 inches) on the 2nd, at 9 A.M. The mean temperature of the air was 57·2°, the maximum registered was 72·0°, and the minimum 40·9°. The 10th was the warmest day, and the 31st the coldest night. The mean of the dry bulb was 56·8°, and of the wet bulb 54·9°. The maximum heat in sun was 131·0°, and the minimum on the grass 36·0°. The total amount of sunshine recorded was 145·2 hours, the greatest daily amount being 11·0 hours on the 24th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·4. Rain fell on 15 days. The rain-fall measured 2·303 inches; the greatest amount in 24 hours was 0·433 inch on the 1st.

*September.*—The mean height of the barometer during this month was 30·001 inches; the highest reading (30·299 inches) was on the 16th, and the lowest (29·439 inches) on the 26th. The mean temperature of the air was 54·7°, the maximum registered was 72·8°, and the minimum 31·9°. The 16th was the warmest day, and the 3rd and 28th were the coldest nights. The mean of the dry bulb was 54·7°, and of the wet bulb 52·1°. The maximum heat in sun was 117·0°, and the minimum on the grass 32·2°. The total amount of sunshine recorded was 168·1 hours, the greatest daily amount being 11·9 hours on the 8th. The maximum ozone was 0·9, the minimum 0·0, and the mean 0·4. Rain fell on 16 days. The rain-fall measured 0·921 inch; the greatest amount in 24 hours was 0·264 inch on the 24th.

## METEOROLOGY.

[Prepared in the Meteorological Office under the direction of Sir Napier Shaw, F.R.S.]

**JULY.**—The main features of the weather were the relatively low temperature and the great number of days with rain. The wind nearly always came from some westerly point, and was as often from the north-west as from the south-west.

*Temperature* was below the normal throughout the month, especially about the second and last weeks. In the northern division the mean temperature was  $55\cdot7^{\circ}$ , or  $1\cdot7^{\circ}$  below the average, and in the south  $57\cdot4^{\circ}$ , or  $1\cdot6^{\circ}$  below. In both districts the mean temperature was more than a degree lower than during the corresponding month of last year. The period of greatest afternoon heat was between the 1st and 4th, when several places recorded a maximum a little above  $70^{\circ}$ . As a rule the daily maxima were not many degrees above  $60^{\circ}$ , the mean value for the north being  $62\cdot1^{\circ}$  and for the south  $64\cdot0^{\circ}$ . Very cold nights for the time of year were uncommon, but on the 12th the sheltered thermometer fell to  $34^{\circ}$  at Markree Castle, and on the 27th it fell to  $38^{\circ}$  at Phoenix Park. The mean minimum temperature in the northern division was  $50\cdot2^{\circ}$ , and in the south  $51\cdot5^{\circ}$ .

*Rainfall.*—Over the country generally there were only five or six days on which no rain fell, while the total amount was 109 mm. in the north and 133 mm. in the south, the latter figure exceeding the normal by 54 mm. On the 2nd a fall of 22mm. occurred at Dublin and 25mm. in the neighbourhood of Limerick. On the 6th more than 30 mm. fell at Kilkenny and Carrick-on-Suir. On the 16th 26mm. and 29mm., respectively, were recorded at Dublin and Kingstown; on the 22nd as much as 31mm. fell at Donaghadee, and on the 31st extremely heavy rain was experienced in the vicinity of Dublin; 35mm. at Shankill, 40mm. at Kingstown, and 48mm. at Newcastle (Co. Wicklow). Almost all these heavy rains were associated, directly or indirectly, with a thunderstorm. The days with thunderstorms over a large area were, however, not very numerous, the chief dates being the 16th, 23rd and 25th, mostly in the eastern half of the country.

*Bright Sunshine.*—In the southern district the total duration of sunshine just equalled the normal, the daily mean number of hours being 5·1. In the north, however, the corresponding figure was only 4 hours, showing a mean deficiency of half-an-hour per day. The first fortnight was, as a rule, less bright than the latter half of the month.

**AUGUST.**—The wet weather that was so prevalent in July continued for about two weeks in August, after which there was a very marked improvement. The earlier half of the month brought much cloud and more or less rain daily in almost all parts of the country, while subsequently the conditions were generally dry, although not, as a rule, particularly bright. During the unsettled period the distribution of barometric pressure was cyclonic and the wind variable in direction, but the dry period was accompanied by anticyclonic conditions and winds from some point between north and north-west, shifting occasionally to west.

*Temperature* was alternately above and below the normal. Until the 7th it was below the August average, especially in the north, then for a week it was above it, especially in the south. This was followed by about a week of relatively low temperature, which was, in turn, succeeded by about a week of warm weather. After the 28th there was another spell of cold, during which several places recorded maximum readings below  $60^{\circ}$ . For the month as a whole the temperature was rather above the normal, the mean in the north being  $56\cdot9^{\circ}$ , and in the south  $58\cdot9^{\circ}$ . The former was only  $0\cdot1^{\circ}$  above the average, and the latter  $0\cdot7^{\circ}$ . The highest temperature of the month occurred on the 9th, when the thermometer rose to  $75^{\circ}$  at Clongowes Wood and to  $74^{\circ}$  at Birr Castle and Mountmellick. The coldest nights were the 30th and 31st, when a minimum temperature of  $39^{\circ}$  was recorded at Clongowes Wood and Mungret College.

*Rainfall*.—In spite of the daily falls of rain until the 14th the total amount, owing to the subsequent dry weather, was considerably less than the average. In the North the aggregate was 80mm., showing a deficit of 22mm., and in the South 81mm., or 23mm. less than the normal. Although thunderstorms occurred in many places during the rainy portion of the month exceptionally heavy downpours were not frequent. On the 8th, however, there was as much as 46 mm. at Carrigallen, on the 11th 45mm. at Kilkenny, and on the 13th 36mm. at Carrick-on-Suir.

*Bright Sunshine* was almost continuously below the average in the northern division, and the mean daily duration was no more than 3·5 hours, or 0·7 hour less than the normal. In the South the weather was brighter, and the mean daily duration of 5·1 hours exceeded the normal by 0·2 hour. The brightest part of the month was the third week, when the mean daily duration was 5·1 hours in the North and 6·8 hours in the South. During the first week the corresponding values were 2·3 hours and 2·5 hours.

SEPTEMBER.—The weather generally was bright and warm, while the rain was mostly slight.

*Temperature* exceeded the average in all parts of the country, the mean in the North being 55·6°, or 1·7° above, and in the South 57·2°, or 2° above. The first few days of the month were decidedly cold for the time of year, but from the 12th till the 18th the mean temperature was higher than during any week in July, and as high as during the greater part of August. This outburst of unusual heat declined after having brought the maximum heat of the month on the 18th. At all except a few exposed spots on the coast the thermometer rose some way above 70°; at Killarney it reached 77°. This was the highest reading recorded during the whole summer in Ireland except 78° at the same station on June 22nd. During the greater part of the month the wind blew from some point between south-east and south-west, but after the 25th it veered round to the northward and reduced the temperature to a very low figure for the time of year. Many places had a maximum as low as 50°, while here and there the value was lower.

The mean minimum temperature was 13° below the mean maximum, showing a rather larger diurnal range than occurred in the summer months. Cold nights were seldom experienced, but on the 3rd there was a minimum temperature of 31° at Clongowes Wood, and quite late in the month the night readings were little above the freezing point in various localities inland.

*Rainfall* was much less than the normal. Over the country generally the percentage of the average was only 60. There were, however, not many consecutive days without rain, and more or less was measured over the country generally on 17 or 18 days. On the 22nd the fall was heavy along the western coast—52mm. at Valencia and 33 mm. at Blacksod—but as a rule the quantity on any one day was slight. In the Northern division the total fall was 46mm., and in the South 57 mm. Local thunderstorms occurred on the 1st and 24th.

*Bright Sunshine* exceeded the normal. In the Northern district the mean daily duration was 4·6 hours, or 0·8 hour in excess of the normal, while in the South it was 5 hours, an excess of 0·6 hour per day. On most days until the 11th the weather was brighter than in July and August.

#### THE QUARTER.

For the quarter as a whole the temperature was just equal to the average in the South, and 0·2° higher in the North. The total rainfall was 91 per cent. of the average in the North and 110 in the South. In both districts the number of days with rain exceeded the normal. Bright sunshine was not very divergent from the normal, the percentage being 96 in the North and 104 in the South, and the mean hours per day 4·0 in the former and 5·1 in the latter district.

\* Including accidental deaths, homicides, and suicides.

† The Returns for Killough District in Limerick Union, for Coolasey District in Limerick Union, and for Castlebar No. 2 District in Castlebar Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1914 have been adopted.

‡ Boundaries altered as from 1st April, 1915, by the transfer of a portion of the Registrar's District of Portstewart, in the Union of Coleraine and County of Londonderry, to the Registrar's District of Portrush, in the Union of Ballymoney and County of Antrim.

[illegible]

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES—continued.

COUNTIES -AND- SUPERINTENDENT REGISTRARS' DISTRICTS	Area in Statute Acres.	Popula- tion in 1911.	Mar- riages. Registered in the Quarter ending 30th June, 1915.	Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include													Number of Un- certified Deaths.	Number of successful Vaccinations in the Quarter ending 30th Sept., 1915.				
				Registered in the Quarter ending 30th Sept., 1915.	Averages in the Quarters the 10 years, 1905-1914.	Deaths of Infants under 1 year of age.	Persons aged 65 years and up- wards.	Enteric Fever. ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.\*

## I.—PROVINCE OF LEINSTER.

[illegible]

[illegible]

\* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispersary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 179 and 180 are extracted from the "Dublin Registration Area," the deaths in Public Institutions in these weeks extending from 4th July, 1915, to 2nd October, 1915. With the exception of 127 deaths of persons from localities outside the "Dublin Registration Area" from which the deceased were admitted, the deaths here have been assigned to the respective Districts comprised in the "Dublin Registration Area."

† Exclusive of 8 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

[illegible]

† See note (†) on page 179.

1866	5,522,942	2,700,565	2,822,377	1892	4,633,808	2,282,392	2,351,416				

NOTE.—This table has been constructed for the year 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851 ; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915.—In the exceptional circumstances of the present year the estimate of population for 1914 is still in use.

## APPENDIX.

### REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

#### I.—PROVINCE OF LEINSTER.

##### Carlow County.

CARLOW; *Bagenalstown*.—No epidemics during the quarter. District healthy.

CARLOW; *Borris*.—The health of this locality was very good during the quarter. We had no case of notifiable infectious disease. We had two or three cases of German measles.

CARLOW; *Fennagh and Myshall*.—The health of the district during the quarter was remarkably good.

CARLOW; *Leighlinbridge*.—Health of district fairly good.

NEW ROSS; *St. Mullins*.—A healthy quarter.

##### Dublin County.

BALROTHERY; *Kilsallaghan*.—An epidemic of whooping-cough.

CELBRIDGE; *Rathcoole*.—District healthy. Measles general first month of quarter, mild type.

DUBLIN, SOUTH; *Donnybrook No. 1*.—District healthy.

DUBLIN, SOUTH; *Tallaght*.—Sanitary arrangements good.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District healthy.

##### Dublin County Borough.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary condition of the district is very good. No epidemic has occurred in my district.

##### Kildare County.

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—District healthy; one case of scarlatina.

NAAS; *Ballymore Eustace*.—The district is healthy; no deaths were registered during the quarter.

NAAS; *Naas and Carragh, W*.—No prevalent disease during the past quarter.

NAAS; *Newbridge*.—Two deaths from cerebro-spinal fever were registered this quarter.

NAAS; *Robertstown and Kilmeage*.—Health and sanitary condition of district good.

##### Kilkenny County.

CALLAN; *Callan, W*.—No deaths were registered from tuberculosis.

CALLAN; *Kilmaganny*.—District healthy with exception of six cases of scarlet fever.

CARRICK-ON-SUIR; *Pilltown*.—There were a few cases of diphtheria and scarlatina; nine of the former, three of the latter.

CASTLECOMER; *Castlecomer, W*.—The death of a woman was registered in the district at the age of 106 years.

KILKENNY; *Freshford*.—There was no epidemic in the district during the past quarter.

KILKENNY; *Gowran*.—The sanitary arrangements in the district are good.

KILKENNY; *Tiscoffin*.—Whooping-cough is prevalent at present.

KILKENNY; *Tullaroan*.—Of the three deaths registered, one was from diphtheria and one from phthisis. District on the whole healthy during quarter.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District healthy.

THOMASTOWN; *Knocktopher*.—There were a few isolated cases of diphtheria, otherwise the district is in a very healthy condition.

URLINGFORD; *Balleen*.—The district is free from epidemic diseases.

URLINGFORD; *Urlingford, W.*—Health of the district good. No epidemics, except four cases of a mild form of scarlet fever, successfully treated in fever hospital.

WATERFORD; *Kilmakevoge.*—On the whole the health of the district has been very good. There have been a few isolated cases of scarlet fever which were promptly removed to hospital.

### King's County.

BIRR; *Frankford.*—The district is generally healthy.

BIRR; *Kinnitty.*—District healthy. A woman who died during the quarter had reached the age of 101 years. A very mild epidemic of scarlet fever occurred in July.

MOUNTMELICK; *Clonygowan No. 2.*—District healthy.

ROSCREA; *Roscrea No. 2.*—District very healthy.

ROSCREA; *Shinrone.*—Sanitary arrangements in the district fairly good. No infectious diseases prevalent.

TULLAMORE; *Clara.*—Sanitary arrangements fairly good.

TULLAMORE; *Phillipstown.*—District healthy and in a fairly sanitary condition.

TULLAMORE; *Tullamore, W.*—District very healthy for quarter.

### Longford County.

BALLYMAHON; *Abbeysrule.*—District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee.*—The sanitary condition of the district is fairly good. There were three deaths from scarlet fever during the quarter, but all precautions were used to keep it from spreading.

GRANARD; *Granard, W.*—The district is in a fair sanitary condition. Two deaths from scarlet fever occurred during the quarter.

GRANARD; *Scrabby, No. 2.*—Health of the district fairly good. One death from pulmonary tuberculosis recorded being that of a young woman of 27 years. Deceased belonged to phthisical family.

LONGFORD; *Killashee.*—Health of the district continues to be good.

### Louth County.

ARDEE; *Castlebellingham.*—Some cases of typhus in Lynn portion of district sent to union hospital, but one case, an old woman of 78 years, succumbed at her son's house. District at present healthy.

ARDEE; *Collon No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DROGHEDA; *Drogheda, No. 2.*—One death from membranous laryngitis returned under heading diphtheria.

DUNDALK; *Dundalk, W.*—One death in rural district from typhus fever. Health of district good.

### Meath County.

ARDEE; *Collon, No. 2.*—District in a very healthy state.

ARDEE; *Drumcondra.*—District in a very healthy state.

DROGHEDA; *St. Mary's.*—The sanitary state of district is good.

EDENDERRY; *Ballyboggan.*—Health of the district very good.

KELLS; *Moynalty.*—District healthy during quarter.

KELLS; *Nobber.*—District remarkably healthy.

NAVAN; *Painestown.*—The district has been free from epidemic disease during the quarter.

OLDCASTLE; *Oldcastle, W.*—District healthy.

TRIM; *Summerhill.*—District very healthy. No deaths from tuberculosis. Eight of the nine deaths were 65 years and upwards; an inquest was held on the ninth death.

### Queen's County.

ABBEYLEIX; *Durrow.*—Health of the district good.

ABBEYLEIX; *Rathdowney.*—The sanitary arrangements in the district are good.

ATHY; *Stradbally.*—The sanitary conditions are fair.

MOUNTMELICK; *Clonygowan, No. 1.*—District healthy.

ROSCREA; *Borris-in-Ossory.*—The health of this district has been good during the past quarter.

### Westmeath County.

ATHLONE; *Glassan.*—There has been an epidemic of whooping-cough in the district, but only one death has occurred from it.

DELVIN; *Clonmellon.*—Public health satisfactory.

GRANARD; *Finnea, No. 1.*—The district is very healthy.

MULLINGAR; *Ballynacarrigy.*—Both birth rate and death rate are low and below normal for this quarter. There was an epidemic of diarrhoea during September.

MULLINGAR; *Castletown Geoghegan.*—Seventy per cent. of the deaths occurred in persons aged 65 years and over. The district is healthy and free from zymotic diseases.

MULLINGAR; *Killucan.*—The general health of district good.

MULLINGAR; *Milltown.*—Diseases of the skin and teeth—toothache and carious teeth—in the number and severity of the cases—especially in the cases of tooth caries—show no signs of improvement. This is a trivial matter were it not for the increasing number of young people affected with this malady. In other respects the district is healthy—if some cases of rheumatism and chest complaints on account of the exceptionally wet July and August be excepted. No deaths from tuberculosis.

MULLINGAR; *Mullingar, W.*—Health of the district good.

MULLINGAR; *Multyfarnham*.—There is at present a local outbreak of diphtheria in one townland. The first two children to be attacked died; deaths not yet registered. One case died in my district, the other in the Mullingar Fever Hospital.

### Wexford County.

ENNISCORTHY; *Killann*.—Pneumonia prevalent.

GOREY; *Camolin*.—The sanitation of the district is excellent. The general health is good. The district is exceptionally free from infectious diseases.

GOREY; *Killenagh and Wells*.—District healthy.

NEW ROSS; *Fethard, No. 1*.—Sanitary condition of the district satisfactory.

NEW ROSS; *Fethard, No. 2*.—District healthy.

WEXFORD; *Bannow*.—The district continues in a healthy condition.

### Wicklow County.

BALTINGLASS; *Kiltegan*.—Health of district normal.

NAAS; *Blessington*.—The district healthy; no case of infectious disease.

RATHDOWN; *Delgany*.—Health of the district very good.

RATHDOWN; *Powerscourt*.—District healthy during quarter.

RATHDRUM; *Annamoe*.—District healthy during quarter.

## II. PROVINCE OF MUNSTER.

### Clare County.

BALLYVAGHAN; *Ballyvaghan, W*.—Health of district good during quarter.

CORROFIN; *Corrofin, W*.—District fairly healthy. A few cases of chicken-pox occurred.

ENNIS; *Crusheen*.—Health of the district satisfactory.

ENNIS; *Ennis No. 2*.—Epidemic of scarlatina in one village.

ENNIS; *Killaniv*.—The district is in good sanitary condition.

ENNIS; *Newmarket*.—District in a healthy condition.

ENNISTIMON; *Milltown Malbay*.—There has been no prevalent disease in the district. The district has been in a healthy condition.

KILLADYSERT; *Labasheeda*.—The health of this district continues good.

KILRUSH; *Carrigaholt*.—One case of scarlet fever and one of measles during past quarter—otherwise health of district continues very good.

KILRUSH; *Kilkee*.—The sanitary state of the district is good, but in the town of Kilkee a good many houses are still unconnected with the new sewerage system.

LIMERICK; *Bridgetown*.—District healthy. The sanitary condition of part of my district is not very good. A report has been made to the sanitary authority.

SCARRIFF; *Mountshannon, W*.—District still continues in a healthy state.

SCARRIFF; *Quin*.—Health of district good. Two cases of typhoid in Quin village, probably due to bad sanitation.

### Cork County and County Borough.

BANDON; *Innishannon*.—District healthy and in fair sanitary condition.

BANDON; *Kilbritten*.—District very healthy.

BANTRY; *Bantry, W*.—Sanitary condition of district is fairly good.

BANTRY; *Kealkill*.—District healthy.

CASTLETOWN; *Kilcatherine*.—District healthy.

CLONAKILTY; *Timoleague*.—There was an epidemic of measles in portion of the district in July and August.

CORK; *Blarney*.—Two cases of measles (one fatal) and one of diphtheria during the quarter. District otherwise healthy.

CORK; *Carrigaline No. 1*.—District very healthy.

CORK; *Carrigaline No. 2*.—The district is very healthy.

CORK; *Carrignavar*.—Three cases of scarlatina during quarter. District otherwise healthy.

CORK; *Dripsey*.—The sanitary condition of district is fairly good. There were three cases of diphtheria in one house, and a case of scarlatina also.

CORK; *Queenstown No. 2*.—Condition of district satisfactory.

DUNMANWAY; *Coolmountain*.—The district continues to be in a very healthy state.

DUNMANWAY; *Dunmanway, W*.—The sanitary condition of the district is fairly satisfactory. Measles was rather prevalent during the early portion of the quarter. Two deaths were registered as being due to this disease, a third being indefinite (no medical attendant).

FERMOY; *Rathcormack*.—District very healthy during quarter.

KANTURK; *Kanturk, W*.—There were some outbreaks of whooping-cough and scarlatina during the quarter.

KILMALLOCK; *Charleville*.—The district is healthy. We have had an outbreak of whooping-cough. There were two deaths from pneumonia.

KINSALE; *Ballyfeard*.—Very healthy district. No case of infectious disease. Good sanitary condition.

KINSALE; *Courceys*.—District healthy.

KINSALE; *Kinsale, W*.—Scarlatina prevalent during the quarter, also a few cases of cerebro-spinal meningitis.

MACROOM; *Clonmoyle*.—An epidemic of scarlet fever exists in my district since June last. Isolated cases are still breaking out in various parts, but the source cannot be found. Two cases of diphtheria were reported to me as having proved fatal in one village. The sewerage in this village is bad and badly wants looking after.

MACROOM; *Slieveveagh*.—Health of district generally good.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Buttevant*.—Scarlatina prevalent during the quarter.

MALLOW; *Doneraile*.—District healthy. Two cases of scarlatina occurred.

MALLOW; *Rahan*.—The district has been quite healthy during past quarter, but many cases of chicken-pox have occurred.

MIDDLETON; *Cloyne*.—The health of the inhabitants was exceptionally good during the quarter.

MIDDLETON; *Middleton No. 1, W.*—The health of the district has been very good during the past quarter.

SKULL; *Goleen*.—The district is in a very healthy condition, only two deaths having been registered for the quarter.

YOUGHAL; *Youghal, W.*—No fatal case of infantile diarrhoea or enteritis in the district during this summer, which I attribute to the very instructive circular issued by the Urban Council which I strongly urged the people to attend to.

### Kerry County.

CAHERSIVEEN; *Caher, W.*—The sanitary condition of the district is good.

CAHERSIVEEN; *Emlagh*.—District healthy. Sanitation much improved.

CAHERSIVEEN; *Glanbehy*.—District very healthy: sanitary state of the district good.

CAHERSIVEEN; *Valencia*.—The sanitary arrangements of the district are good and the district free from the diseases named in the abstracts.

DINGLE; *Castlegregory*.—District healthy.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—One death registered the age stated being 100 years; this can be verified.

KENMARE; *Kilgarvan*.—Some cases of scarlet fever occurred in the district during the quarter.

KILLARNEY; *Killorglin*.—District fairly healthy.

KILLARNEY; *Molahiffe*.—The sanitary condition of the district is satisfactory.

LISTOWEL; *Ballyhorgan*.—District healthy.

LISTOWEL; *Ballylongford*.—District healthy for quarter. Most of deaths from ripe old age.

LISTOWEL; *Listowel, W.*—An epidemic of enteric fever prevailed in urban and adjoining rural districts for three months ending August. The district has been otherwise healthy.

LISTOWEL; *Tarbert*.—Birth-rate unusually high.

TRALEE; *Castlemaine*.—District healthy.

### Limerick County and County Borough.

CROOM; *Castletown*.—No special disease prevalent. Sanitary condition good.

KILMALLOCK; *Bruff*.—District healthy. Whooping-cough prevalent during quarter.

KILMALLOCK; *Bruree*.—District healthy.

KILMALLOCK; *Hospital*.—District healthy, except for a couple of cases of diphtheria; one fatal case was not treated in time.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—For the past month there have been several cases of whooping-cough of a mild type. District otherwise healthy.

LIMERICK; *Annacotty*.—Sanitary arrangements good. District healthy.

LIMERICK; *Caherconlish*.—One death registered from phthisis, one from scarlet fever, and one from cerebro-spinal meningitis. The district is healthy and sanitary condition fairly good.

LIMERICK; *Clarina*.—District healthy.

LIMERICK; *Limerick No. 3*.—The health of my district during the quarter has been very good and the sanitary arrangements satisfactory.

LIMERICK; *Murroe*.—Sanitary condition good and district healthy. Two cases of phthisis registered.

LISTOWEL; *Glin*.—The district during the quarter just ended was remarkably free from the diseases usually considered infectious and contagious. There was one case of tuberculous meningitis.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy.

NEWCASTLE; *Ardagh*.—From the point of view of health and sanitation the district is satisfactory. During the quarter there were several cases of tonsillitis in children, all, with the exception of two, making a rapid recovery. In these two exceptions meningitis supervened with fatal results. People are being educated and are beginning to realise the danger to health of bad teeth, but of equal, if not of more importance, is the predisposition to many serious illnesses, in the presence of chronically enlarged tonsils in the youth; a state of affairs that the public at large do not yet attach sufficient importance to when medically advised and properly instructed.

NEWCASTLE; *Feenagh*.—The health of the district has been good during the quarter.

RATHKEALE; *Askeaton*.—During the past quarter two deaths were registered caused by phthisis pulmonalis, one by cancer in region of colon in an old woman 81 years of age. The age at death of one man was stated to be 94 years, which I think is a fact. The district during quarter was free from all contagious diseases.

RATHKEALE; *Pallaskenry*.—The sanitary condition of district is good. Of the four deaths registered uncertified the ages range from 76 to 90 years. I had attended each medically several times during past years, but was not present at last illness.

RATHKEALE; *Rathkeale No. 1, W.*—The district was healthy with the exception of epidemics of measles and scarlatina.

RATHKEALE; *Rathkeale No. 2*.—The district was in a healthy condition during the quarter. Two cases of measles in one family during the latter end of September.

TIPPERARY; *Grean*.—District healthy.

### Tipperary County, North Riding.

BORRISOKANE; *CloghJordan*.—District healthy.

BORRISOKANE; *Terryglass*.—District generally is very healthy and sanitary condition is good.

NENAGH: *Nenagh, W.*—District healthy; an odd case of whooping-cough has lately occurred.

NENAGH: *Newport.*—District at present is free from disease of any kind.

NENAGH: *Portroe.*—The sanitary condition of the district is good, and no cases of infectious diseases have occurred.

NENAGH: *Silvermines.*—District healthy. There was one case of scarlatina of a mild form in district during quarter.

THURLES; *Moyne.*—No prevailing disease.

### Tipperary County, South Riding.

CALLAN: *Ballingarry.*—The health of the district for the quarter has been good.

CALLAN: *Mullinahone.*—Health of district good; no disease prevalent. Number of deaths and births registered smallest for some time.

CASHEL: *Killenaule.*—District has been very healthy during past quarter.

CASHEL: *Kilpatrick.*—District was free from zymotic disease.

CLOGHEEN: *Caher.*—No case of an epidemic character occurred during the past quarter. Sanitary state of the district is satisfactory.

CLONMEL: *Kilsheelan No. 1.*—One case of enteric fever occurred.

TIPPERARY: *Cappagh.*—The district is healthy.

TIPPERARY: *Emly.*—District healthy. An increase in number of births.

URLINGFORD: *Kilcooly.*—Influenza prevalent during last month.

### Waterford County and County Borough.

CLONMEL; *Ballymacarbry.*—Sanitary condition good. No infectious diseases.

CLONMEL: *Kilsheelan No. 2.*—District healthy.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter.

KILMACKTHOMAS: *Bunmahon.*—District healthy. Of the three deaths registered from tuberculous disease two contracted the disease while at business in England, and the third while at business in Dublin, and in two of the families there was never a case of decline previously. The two children whose deaths were registered were of premature birth and were two of triplets.

LISMORE: *Ballyduff.*—Sanitation and general health of district satisfactory.

LISMORE: *Cappoquin.*—An epidemic of scarlet fever continued during the quarter.

LISMORE: *Tallow.*—District is in good sanitary condition except the town sewerage system, which requires to be improved.

WATERFORD: *Kilmeadan.*—During the past quarter the health of the district has been very good. Sanitary condition of district also good. No epidemics.

YOUGHAL: *Ardmore.*—District healthy.

YOUGHAL: *Clashmore.*—Measles prevalent in district.

### III. PROVINCE OF ULSTER.

#### Antrim County.

ANTRIM; *Crumlin.*—There were a number of cases of scarlet fever in the district during July with one fatality.

ANTRIM; *Doagh.*—The district has been practically free from infectious disease during the quarter, with the exception of a few cases of mild scarlatina and one of diphtheria.

ANTRIM; *Randalstown.*—No infectious disease at present in the district, with exception of a few cases of German measles.

ANTRIM; *Templepatrick.*—The sanitary arrangements of the district (with few exceptions) are good. Health of district satisfactory; no epidemic disease.

BALLYCASTLE; *Ballycastle, W.*—Whooping-cough very prevalent in the whole of the district.

BALLYMENA; *Ahoghill.*—One death at 103 years registered during the quarter. Health of district good.

BALLYMENA; *Ballymena, W.*—Town and district healthy. Registered one death at 100 years.

BALLYMENA; *Broughshane.*—An epidemic of measles and mumps during quarter. Pneumonia was prevalent during beginning of quarter.

BALLYMENA; *Clogh.*—District very healthy.

BALLYMENA; *Galgorm.*—Sanitary condition of the district is good. No zymotic disease.

BALLYMENA; *Glenwhirry.*—Health of district good. No epidemic disease.

BALLYMENA; *Portglenone.*—No outbreak of any infectious disease. The health of the district is good.

BALLYMENA; *Toome.*—The health of the district is satisfactory.

BALLYMONEY; *Dirraw.*—Sanitary arrangements good. The smallest death-rate in my term of office for over 30 years.

BELFAST; *Belfast Rural, No. 4.*—The sanitary arrangements in the district are fairly good. There were cases of diphtheria and scarlatina in the district during the quarter but no deaths from these causes.

LARNE; *Ballycarry.*—Sanitary condition of district fairly good. Birth and death rate low. Still some cases of scarlet fever about Whitehead.

LISBURN; *Dunmurry.*—The general condition of health of the district has been excellent; there have been fewer deaths registered during the past quarter than for any period for a very long time.

LISBURN; *Glenavy.*—The district has been healthy during the quarter.

LISBURN; *Lisburn, W.*—Two deaths registered as due to cerebro-spinal meningitis, one being inside the urban district and one from outside.

LURGAN; *Aghalee.*—District healthy.

#### Armagh County.

ARMAGH; *Blackwatertown.*—The district for the past quarter has been healthy. The child whose death was registered as due to enteritis was also certified as having had meningitis.

ARMAGH; *Keady*.—Seventeen cases of scarlatina were notified during the quarter, but I believe there were a number of cases of a mild type not reported.

ARMAGH; *Loughgall*.—Cancer prevalent throughout the district.

ARMAGH; *Markethill*.—The district has been fairly healthy during the quarter. One case of typhoid was removed to hospital, where the patient died.

ARMAGH; *Tynan*.—The health of the district during the past quarter has been highly satisfactory.

BANBRIDGE; *Tanderagee*.—Scarlatina, diphtheria, and whooping-cough occurred during the quarter.

LURGAN; *Lurgan, No. 2*.—The district is in a good healthy condition and free from any infectious disease.

NEWRY; *Forkill*.—No epidemic disease prevalent. District healthy.

NEWRY; *Mullaghglass*.—District healthy. Very little illness of any kind during the quarter.

### Belfast County Borough.

BELFAST; *Belfast Urban, No. 12*.—One death from cerebro-spinal meningitis.

### Cavan County.

BAILIEBOROUGH; *Bailieborough, W*.—The district is in a very healthy condition.

BAILIEBOROUGH; *Shercock*.—One case of diphtheria occurred during the last month of the quarter, which by having patient removed to hospital, house disinfected, and other sanitary precautions taken, did not extend.

BAWNBOY; *Swanlinbar*.—Sanitation of this district is fairly good.

CAVAN; *Bellananagh*.—Two cases of typhus fever occurred during the current quarter, both in the same house, one of the cases (the father) died in hospital; the other (a young child) recovered, otherwise district very healthy.

CAVAN; *Belturbet*.—The district is clean, healthy, and free from infectious diseases.

CAVAN; *Killashandra*.—The district is healthy. No epidemics. One death registered of a man found with his feet charred in his kitchen fire.

COOTEHILL; *Tullyvin*.—The deaths registered during quarter were, with one exception, of persons over 65 years.

ENNISKILLEN; *Dowra*.—The sanitary condition of the district is fairly good.

ENNISKILLEN; *Holywell, No. 2*.—District healthy.

GRANARD; *Finnea, No. 2*.—The district very healthy.

GRANARD; *Scrabby, No. 1*.—Health of the district good. Almost three times as many births as deaths recorded.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy.

### Donegal County.

DONEGAL; *Donegal, W*.—District healthy.

DONEGAL; *Dunkineely*.—Measles prevalent early in quarter, district otherwise healthy.

DONEGAL; *Laghy*.—Health of the district good.

DONEGAL; *Mountcharles*.—No outbreak of any infectious disease during the quarter. District healthy.

DONEGAL; *Pettigoe*.—District healthy.

DUNFANAGHY; *Dunfanaghy, W*.—Whooping-cough was prevalent during the quarter. There were several cases of scarlatina—one death—but generally of a mild type.

GLENTIES; *Carrick*.—Measles was prevalent in the district during July and August.

GLENTIES; *Dunglow, No. 1*.—In June there was an outbreak of typhus fever, probably carried to the first house by tramps. From the first family two others were directly infected. There were in all eight people affected, the seven who survived being sent to hospital in time.

GLENTIES; *Dunglow, No. 2*.—No epidemic of any kind during last quarter. General health of district good.

GLENTIES; *Glenties, W*.—Measles has been prevalent in the district during the first month of this quarter.

INISHOWEN; *Buncrana*.—Sanitation and health of urban and rural districts satisfactory.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—There was a mild epidemic of scarlet fever and also of whooping-cough.

LETTERKENNY; *Church Hill*.—District healthy, no epidemic.

LETTERKENNY; *Letterkenny, W*.—Epidemic of whooping-cough for past three months, with one death.

LETTERKENNY; *Manorcunningham*.—The sanitary state of the district is fairly good. Whooping-cough was prevalent during the quarter.

LONDONDERRY; *Kilderry*.—Pertussis very prevalent.

LONDONDERRY; *Killea*.—District healthy.

MILLFORD; *Rathmullan*.—One case of enteric fever and six cases of mild scarlatina have occurred in last month of quarter.

MILLFORD; *Rosguill*.—Of the thirteen deaths registered during the quarter, eight were upwards of 70 years of age. Of remaining five three died of pulmonary tuberculosis. District free from any infectious disease.

STRABANE; *Raphoe*.—Whooping-cough was very prevalent. Sanitation continues good.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. District healthy.

STRANORLAR; *Killygordon*.—This quarter has been remarkably healthy from the point of view of epidemics. I have not had to treat a single case of summer diarrhoea or zymotic troubles here during the time.

### Down County.

BANBRIDGE; *Ballyward*.—An unusually healthy quarter.

BANBRIDGE; *Dromore*.—With the exception of a few cases of scarlatina, the health of the district has been good.

BANBRIDGE; *Loughbrickland*.—A few cases of scarlet fever in district during quarter.

DOWNPATRICK; *Ballynahinch*.—There have been a few cases of whooping-cough in the district during the quarter, with one death. The birth rate is very much above the average and the death rate very much below.

DOWNPATRICK; *Clough*.—No zymotic disease.

DOWNPATRICK; *Downpatrick, W.*—The sanitary condition of the district is satisfactory. There has been no prevalence of infectious disease.

DOWNPATRICK; *Killyleagh*.—During the quarter this district has been practically free from disease. There have been a few cases of measles, confined to two families. Sanitary reforms are progressing slowly. The death rate unusually low.

DOWNPATRICK; *Portaferry*.—The health of the district was very good during the quarter. A few cases of whooping-cough occurred during last fortnight.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district good.

KILKEEL; *Rosstrevor*.—The sanitary arrangements are quite satisfactory. No epidemic of any kind, or even a sporadic case of infectious disease. Public health has been remarkably good during past quarter.

LISBURN; *Annahilt*.—The sanitary condition of the district is good.

LISBURN; *Ballylesson*.—The general health of the district is good. Diarrhoea and enteritis of children have shown a marked decrease as compared with previous seasons.

LISBURN; *Drumbeg*.—None of the infectious diseases mentioned in the abstracts occurred during the quarter, with the exception of one case of diphtheria.

LURGAN; *Moir*.—The health of the district has been good during the past quarter. The only death of a child under one year is that of a new born infant one hour and half old. The "large half" of the deaths were of persons over sixty-five years. A couple more were getting up towards that age.

LURGAN; *Waringstown*.—District healthy. During the quarter four cases of diphtheria and two of erysipelas were reported to me. Total deaths few—almost the lowest since the Registration Act came into force.

NEWRY; *Rathfriland*.—The sanitary condition of the district is good.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements good. Public health good.

NEWTOWNARDS; *Comber*.—There is a widespread epidemic of whooping-cough, otherwise district is very healthy. Only thirteen deaths during the quarter, I believe a record small number, and of these, six were over seventy years.

NEWTOWNARDS; *Greyabbey*.—One death registered, cause cerebro-spinal fever; another acute case of cerebro-spinal fever which was removed immediately to Purdysburn Fever Hospital recovered after treatment by serum. These cases occurred in Ballywater.

NEWTOWNARDS; *Kilmood*.—Health of district excellent.

NEWTOWNARDS; *Newtownards, W.*—It is three years since I had so few deaths in a quarter. I do not remember my district having been so free from sickness as it is at present. We have had practically no zymotic enteritis this year as yet. Domestic scavenging is undertaken now by the sanitary authority (urban). I consider the improved state of health of the people to be due to the improved sanitation and to the good water. It is also due no doubt to the increased knowledge which the people possess in matters pertaining to health. I hope to see still more reforms as time goes on. The substitution of water closets for privies will I hope in time be insisted upon by sanitary authorities. At present some hesitation is caused in this matter owing to doubt as to sufficient water supply.

### Fermanagh County.

ENNISKILLEN; *Ely*.—Health of district very good.

ENNISKILLEN; *Enniskillen, W.*—The district for the past quarter has been in a healthy condition—generally speaking there has been very little sickness.

ENNISKILLEN; *Florencecourt*.—District healthy.

ENNISKILLEN; *Holywell, No. 1*.—District healthy.

ENNISKILLEN; *Lisbellaw*.—Sanitary condition satisfactory.

IRVINESTOWN; *Clonelly*.—The district is in fair sanitary condition and free from contagious disease.

IRVINESTOWN; *Ederney*.—Acute tonsillitis prevalent during last month of quarter.

IRVINESTOWN; *Irvinestown, W.*—District healthy; free from epidemic.

LISNASKEA; *Derrylin*.—There were a few cases of scarlatina during the quarter. There is absolutely no effective means of checking such epidemics when they break out; otherwise there has been little illness, and a very low death rate.

LISNASKEA; *Lisnaskea, W.*—No case of infectious disease prevalent, with exception of two cases of diphtheria, which were removed to fever hospital.

### Londonderry County and County Borough.

COLERAINE; *Garvagh*.—Birth registration for quarter abnormally low. Scarlatina appeared in a family in July but did not spread. Diphtheria was introduced by a Scotch visitor and appeared in four families, with one death. No case now for a month, otherwise health of district very good.

COLERAINE; *Kilrea*.—District healthy. Of the deaths registered in the quarter, two-thirds of the ages ranged from 70 to 85 years.

COLERAINE; *Portstewart*.—District healthy.

LIMAVADY; *Ballykelly*.—Epidemic of scarlatina during the first two months of the quarter. During last month there was an epidemic of whooping-cough.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Limavady, W.*—Still a little scarlatina in the district.

LONDONDERRY; *Eglinton*.—Measles and whooping-cough very prevalent during the quarter.

LONDONDERRY; *Lower Liberties*.—Pertussis very prevalent; two deaths registered.

MAGHERAFELT; *Moneymore*.—Health of district has been very good throughout quarter—low death rate. Measles that was prevalent during previous quarter has disappeared. There has been no outbreak of any infectious disease. District at present very free from disease generally.

### Monaghan County.

CARRICKMACROSS; *Raferagh*.—The district has been remarkably free from all forms of infectious diseases.

CASTLEBLAYNEY; *Ballybay*.—Diphtheria and diarrhoea prevailed in town and country—no cases were fatal.

COOTEHILL; *Dawsongrove*.—Sanitary condition of the district fair. Scarlatina was prevalent during the quarter.

MONAGHAN; *Castleshane*.—District sanitary. Had an epidemic of influenza.

MONAGHAN; *Emyvale*.—During quarter some cases of mild scarlatina. Two cases of typhoid, otherwise district healthy.

MONAGHAN; *Kilmore*.—One case of diphtheria a week ago. One or two cases of scarlatina early in the quarter. Death rate very low for quarter, only four deaths registered.

MONAGHAN; *Monaghan, W.*—The sanitary conditions of this district are apparently satisfactory judging from the number of deaths during the quarter, there being all told only 25 deaths, and of this number seven occurred in the workhouse and five in the asylum, leaving only thirteen for remainder of district. One of these was a case of scarlatina which occurred in county fever hospital.

### Tyrone County.

CASTLEDERG; *Castlederg, W.*—The sanitary state of district satisfactory. Scarlatina has been very prevalent during past quarter; of mild type, but now diminished. Most of the cases were sent into fever hospital to prevent the spread of the disease, only two deaths from complications.

CASTLEDERG; *Drumquin*.—The sanitary condition of the district is fairly satisfactory; none of the infectious diseases mentioned in the abstracts being present, with the exception of a number of cases of scarlatina, mostly of a mild type.

CASTLEDERG; *Killeter*.—This district is in a healthy condition. In one-third of the deaths the age was over 80.

CLOHER; *Fivemiletown*.—The health of the district was very good during the quarter.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—The health of district very good. No zymotic diseases exist.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements in the district good. No infectious diseases.

DUNGANNON; *Coal Island*.—The number of deaths registered has been exceptionally low, probably the lowest on record in this district. There were two reported cases of infectious diseases; one of enteric fever and one of diphtheria.

OMAGH; *Drumquin*.—An outbreak of typhoid fever is apparently threatened, four cases occurring during the past week. There were a few cases of diphtheria lately, but it would seem to have abated. The district otherwise is fairly healthy.

OMAGH; *Omagh, No. 2*.—District healthy, no epidemic of any kind.

OMAGH; *Siamilecross*.—The dispensary district is in very good sanitary condition at present. Two cases of typhoid occurred during the quarter.

STRABANE; *Plumb Bridge*.—Some sanitary reports have not been complied with.

## IV. PROVINCE OF CONNAUGHT.

### Galway County.

BALLINASLOE; *Laurencetown*.—The district is in a good sanitary state and free from disease.

CLIFDEN; *Inishbofin*.—The health of district is good at present.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The district continues healthy.

GALWAY; *Oranmore*.—District continues healthy.

GALWAY; *Spiddle*.—One case of scarlatina in September. District otherwise healthy.

GALWAY; *Turloughmore*.—District sanitary.

GORT; *Kinvarra*.—Three deaths from cancer were registered—a rate exceptionally high for the district. Two deaths from tuberculosis occurred. The district is unfortunately scourged with this disease.

LOUGHREA; *Bullaun*.—Of the ten deaths registered, five were aged respectively 73, 74, 77, 82, and 93 years.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district very good.

OUGHTERARD; *Lettermore*.—Health of the district continues good.

OUGHTERARD; *Oughterard, W.*—The health of district has been good. One death from scarlatinal fever, one from pulmonary tuberculosis, one from breast cancer. There have been nine deaths of females to one male death; this is unusual.

PORTUMNA; *Portumna, No. 1, W.*—Sanitary condition of district fairly good.

TUAM; *Tuam, No. 1, W.*—Health of district was good during the quarter. No infectious disease.

### Leitrim County.

BALLYSHANNON; *Kinlough*.—Twelve deaths in district for quarter aged respectively 5 months, 30, 63, 71, 72, 74, 76, 79, 80, 82, 88, and 91 years.

BAWNBOY; *Ballinamore*.—In general the sanitary condition of the district is good. No epidemics prevailing.

CARRICK-ON-SHANNON; *Drumshanbo*.—One case of enteric fever occurred during the quarter. District healthy.

CARRICK-ON-SHANNON; *Jamestown, W.*—District healthy.

MANORHAMILTON; *Drumahaire*.—Whooping-cough is prevalent just now.

MOHILL; *Carrigallen*.—The health and sanitation of the district have been good during the quarter.

MOHILL; *Mohill, W.*—District free from diseases of any kind. Sanitary condition of district fairly good. No complaints up to the present.

MOHILL; *Rinn*.—The district is healthy and free from epidemics.

### Mayo County.

BALLINA; *Crossmolina*.—One case of enteric fever during quarter. Measles also prevalent.

BALLINROBE; *Ballinrobe, W.*—The sanitary arrangements are fair. The health of the district is good.

BALLINROBE; *Cong.*—Health of district good. Of the seven deaths over 65 years, 3 were over 90, 2 over 80, and one over 70 years of age.

BELMULLET; *Knocknolower*.—Scarlet fever is prevalent in the district, but only one fatal case has been recorded during the quarter.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—The death of a man aged 101 years was registered. The district is in a very healthy condition.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. Number of deaths exceptionally low. No zymotics, except one case of scarlet fever. Sanitation progressive, well marked improvement in the dwellings.

KILLALA; *Killala, W.*—Measles and whooping-cough prevalent in the district during the quarter. The sanitary arrangements are fairly satisfactory.

SWINEFORD; *Foxford*.—The general health continues good. No cases of infectious disease.

SWINEFORD; *Swineford, W.*—The health of district has been very satisfactory during past quarter. There was one isolated case of scarlatina registered.

WESTPORT; *Achill*.—The sanitary condition of the district is fairly good. Measles and influenza were very prevalent during this quarter.

WESTPORT; *Ballycroy*.—Health of district very satisfactory. Measles very prevalent early in quarter, mild type generally, one death.

WESTPORT; *Islandeady*.—The sanitation of the district is good.

WESTPORT; *Louisburgh*.—The sanitation of the district is satisfactory.

WESTPORT; *Newport*.—Death rate in district very small. Eight out of the 11 deaths reported averaged over 82 years. Their combined ages were 658 years.

WESTPORT; *Westport, W.*—District healthy.

### Roscommon County.

ATHLONE; *Kiltoom*.—Sanitary condition good. Unfortunately two cases of scarlatina occurred in district, happily both have recovered in hospital.

BALLINASLOE; *Creagh*.—The general health of the district has been good during the quarter.

BOYLE; *Boyle, No. 1, W.*—The general health of the district has been good during the past quarter, and there has been no epidemic of infectious disease.

CASTLEREAGH; *Frenchpark*.—There appears to be an increase in the number of cases of pulmonary tuberculosis.

CASTLEREAGH; *Loughglinn*.—This district has been free from disease for the quarter. There have been two sporadic cases of scarlatina.

ROSCOMMON; *Roscommon, W.*—District healthy. One death from cerebro-spinal fever. Two cases of German measles and one case of acute poliomyelitis came under my notice.

STROKESTOWN; *Roosky*.—The deaths are under the average for the past quarter. All the deaths recorded were of persons varying in age from 64 to 91 years. One death from meningitis and one from uterine tumour; both certified. District healthy.

STROKESTOWN; *Strokestown, W.*—The district is free from infectious disease.

### Sligo County.

BOYLE; *Gurteen*.—District healthy.

DROMORE WEST; *Easky, W.*—Health of district good.

DROMORE WEST; *Skreen*.—There was an epidemic of whooping-cough during the quarter affecting some adults. The health of the district otherwise is good.

SLIGO; *Carney, No. 2*.—The district is in a healthy condition.

SLIGO; *Collooney*.—Six cases of scarlatina and one of enteric fever during September.

SLIGO; *Riverstown*.—There were 21 cases of scarlatina during the quarter; one of the children died in this district (not yet registered) and the other two in Sligo Fever Hospital. District now free from zymotic disease.

TOBERCERRY; *Aclare*.—The health of the district is now fairly good. An epidemic of scarlet fever occurred during the first two months of the quarter, from which happily no death took place. Sanitation is improving.

TOBERCERRY; *Coolaney*.—Sanitation satisfactory. Health of district good.

1915.]  
4th Quarter.

*Price One Shilling.*

**Marriages:**—JULY, AUGUST, SEPTEMBER, 1915.      **Births and Deaths:**—OCTOBER, NOVEMBER, DECEMBER, 1915.

During the quarter ended 31st December last, there were registered in the 831 Registrars' Districts in Ireland 21,483 births—a number equal to an annual birth-rate of 19·6 in every 1,000 of the estimated population.\* The birth-rate for the year 1915 was 21·8 per 1,000. Both for the whole year and for the quarter just ended, the birth-rate is the lowest ever recorded for Ireland. There were 17,529 deaths, during the quarter, representing an annual rate of 16·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,087 persons emigrated, 2,028 of these going to the United States, and 1,059 to Great Britain and the Colonies.

In England and Wales last quarter, the birth-rate represented was 19·5 in every 1,000 of the estimated population, and the death-rate 14·6 per 1,000.

The birth-rate in Ireland for the quarter is 2·3 below the average rate for the corresponding quarter of the ten years, 1905–1914, and 1·8 below the rate for the fourth quarter of 1914. The deaths are 208 above those registered in the corresponding quarter of 1914; the death-rate is 0·2 above the rate for that quarter, and is equal to the average for the fourth quarter of the ten years, 1905–1914.

In comparison with those for the corresponding quarter of 1914, the returns of pauperism furnished by the Local Government Board show a decrease of 2,458 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,533 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years, 1905–1914, the number of Workhouse inmates shows a decrease of 9,173, and the number of persons on out-door relief shows a decrease of 12,689, the total under both heads being 24·5 per cent. under the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0·1 per cent.

\* See page 290.

The annual rate (5·6 per 1,000 of the population) represented by the marriages registered during the third quarter of 1915, is 0·6 above the average rate for the corresponding quarter of the preceding ten years.

\* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry Co. and Co. Borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1911.

## MARRIAGES.

The Marriages (6,106) registered in Ireland during the third quarter of 1915 are equivalent to an annual rate of 5·6 per 1,000 of the estimated population, being 0·5 above the rate for the corresponding quarter of 1914, and 0·6 above the average rate for the third quarter of the ten years 1905–1914. Of the total number of marriages, 4,141 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,965 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 5·1 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·9 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·7 above, and that under the latter heading 0·3 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1905–1914, and the average number for that period, also the number registered in the first, second, and third quarters of 1915.

## BIRTHS.

The number of births registered during the quarter ended 31st December last was 21,483—11,215 boys and 10,268 girls—being equal to an annual ratio of 1 in every 51.0, or 19.6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1905–14, was 23,956, equivalent to an annual rate of 21.9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces\* last quarter are—Leinster, 19.7 per 1,000 of the population according to the Census of 1911; Munster, 19.3; Ulster, 19.7; and Connaught, 19.4.

The highest county or county borough birth-rate\* is 25.4 for Dublin county borough, and the lowest 15.3 for Westmeath county. Of the intermediate rates the highest five are—Belfast county borough, 22.3; Limerick county and county borough, 20.7; Mayo, 20.6; Kilkenny, 20.5; and Kerry, 20.4. The lowest five are—Dublin county, 15.5; Kildare, 16.3; Clare, 17.0; Monaghan, 17.0; and Fermanagh, 17.2.

## DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 17,529—8,784 males and 8,745 females—affording an annual ratio of 1 in every 62.5, or 16.0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1905–14, was also 16.0 per 1,000.

The death-rate in Leinster was 18.2 per 1,000 of the population according to the Census of 1911; in Munster, 14.5; in Ulster, 16.5; and in Connaught, 12.9.

The county or county borough death-rates\* range from 10.9 in Kerry to 24.0 in Dublin county borough. Between these rates the lowest five are—Leitrim, 11.8; Mayo, 12.1; Clare, 12.6; Roscommon, 13.1; and Galway, 13.4; and the highest five are—Belfast county borough, 18.1; Westmeath, 17.9; Waterford county and county borough, 17.7; Wexford, 17.6; and Monaghan, 17.3.

\* See note (\*) on page 226.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1905–1914, and the average number for that period; also the number registered during each quarter of the year 1915:—

1915, .. ..	23·5	23·4	20·8	19·6	21·8	22·1	18·1	13·4	16·0	17·4

AGES.—Of the 17,529 deaths registered last quarter, 1,974, or 11·3 per cent., were of infants under one year of age; and 7,393, or 42·2 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 91·9 per 1,000 of the births registered. In the province of Leinster the number of deaths of infants under one year old equalled 12·7 per cent. of the total deaths registered therein; in Munster, 10·6 per cent.; in Ulster, 11·8 per cent.; and in Connaught, 7·0 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37·9 per cent.; in Munster, to 44·2 per cent.; in Ulster, to 40·9 per cent.; and in Connaught, to 53·9 per cent. of the total deaths registered in the province.

### HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases\* is 1,018, and is equivalent to an annual rate of 0·93 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the December quarter of 1915, also the average number of deaths registered from each of these diseases in the corresponding period of the 5 years, 1910–1914.

Name of Disease.	Number of Deaths in December quarter, 1915.	Average number of Deaths in December quarter of the 5 years, 1910–1914.
Enteric Fever, .. ..	73	79
Typhus, .. ..	6	11
Small-pox, .. ..	—	—
Measles, .. ..	146	175
Scarlet Fever, .. ..	138	110
Whooping-cough, .. ..	167	144
Diphtheria, .. ..	103	91

\* See note (†) on page 233.

**ENTERIC FEVER.**—Deaths from enteric fever numbered 73, being 6 below the average for the fourth quarter of the 5 years, 1910–14, the number of deaths from this disease in the first three quarters of 1915 amounting to 60, 45 and 33, respectively. The unions or superintendent registrars' districts in which 2 or more deaths from enteric fever occurred were as follows :—Dublin South (11), Dublin North (3), Listowel (7), Cork (3), Limerick (3), Lisburn (3, all appertaining to Belfast County Borough), Londonderry (3), Omagh (3), Ballina (2), Boyle (2), Drogheda (2), Loughrea (2), Newry (2), and Thurles (2).

**TYPHUS.**—Six deaths from this disease were registered during the quarter. In the union of Urlingford, 3 deaths occurred, and in the unions of Castletown, Cavan, and Longford one death each. The average number of deaths from this cause in the fourth quarter of the preceding five years was 11, and in the first, second, and third quarter of the year 1915, they numbered 17, 6, and 8, respectively.

**SMALL-POX.**—No mortality from small-pox was recorded, but the Registrar of Lisnaskea district reports the presence of the disease in his district as follows :—“ Five cases of small-pox in district during latter part of quarter. They have been removed to Fever Hospital, and there is no further spread of disease. Source of disease is not ascertained.”

**MEASLES.**—This disease caused 146 deaths, representing an annual rate of 0·13 per 1,000 of the population. Sixty-three of these deaths occurred in the union of Dublin South, 17 in Dublin North and 41 in Belfast. Thus, 121 deaths, or 83 per cent. of the total of Ireland, occurred in the three unions containing the cities of Dublin and Belfast. The 146 deaths from measles registered during the quarter are 29 below the average for the fourth quarter of the five years, 1910–14, the numbers recorded during the first three quarters of the year 1915 being respectively 174, 170 and 83.

**SCARLET FEVER.**—There were 138 deaths from this cause during the quarter, affording an annual rate of 0·13 per 1,000 of the population. As compared with the average for the corresponding quarter of the preceding five years there is an increase of 28, but when compared with the fourth quarter of 1914, a decrease of 28 is shown. In the first, second and third quarters of 1915, the deaths from scarlet fever numbered 104, 77 and 89, respectively. Of the 138 deaths, 34 occurred in Belfast union, 20 in Lisburn (including 18 appertaining to Belfast City), 10 in Dublin North, 2 in Dublin South, 7 each in Cork and Ennis, 6 each in Longford, Newtownards and Sligo, and 4 in Clones.

**WHOOPING-COUGH.**—Deaths from whooping-cough numbered 167, equivalent to an annual rate of 0·15 per 1,000 of the population, and are 23 above the average (144) for the fourth quarter of the preceding five years. In the first, second and third quarters of the year 1915 such deaths amounted to 271, 179 and 144, respectively. Of the 167 deaths from this disease, 26 were registered in Belfast union, 16 in Londonderry union, 12 in Dublin North, 8 in Dublin South, 10 in Ballymena, 8 each in Kilmallock, Limerick and Lurgan, and 7 in Carrick-on-Suir.

**DIPHTHERIA.**—The mortality from diphtheria during the quarter amounted to 103 deaths, equivalent to an annual rate of 0·09 per 1,000 of the population. The 103 deaths are 12 above the average (91) for the corresponding quarter of the preceding five years, and 3 above the number registered during the fourth quarter of the year 1914. In the first, second and third quarters of 1915 the deaths from this cause were, respectively, 93, 68 and 53. In the following unions 2 or more deaths from diphtheria were registered during the quarter :—Cork, 12 deaths; Lisburn, 9 (7 appertaining to Belfast City), Dublin South 8, Dublin North 7, Newtownards 5, Sligo 4, Castlebar 3, and 2 deaths each in the unions of Bantry, Belfast, Carrick-on-Suir, Dunmanway, Glennamaddy, Glenties, Larne, Lurgan, Macroom, Midleton, Milford, Monaghan, Mullingar, Rathdrum, Thurles and Waterford.

**DIARRHŒAL DISEASES.**—The deaths returned as from diarrhœal diseases (385) include 334 deaths of children under 2 years of age from diarrhœa and enteritis. The deaths from the latter for the corresponding quarter of the four years, 1911–14, averaged 389.

**TUBERCULOSIS.**—The deaths from tuberculous disease during the quarter, as returned by the registrars, amounted to 2,039, a number equivalent to an annual rate of 1·86 per 1,000 of the population, the average number for the corresponding quarter of the past five years being 2,017. Deaths from tuberculous disease in the first, second and third quarters of 1915 were respectively, 2,483, 2,718 and 2,016.

CANCER.—There were 907 deaths from cancer, affording an annual rate of 0·83 per 1,000 of the population. In the three preceding quarters the equivalent annual rates were 0·80, 0·77 and 0·79.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district (Lisnaskea), enteric fever in 13 districts, typhus in 4, measles in 17, scarlet fever in 57, whooping-cough in 28, diphtheria in 23, mumps in 5, German measles in 4, influenza in 15, and chicken-pox in 2. [See Appendix to this Report commencing on page 291.]

INQUESTS.—There were 418 inquests reported to the Registrars during the quarter; this number being equal to one in every 41·9 of the total deaths registered.

In Leinster there was one inquest to every 42 deaths registered, in Munster one to 60, in Ulster one to 32, and in Connaught one to 79.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 17,529 deaths registered, 3,776, or 21·5 per cent., occurred in public institutions. In Leinster the percentage was 29·2, in Munster 25·7, in Ulster 15·6, and in Connaught 12·6.

UNCERTIFIED DEATHS.—According to the returns, 3,856 of the 17,529 deaths which were registered during the quarter were uncertified, being 22 per cent. of the total. In Leinster the percentage was 15, in Munster 25, in Ulster 18, and in Connaught the uncertified deaths were 48 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1915, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhoeal Diseases.	Total

## VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1915, there were 16,549 persons successfully vaccinated.

## EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st December last was 3,087 (1,908 males and 1,179 females), being 170 less than in the corresponding quarter of the year 1914, and 1,664 below the average number for the fourth quarter of the ten years 1905-1914.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1914 and 1915 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.			
	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.	1914.	1915.	In-crease.	De-crease.
October,	1,399	1,003	—	396	932	701	—	231	2,331	1,704	—	627
November,	408	777	369	—	262	366	104	—	670	1,143	473	—
December,	157	128	—	29	99	112	13	—	256	240	—	16
TOTAL,	1,964	1,908	—	56	1,293	1,179	—	114	3,257	3,087*	—	170

\* Including 2,028 emigrants to the United States of America, and 1,059 to Great Britain and the Colonies. Of the former 1,165 left in the month of October, 826 in November, and 37 in December. Of 2,011 steerage passengers to the United States, 151 had their passages paid for in America.

## PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 8*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited), bread, delivered. In the fourth quarter of the year 1914 the average price for both firms was 6½*d.*, and in the corresponding quarter of 1905 it was 6*d.*

The average price of oatmeal (1st quality) in Dublin for the first eleven weeks of the quarter was 21*s.* per cwt. For the fourth quarter of the year 1914 the average price was 16*s.*, and for the fourth quarter of 1905 the average price was 14*s.* 6*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 6*d.* to 3*s.* 10*d.* In the fourth quarter of 1914 the average prices were 2*s.* 11*d.* to 3*s.* 9*d.*, and the prices for the corresponding quarter of 1905 were 2*s.* 1*d.* to 2*s.* 6*d.*

The average price per cwt. of beef at the Dublin Cattle Market was 43*s.* to 45*s.* 6*d.*, as against 48*s.* 6*d.* to 67*s.* 6*d.* for the fourth quarter of 1914, the price for the fourth quarter of 1905 ranging from 47*s.* 6*d.* to 53*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin ranged from 32*s.* to 34*s.* per ton nett.

The minimum price of Consols, which was fixed by the Treasury, in January, at £68½, was taken off on the 23rd November. The highest price of Consols for quarter was £65, and the lowest was £57.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter was 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1915 was 31,602 or 2,458 below the average for the corresponding period in 1914.

The average weekly number of persons receiving out-door relief during the quarter was 35,907, being 1,533 below the average for the fourth quarter of 1914.

Of the persons receiving in-door relief during the fourth quarter of 1915, an average number of 1,610 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1914 the average weekly number was 1,666.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1915, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.	
									NO. OF PERSONS RELIEVED.	
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			In-door.	Out-door.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,\* Phoenix Park, Dublin, during the fourth

\* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1910 to 1915, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 241).

The mean height of the barometer during the fourth quarter of 1915 was 29·767 inches, being 0·023 above the average for the corresponding quarter of the five years 1910–1914; the highest reading (30·538 inches) was on the 21st November, at 9 A.M., and the lowest (28·625 inches) on the 24th December, at 9 P.M.

The mean temperature of the air during the quarter was 43·4°, being 1·4° below the average for the fourth quarter of the 5 years, 1910–1914.

The maximum heat in sun was 109·0°.

Rain or snow fell on 62 days during the quarter. The rain-fall measured 12·907 inches being 3·715 inches above the average for the fourth quarter of the five years, 1910–1914. The greatest monthly rainfall was in December, when 4·907 inches were registered.

*October.*—The mean height of the barometer during this month was 29·937 inches; the highest reading (30·402 inches) was on the 18th; and the lowest (29·352 inches) on the 28th. The mean temperature of the air was 51·0°. The 17th was the warmest day, and the 29th and 30th the coldest nights. The mean of the dry bulb was 47·9° and of the wet bulb, 46·5°. The maximum heat in the sun was 109·0°, and the minimum on the grass 24·8°. The total amount of sunshine recorded was 83·7 hours, the greatest daily amount being 9·5 hours on the 6th. The minimum on the grass was below 30° on 2 nights. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain fell on 21 days. The rain-fall measured 4·024 inches; the greatest amount in 24 hours was 0·732 inch.

*November.*—The mean height of the barometer during this month was 29·849 inches; the highest reading (30·538 inches) was on the 21st, at 9 A.M., and the lowest, (28·852 inches) on the 29th, at 9 P.M. The mean temperature of the air was 38·4°, the maximum registered was 59·5°, and the minimum 18·2°. The 8th was the warmest day, and the 18th the coldest night. The mean of the dry bulb was 37·8°, and of the wet bulb 36·3°. The maximum heat in sun was 90·8°, and the minimum on the grass 14·8°. The total amount of sunshine recorded was 85·7 hours, the greatest daily amount being 7·2 hours on the 2nd. The minimum on the grass was below 30° on 14 nights. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain fell on 13 days. The rain-fall measured 3·976 inches; the greatest amount in 24 hours was 1·902 inches on the 12th.

*December.*—The mean height of the barometer during this month was 29·515 inches; the highest reading (30·507 inches) was on the 19th, at 9 A.M., and the lowest (28·625 inches) on the 24th, at 9 P.M. The mean temperature of the air was 40·9°, the maximum registered was 53·9°, and the minimum 24·2°. The 5th was the warmest day, and the 9th was the coldest night. The mean of the dry bulb was 41·2°, and of the wet bulb 40·3°. The maximum heat in sun was 71·0°, and the minimum on the grass 17·7°. The total amount of sunshine recorded was 56·2 hours, the greatest daily amount being 6·4 hours on the 8th. The minimum on the grass was below 30° on 11 nights. The maximum ozone was 1·0, the minimum 0·0, and the mean 0·5. Rain or snow fell on 28 days. The rain-fall measured 4·907 inches; the greatest amount in 24 hours was 0·571 inch.

\* See note (†) on page 233.

† See note (4) on page 233.  
‡ The rates for the total of Ireland and those for the districts in the Dublin Registration Area, for Belfast and Londonderry, have been calculated on the population estimated to the middle of 1915.  
(a) Including 13 deaths from cerebro-spinal fever or cerebro-spinal meningitis in Dublin Registration Area and one death from cerebro-spinal meningitis in Cork.  
(b) Including the deaths of 6 persons from enteric fever, 3 from measles, 54 from scarlet fever, 22 from diphtheria, 4 from tuberculous disease, one from diarrhoea and 30 from cerebro-spinal fever or cerebro-spinal meningitis admitted from the City of Belfast to the hospital for infectious diseases at Purdy'sburn, in the Registrar's District of Ballypessan, and Union of Lisburn, and the deaths of 9 persons from cerebro-spinal fever or cerebro-spinal meningitis registered in Belfast.

## METEOROLOGY.

[Prepared in the Meteorological Office under the direction of Sir Napier Shaw, F.R.S.]

OCTOBER.—Considered generally, the weather was quiet for the time of year, violent storms being seldom experienced, while the main direction of the wind was more southerly than usual. Temperature was mostly above the average; there were very few fine, dry periods; rainfall was heavier in the south than in the north; and the duration of bright sunshine below the average in both districts.

*Temperature.*—Until the advent of the last week the temperature was  $2^{\circ}$  or  $3^{\circ}$  above the average, and the mean for the whole month,  $49^{\circ}\cdot 2$  in the north, and  $50^{\circ}\cdot 6$  in the south, was  $1^{\circ}$  above the average in both divisions. Some of the earlier days were very warm, the thermometer rising to a maximum between  $65^{\circ}$  and  $68^{\circ}$ . Scarcely any frost was recorded by the sheltered thermometer until the month drew towards its close, when it became rather general, and at Kilkenny there was a minimum of  $26^{\circ}$ . The mean temperature for the week ending the 16th was  $52^{\circ}\cdot 9$ , or more than  $3^{\circ}$  above the average, and that for the 24th to 30th  $44^{\circ}\cdot 5$ , or  $3^{\circ}$  below.

*Rainfall.*—The total amount of rain was larger in the south than in the north. In the former division it was only 86 per cent. of the average, but in the latter the percentage was 134. In the north, 18 days with more or less rain yielded 84 mm., while in the south 20 days gave 131 mm. Some heavy falls occurred over a large area in the south on the 7th—as much as 58 mm. at Waterford—and some further heavy downpours on the 19th and 20th—31 mm. at Dublin, 26 mm. at Ballinacurra, and 42 mm. at Valencia. Heavy local falls were recorded on the 27th in the north. At Donaghadee there was 26 mm., and at Foffany (County Down) as much as 90 mm. On the 30th there was a further heavy fall in the south—25 mm. in some parts of Waterford. At Valencia, the wettest station, the total fall for the month was 247 mm., an excess of 108 mm. over the average, while at Armagh, the driest spot, the total was only 40 mm., or 42 mm. less than the average.

*Bright Sunshine.*—Very bright days were rare, and at all the observing stations, except Birr Castle, the record of sunshine was less than the normal, the deficit being 0·4 hour per day in the north, and 0·2 hour in the south. In the north the mean daily duration was 2·5 hours, and in the south 3·1 hours. The longest duration of sunshine in any one week was recorded at Phoenix Park, Dublin, from the 10th to 16th, the mean daily amount reaching 5·3 hours.

NOVEMBER.—The chief characteristics of the weather were the low temperature, the absence of boisterous winds and gales, and the frequent days with little or no rain.

*Temperature.*—Readings as high as those of a normal November were seldom experienced, and for the month, as a whole, the results were much below the average. During the third week the divergence exceeded  $7^{\circ}$ , and at other times was between  $3^{\circ}$  and  $4^{\circ}$ . At Dublin the mean for the week ending the 20th was as low as  $35^{\circ}$ , or  $11^{\circ}$  below the average, while at Armagh it was  $33^{\circ}\cdot 2$ , or  $10^{\circ}\cdot 5$  below. Temporarily on the 7th or 8th the thermometer rose to above  $50^{\circ}$ , the highest point attained being  $59^{\circ}$  at Waterford. Subsequently the daily maxima were generally below  $45^{\circ}$ , and occasionally some degrees below  $40^{\circ}$ . At Armagh on the 17th the highest reading was  $29^{\circ}$ . Sharp frost occurred locally on the 3rd, and during the latter half of the month it was widespread and more frequent. Several localities recorded readings below  $20^{\circ}$ . At Lisburn on the 17th the reading was  $16^{\circ}$ , at Armagh  $18^{\circ}$ , at Clongowes Wood  $18^{\circ}$  on the 18th, and at Phoenix Park  $19^{\circ}$ . The mean for the month in the northern division was  $40^{\circ}\cdot 2$ , and in the south  $40^{\circ}\cdot 9$ , the respective differences from the average being  $-3^{\circ}\cdot 9$  and  $-4^{\circ}\cdot 4$ .

*Rainfall.*—Only one week—the second—was generally wet, the earlier and later parts of the month bringing little rain. In the north the aggregate fall was 73 mm., and in the south 100 mm., the former being 27 mm. and the latter 5 mm. less than the average. Over the country generally there were 14 or 15 days with more or less rain, but in the east several stations had less than 10 days. At Lisburn and Belfast there was a spell of 12

rainless days after the 15th or 16th. Heavy, continuous rain was rarely experienced, but an exception occurred on the 11th and 12th. On these dates heavy downpours were common over the southern half of the country, and the combined fall of the two days yielded more than 70 mm. over a very wide area.

*Bright Sunshine.*—For the month as a whole the duration of sunshine was above the normal. In the north the mean daily amount was 2·4 hours, and in the south 2·7 hours, the excess over the average being half an hour per day. During the brightest week, which was also the coldest, the mean daily duration was as high as 4 hours both in the north and south.

DECEMBER.—At the close of November the quiet, dry and cold weather came to an end, and it was succeeded by a stormy, wet month, gales being numerous and often severe, and the rainfall everywhere well above the normal, while both the temperature and the bright sunshine equalled the average.

*Temperature* was deficient during the first half, then rose rather decidedly, so that the close of the month was from 5° to 7° warmer than the middle period. Afternoon readings above 50° were recorded frequently; on the 9th Killarney touched 55°, and Cahirciveen 56°; and on the 31st readings about 55° were common. During the first three weeks frosts were frequent, being severe after the middle of the month, the shade minima being below 25° in many places, 19° at Markree Castle on the 19th, and 20° at Birr Castle on the 20th. The cold was just balanced by the mildness at other times, so that the results for the whole month were normal.

*Rainfall* was frequent, from 25 to 30 days at nearly all stations, and the total fall for the month was 141 per cent. of the normal in the north, and 137 per cent. in the south. Markree Castle registered 188 mm., and Killarney 231 mm., against 108 mm. at Birr Castle, and 113 mm. at Kilkenny.

*Bright Sunshine* differed from the daily average by only a few minutes. Phoenix Park was the most sunny locality, with 1·8 hour per day, and Markree Castle the least, with 1·1 hour.

## THE QUARTER.

Owing to the severity of the November cold the temperature for the whole quarter was more than a degree below the average in the north and in the south. The rainfall over Northern Ireland amounted to 294 mm., practically normal, 101 per cent., while Southern Ireland had 388 mm., or 123 per cent. In both regions the rainfall frequency was 60 days. In the north the mean daily duration of sunshine was 2 hours, exactly the average, and in the south 2·4 hours, or 104 per cent. The values for the corresponding period in each of the preceding four years show no material variations on these figures.

**MARRIAGES** Registered during the Quarter ending 30th September, 1915, in PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1915; Deaths from ENTERIC FEVER, TYPHUS, SMALL-POX, MEASLES, SCARLET FEVER, WHOOPING-COUGH, DIPHTHERIA, DYSENTERY, TUBERCULOUS DISEASE, CANCER, DIARRHŒA AND ENTERITIS OF CHILDREN under 2 years, DIARRHŒA OF PERSONS aged 2 years and upwards; also VIOLENT DEATHS,\* INQUEST CASES, DEATHS IN PUBLIC INSTITUTIONS, and NUMBER OF UNCERTIFIED DEATHS Registered during the Quarter ending 31st December, 1915, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS OF IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

PROVINCES and COUNTIES.	Area in Statute Acres.	Popula- tion in 1911.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include												Deaths in Public In- stitutions.	Number of Un- certified Deaths.	Number of successful primary Vaccinations in the Quarter ending 31st Dec., 1915.				
			Averages in the Quarters ending 30th Sept., 1914. the 10 years, 1905-1914.	Registered in the Quarter ending 30th Sept., 1915.	Averages in the Quarters ending 31st Dec., in the 10 years, 1905-1914.	Registered in the Quarter ending 31st Dec., 1915.	Deaths of		Deaths from																		
							Infants under 1 year of age	Persons aged 65 years and upwards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Diarrhoea and Enteri- tis of Children under 2 years of age.	Dysentery, 2 years of age and upwards.				Violence.*

\* The Registrars' Districts (831 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 255 and 256 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 3rd October, 1915, to 1st January, 1916. With the exception of 143 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these Districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

that Exclusive of 10 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

1866	5,522,942	2,700,565	2,822,377	1892	4,633,808	2,282,392	2,351,416				

NOTE.—This table has been constructed for the year 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1914.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

1915.—In the exceptional circumstances of the present year the estimate of population for 1914 is still in use.

## APPENDIX.

### REGISTRARS' NOTES.

*On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.*

*In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.*

The Registrars alone must be considered responsible for the opinions which they express.

*Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.*

#### I.—PROVINCE OF LEINSTER.

##### Carlow County.

CARLOW; *Bagenalstown*.—During the quarter the district has been free from infectious diseases.

CARLOW; *Borris*.—The quarter was a healthy one. There were some cases of German measles in a part of this district. There was no notifiable infectious case.

CARLOW; *Fennagh and Myshall*.—The ages of the deceased persons are, I think, worthy of remark. Of the nine deaths registered, seven were of persons over seventy-five years, two being ninety-seven and ninety-six respectively, and four over eighty.

CARLOW; *Leighlinbridge*.—Health of district fairly good.

CARLOW; *Tullow*.—Health of district is good.

##### Dublin County.

BALROTHERY; *Kilsallaghan*.—Epidemic of whooping-cough.

CELBRIDGE; *Rathcoole*.—A good deal of influenza during quarter.

DUBLIN, SOUTH; *Tallaght*.—There have been no epidemics of any sort in this district since last quarter.

##### Dublin County Borough.

DUBLIN, SOUTH; *New Kilmainham*.—The sanitary arrangements are good. There has been no epidemic in district.

##### Kildare County.

NAAS; *Ballymore Eustace*.—Health of the district remains good.

NAAS; *Naas and Carragh, W.*—No prevailing disease during the past quarter.

NAAS; *Newbridge*.—Owing to the large military element in the married population normally, there has been a great reduction in the number of births since the war.

NAAS; *Robertstown and Kilmeage*.—Health of district good.

##### Kilkenny County.

CALLAN; *Callan, W.*—District healthy. The death of a man at 106 years was registered.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Pilltown*.—Health of district in general very good. Sanitation also very good.

CASTLECOMER; *Castlecomer, W.*—The district at present is in a healthy state.

KILKENNY; *Freshford*.—Whooping-cough prevalent during the quarter, and there were a good many cases of influenza. One death from pulmonary tuberculosis was registered. The sewerage of the village is not satisfactory.

KILKENNY; *Gowran*.—The sanitary arrangements in the district are good.

KILKENNY; *Tullaroan*.—Births over average; deaths below average. District very healthy for quarter and free from all contagious disease.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Invistioge*.—Measles is prevalent in the district at present.

THOMASTOWN; *Knocktopher*.—Whooping-cough has been very prevalent during the quarter just ended, also influenza and sore throat. Sanitary arrangements very satisfactory.

URLINGFORD; *Urlingford, W.*—Some cases of typhus fever were treated in the fever hospital, from Kilcooly district, three of which terminated fatally.

WATERFORD; *Ullid*.—The provisions of the Tuberculosis Act are practically ignored.

##### King's County.

BIRR; *Birr, W.*—There have been 8 cases of scarlatina; no deaths.

BIRR; *Frankford*.—The severe winter weather has brought in coughs and colds of slight character, otherwise the district is in a healthy condition.

BIRR; *Killyon*.—Six deaths, all over 64.

BIRR; *Kinnitty*.—During the summer and autumn there has been an epidemic of scarlatina of a mild type—no deaths. Schools closed and usual precautions taken, such as isolation in fever hospital and disinfection of houses.

MOUNTMELICK; *Clonygowan No. 2*.—The health of the district is good and sanitation fair.

ROSCREA; *Shinrone*.—District healthy. Sanitary arrangements fairly good. Two cases of scarlet fever noted during quarter.

TULLAMORE; *Clara*.—Sanitary arrangements fairly good.

TULLAMORE; *Phillipstown*.—District healthy.

TULLAMORE; *Tullamore, W.*—District clear of epidemics during quarter. Deaths from tuberculosis still high.

### Longford County.

BALLYMAHON; *Abbeyshrule*.—Whooping-cough still prevalent.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory. An epidemic of pertussis of a severe type has been prevalent during the quarter.

GRANARD; *Ballinalee*.—Sanitary condition of the district is fairly good. There was an outbreak of scarlet fever in two families; they were removed to hospital, and are convalescent now. There was one death from it not yet registered.

GRANARD; *Granard, W.*—The district is in good sanitary condition and free from contagious disease.

GRANARD; *Scrabby No. 2*.—Health of the district good. One patient—a young girl of 22 years—has been sent to Newcastle sanatorium; she has been ailing from pulmonary tuberculosis for some months.

LONGFORD; *Killashee*.—Health of the district very good.

### Louth County.

ARDEE; *Castlebellingham*.—District healthy.

ARDEE; *Collon No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DUNDALK; *Barronstown*.—District healthy.

### Meath County.

ARDEE; *Collon No. 2*.—District in very healthy condition.

ARDEE; *Drumcondra*.—District in a very healthy condition.

DROGHEDA; *St. Mary's*.—The sanitary state of the district is good.

DUNSHAUGHLIN; *Ratoath, W.*—Sanitary arrangements good.

EDENDERRY; *Ballyboggan*.—District remarkably healthy.

KELLS; *Moynalty*.—The district in general has been healthy and free from zymotic disease.

KELLS; *Nobber*.—An epidemic of mild measles (German) was experienced in the latter part of September and the earlier part of October. There has been no fatality therefrom. The health of the district otherwise is most satisfactory. Six of the nine deaths registered range from 72 to 97 years, averaging 79.1 years.

NAVAN; *Painestown*.—Sanitary condition of the district is very good. The district has been singularly free from sickness of all kinds during the quarter, but whooping-cough has appeared in one family within the last fortnight.

OLDCASTLE; *Oldcastle, W.*—District continues healthy.

TRIM; *Summerhill*.—There has been an epidemic of influenza during quarter; otherwise district is healthy.

TRIM; *Trim, W.*—The district is free from infectious disease.

### Queen's County.

ABBEYLEIX; *Durrow*.—District very healthy. Sanitation good.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements of district are satisfactory.

MOUNTMELICK; *Clonygowan No. 1*.—The health of this district is good. Sanitation good.

MOUNTMELICK; *Maryborough*.—The method of disposal of sewage is very unsatisfactory in this town.

MOUNTMELICK; *Mountmellick, W.*—Sanitary arrangements in a satisfactory condition.

MOUNTMELICK; *Mountrath*.—The district is very healthy. Birth-rate for quarter exceptionally low.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

### Westmeath County.

BALLYMAHON; *Ballymore*.—Epidemic of pertussis in district.

DELVIN; *Clonmellon*.—Public health satisfactory.

MULLINGAR; *Castletown Geoghegan*.—The district is healthy.

MULLINGAR; *Killucan*.—There have been limited outbreaks of chicken-pox and mumps during the quarter.

MULLINGAR; *Milltown*.—Infantile mortality was exceptionally high during the quarter, almost half the infants were lost at, or soon after, birth, and convulsions, immaturity, exhaustion, and suffocation from birth were the certified causes of the deaths. Chest affections—especially in old people—were numerous, and the mortality high. There were no deaths from tuberculosis or cancer. Emigration shows an improvement on the corresponding quarter of 1914, and a decided improvement in comparison with the September quarter, 1915.

MULLINGAR; *Mullingar, W.*—Health of district good.

TULLAMORE; *Kilbeggan*.—General health of district good; the five deaths were of old persons whose average age was 80 years. No zymotic diseases during quarter.

### Wexford County.

ENNISCORTHY; *Killann*.—Health of district very good.

GOREY; *Camolin*.—Influenza very prevalent. Marked tubercular predisposition noticeable amongst the people. District boggy and damp, with a consequent prevalence of chest troubles. Some cases have occurred amongst persons from the district working in Arklow, which suggest gas poisoning. Sanitation reasonably good.

GOREY; *Killenagh and Wells*.—District healthy.

NEW ROSS; *Fethard No. 1*.—The district continues in a satisfactory sanitary condition.

NEW ROSS; *Fethard No. 2*.—District healthy.

WEXFORD; *Bannow*.—The sanitary condition continues satisfactory.

### Wicklow County.

BALTINGLASS; *Dunlavin*.—A healthy quarter.

BALTINGLASS; *Kiltegan*.—Deaths are few, and of very old people.

NAAS; *Blessington*.—The health of the district continues good.

RATHDOWN; *Delgany*.—Health of the district good.

RATHDOWN; *Powerscourt*.—District healthy during quarter; two cases of scarlatina.

RATHDRUM; *Annamoe*.—District healthy during quarter.

## II. PROVINCE OF MUNSTER.

### Clare County.

BALLYVAGHAN; *Ballyvaghan, W*.—Health of district fairly good. Sanitary arrangements satisfactory.

CORROFIN; *Corrofin, W*.—Health of district good.

ENNIS; *Crusheen*.—Health of district good. The ages of four persons whose deaths were registered are 73, 90, 95 and 89 years. Two cases of diphtheria occurred during the quarter; both recovered in hospital.

ENNIS; *Killaniv*.—One case of typhoid fever occurred within the quarter; recovered; infection from external source probable. Health of district and sanitation good.

ENNIS; *Newmarket*.—Scarlatina has been prevalent in the district during the quarter, but of a very mild type, otherwise the health of the district is satisfactory.

ENNISTIMON; *Miltownmalbay*.—Sanitary arrangements are fairly good in the district.

KILLADYSERT; *Ballynacally, W*.—The health of the district is good.

KILLADYSERT; *Labasheeda*.—The health of this district is good.

KILRUSH; *Carrigaholt*.—The health of district continues very good. Nine deaths were registered during quarter, one a child of four months, and the average age of the remaining eight was 87½ years. One woman was registered at 115 years.

KILRUSH; *Kilkee*.—The sanitary state of district good.

LIMERICK; *Coolacasey*.—General condition healthy.

SCARRIFF; *Kilkishen*.—There were several cases of scarlet fever during the quarter.

SCARRIFF; *Mountshannon, W*.—District continues healthy. One death registered of a man at the age of 102 years, one at 93, one at 86, one at 84, and one at 81.

SCARRIFF; *Quin*.—General health of district good.

### Cork County and County Borough.

BANDON; *Innishannon*.—There were three cases of scarlatina, otherwise the district was healthy.

BANDON; *Kilbrittain*.—Two cases of scarlatina during the quarter, otherwise district very healthy.

BANDON; *Templemartin*.—Sanitation good.

BANTRY; *Bantry, W*.—The sanitary condition of district good.

BANTRY; *Kealkill*.—District healthy.

CASTLETOWN; *Kilcatherine*.—District healthy.

CORK; *Blarney*.—Colds evidently of an influenzal character prevalent during last month of quarter; district otherwise healthy.

CORK; *Carrigaline No. 1*.—A few mild cases of influenza during quarter; district otherwise healthy.

CORK; *Carrigaline No. 2*.—Scarlet fever prevalent; otherwise district healthy.

CORK; *Carrignavar*.—District very healthy.

CORK; *Queenstown No. 2*.—District healthy.

DUNMANWAY; *Ballineen*.—Eleven cases of diphtheria occurred during the quarter. The district was otherwise healthy.

DUNMANWAY; *Coolmountain*.—Of the 14 deaths, 10 were registered as being over 65 years. Two were due to pulmonary tuberculosis and 2 due to cancer. There was no epidemic of any sort, and the health of the district is extremely satisfactory.

DUNMANWAY; *Dunmanway, W*.—The sanitary condition of the district is fairly satisfactory. There was one death registered as being due to pulmonary tuberculosis. The two attributed to diphtheria occurred in the Workhouse hospital, where the patients were removed from a neighbouring dispensary district.

FERMOY; *Rathcormack*.—The health of district was very good during the quarter, being free from zymotic disease.

KANTURK; *Kanturk, W*.—Whooping-cough very prevalent in the district at present.

KANTURK; *Milford*.—Whooping-cough very prevalent during quarter. There were 3 cases of scarlatina during the past week.

KILMALLOCK; *Charleville*.—The district is very healthy. The epidemic of whooping-cough has passed.

KINSALE; *Ballyfeard*.—An outbreak of scarlatina occurred in October in Nohoval district; most of the cases occurred amongst children attending one School. All the cases that came under my notice were of a mild type. The disease disappeared after closure of schools.

KINSALE; *Courceys*.—District healthy.

KINSALE; *Kinsale, W*.—Scarlatina has been in town and neighbourhood for the past two years; it is now disappearing.

MALLOW; *Ballyclogh*.—District healthy.

MALLOW; *Rahan*.—Diphtheria occurred in one family in southern side of district—6 cases occurred, no death. Scarlatina occurred in one family in north side of district—three cases, one death. One case of enteric fever which ended in death.

MIDDLETON; *Aghada*.—Diphtheria appeared in different parts of the district. Total number of cases eight; one death.

MIDDLETON; *Cloyne*.—There were some sporadic cases of diphtheria in the district during the quarter. The people habitually store manure in heaps far too close up to their dwellings.

SKIBBEREEN; *Dromdaleague*.—Measles prevalent during the past quarter.

SKULL; *Goleen*.—Whooping-cough is prevalent in the eastern end of the district. One death registered of a woman aged 105 years.

SKULL; *Skull, W.*—Health of the district remains very good.

### Kerry County.

CAHERSIVEEN; *Caher, W.*—The sanitary condition of district is good.

CAHERSIVEEN; *Emlagh*.—District free from all forms of infectious diseases. Great improvement in sanitation.

CAHERSIVEEN; *Glanbehy*.—The sanitary condition of district good.

CAHERSIVEEN; *Valencia*.—Sanitary state of district good.

DINGLE; *Anascaul*.—District healthy at present.

DINGLE; *Castlegregory*.—District healthy.

DINGLE; *Dingle, W.*—District healthy.

KENMARE; *Kenmare, W.*—District healthy.

KENMARE; *Tuosist*.—The sanitary condition of the district is good. There were six times more births registered than deaths. Three of the four deaths were uncertified.

KILLARNEY; *Killarney No. 1, W.*—District very healthy during quarter. No zymotic disease, and very little disease of any kind.

KILLARNEY; *Molahiffe*.—The sanitary condition of the district is satisfactory.

LISTOWEL; *Ballyhorgan*.—There were five cases of enteric fever; otherwise the district has been in a healthy condition.

LISTOWEL; *Listowel, W.*—Several cases of bad enteric fever have occurred in urban and surrounding rural district.

LISTOWEL; *Tarbert*.—District healthy.

TRALEE; *Castlemaine*.—District healthy.

TRALEE; *Kilgobban*.—District healthy.

### Limerick County and County Borough.

CROOM; *Castletown*.—General health and sanitary condition good.

KILMALLOCK; *Bruff*.—The district is healthy. The sanitary arrangements could be better.

KILMALLOCK; *Bruree*.—A mild epidemic of whooping-cough, from which there was one death, a baby girl two months old.

KILMALLOCK; *Hospital*.—Measles and pertussis prevalent; no death from those diseases.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—Several cases of whooping-cough, generally of a mild type. Two cases of scarlatina, which were sent to hospital.

LIMERICK; *Annacotty*.—Sanitary arrangements good; district healthy.

LIMERICK; *Caherconlish*.—Three cases registered from phthisis; death rate very low, only eight deaths—one of those was 93 years. Birth rate also rather low, only nineteen. One case of scarlatina, doing well. Health of district good, except children getting occasional colds.

LIMERICK; *Clarina*.—District healthy; one death from pulmonary tuberculosis.

LIMERICK; *Moroe*.—Sanitary condition generally good. Birth-rate very high; death-rate normal. Two deaths from tuberculous disease.

LISTOWEL; *Glin*.—There were three deaths from pulmonary tuberculosis and two from cancer in my district during the quarter just ended. The sanitary arrangements of the district are satisfactory.

MITCHELSTOWN; *Galbally*.—District exceptionally healthy.

NEWCASTLE; *Ardagh*.—Notwithstanding the severity of the winter, the district has been singularly free from serious disease. The prevalence of catarrhal influenza, just an odd case here and there throughout the district, is the only disease worthy of note.

NEWCASTLE; *Feenagh*.—Measles has been prevalent in the district during the quarter.

RATHKEALE; *Askeaton*.—During the last quarter this district was entirely free from contagious or infectious disease; the deaths were principally amongst the aged. There was one case of chronic diarrhoea in a man aged 62.

RATHKEALE; *Pallaskenry*.—Sanitary condition of district is good.

RATHKEALE; *Rathkeale No. 1, W.*—Four deaths from tuberculosis, one diphtheria, one measles. Health of district satisfactory.

RATHKEALE; *Rathkeale No. 2*.—There were a few cases of measles in the month of November, otherwise my district was in a very healthy condition, during quarter.

TIPPERARY; *Grean*.—District healthy.

### Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—District free from any infectious disease.

BORRISOKANE; *CloghJordan*.—Scarlatina was prevalent during the quarter. The sanitary condition of the district fair.

BORRISOKANE; *Terryglass*.—District very healthy generally.

NENAGH; *Nenagh, W.*—Whooping-cough prevalent during last month, though not of a very severe type.

NENAGH; *Newport*.—No epidemic of any infectious disease. District in a healthy state.

NENAGH; *Portroe*.—The sanitary condition of the district is perfect, no infectious diseases have occurred.

NENAGH; *Silvermines*.—District healthy; no infectious disease during quarter.

THURLES; *Moyne*.—District healthy.

THURLES; *Thurles, W.*—Mumps and measles prevalent during quarter.

**Tipperary County, South Riding.**

CALLAN; *Ballingarry*.—Measles was prevalent during the second and third months of the quarter.

CALLAN; *Mullinahone*.—Sanitary state of district fairly good, no diseases prevalent, except influenza.

CASHEL; *Kilpatrick*.—District free from zymotic disease.

CLOGHEEN; *Caher*.—No case of an epidemic character occurred during the past quarter. The sanitary state of district is satisfactory.

CLONMEL; *Kilsheelan, No. 1*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—There were fourteen cases of typhus in district during first months of quarter, I had all removed to hospital and by quick sanitary measures, the disease was stamped out. There were four deaths; the district at present is healthy.

**Waterford County and County Borough.**

CLONMEL; *Ballymacarbry*.—Sanitary condition good. Epidemic of mumps, which has passed away.

CLONMEL; *Kilsheelan No. 2*.—District healthy.

DUNGARVAN; *Dungarvan, W*.—One death registered from cerebro-spinal meningitis during the quarter.

KILMACKTHOMAS; *Bunnahon*.—Four of the deaths registered were those of shipwrecked seamen whose bodies were washed ashore. The tuberculosis death was one of "miner's phthisis," contracted in South Africa, district otherwise healthy.

LISMORE; *Cappoquin*.—Eleven cases of scarlet fever of a mild type during the quarter.

WATERFORD; *Kilmeadan*.—During the past quarter the health of the district has been very good. No epidemics. Sanitary conditions good.

WATERFORD; *Waterford Urban No. 1, W*.—The district has been practically free from infectious disease fatality, excepting tuberculosis. The deaths enumerated include one from scarlatina which took place in 1914, and the second from diphtheria took place in the local fever hospital, having been brought there from another district.

YOUGHAL; *Ardmore*.—A few cases of mumps.

**III. PROVINCE OF ULSTER.****Antrim County.**

ANTRIM; *Antrim, W*.—A few cases of very mild scarlet fever.

ANTRIM; *Crumlin*.—There were two cases of diphtheria, and one of scarlet fever, all very mild, general mortality lower than previous years.

ANTRIM; *Doagh*.—At present, and for some time past, the district has been entirely free from infectious disease.

ANTRIM; *Randalstown*.—Epidemic of German measles during the quarter.

ANTRIM; *Templepatrick*.—Sanitary arrangements of district good. No epidemic.

BALLYCASTLE; *Ballycastle, W*.—District healthy during quarter.

BALLYCASTLE; *Cushendall*.—Sanitary arrangements very good. No infectious or contagious diseases. Health of district excellent.

BALLYMENA; *Ahoghill*.—District free from epidemic disease.

BALLYMENA; *Ballymena, W*.—Whooping-cough has been prevalent, causing ten deaths.

BALLYMENA; *Broughshane*.—Measles, mumps, and whooping-cough prevalent during quarter.

BALLYMENA; *Clogh*.—District very healthy. Sanitary arrangements good.

BALLYMENA; *Galgorm*.—Death-rate very low, chiefly amongst the aged.

BALLYMENA; *Glenwhirry*.—Health of district good.

BALLYMENA; *Portglenone*.—Health of district good. No epidemic disease.

BALLYMENA; *Toome*.—Health of district good.

BALLYMONEY; *Bushmills*.—The birth-rate was never so low before as this quarter, so many married men have joined the army. There were six abortions during the last few months.

BALLYMONEY; *Dirraw*.—The health of district satisfactory; a few cases of scarlatina during past quarter, but so far confined to three families. I have had no cases of diphtheria since 10th October, 1915.

BELFAST; *Belfast Rural No. 4*.—District healthy generally.

LARNE; *Waterfoot*.—Sanitary arrangements very good. No infectious or contagious disease. Health of district excellent.

LISBURN; *Glenavy*.—Health of district has been fairly good during the quarter. One case of scarlatina. Only 7 births registered compared with 16 in corresponding quarter last year.

LURGAN; *Aghalee*.—Pertussis prevalent.

**Armagh County.**

ARMAGH; *Blackwatertown*.—There was one death certified of tuberculous lung disease at the age of 67 years.

ARMAGH; *Markethill*.—District has been very healthy during past quarter.

ARMAGH; *Rich Hill*.—The district is in a healthy condition.

ARMAGH; *Tynan*.—Health of district very satisfactory during the past quarter.

BANBRIDGE; *Tanderagee*.—Scarlatina and diphtheria occurred.

CASTLEBLAYNEY; *Newtownhamilton No. 1*.—Extensive outbreak of measles prevails.

LURGAN; *Lurgan No. 1, W.*—The district has been quite free from zymotic disease during the quarter.

LURGAN; *Lurgan No. 2.*—District free from infectious disease and in good healthy condition.

NEWRY; *Mullaghglass.*—Except for some cases of influenza, the district on the whole has been healthy, considering the severity of the weather.

### Belfast County Borough.

BELFAST; *Belfast Urban No. 2.*—One death from cerebro-spinal meningitis during quarter.

BELFAST; *Belfast Urban No. 11.*—Health of district has been very good, but during the last half of present quarter, lung affections have been very prevalent amongst young children and elderly persons. There have been some cases of diphtheria and scarlatina.

### Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in a very healthy state, and free from any infectious disease.

CAVAN; *Belturbet.*—District in very healthy state and free from infectious disease.

CAVAN; *Killashandra.*—District healthy.

CAVAN; *Kilnaleck.*—There was one case of scarlatina during quarter.

COOTEHILL; *Drum No. 2.*—Three cases of diphtheria occurred during quarter—all inmates of same house. No other cases reported.

COOTEHILL; *Tullyvin.*—District healthy.

ENNISKILLEN; *Dowra.*—District healthy.

ENNISKILLEN; *Holywell No. 2.*—District healthy.

GRANARD; *Scrabby No. 1.*—Health of district good. One death from pulmonary tuberculosis of several years standing is recorded. Deceased was a young man of 27 years.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

OLDCASTLE; *Virginia.*—District healthy.

### Donegal County.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely.*—District healthy and free from zymotic disease at present. One case of scarlatina occurred during November. No spread of disease.

DONEGAL; *Laghy.*—District healthy.

DONEGAL; *Mountcharles.*—District healthy.

DONEGAL; *Pettigo.*—District healthy during quarter; one death from cancer.

DUNFANAGHY; *Crossroads.*—Ten of the deaths registered during quarter were between the ages of 70 and 95 years.

DUNFANAGHY; *Dunfanaghy, W.*—There has been an epidemic of scarlet fever during quarter—still continuing; five deaths, including four adults, two of the latter not yet registered.

GLENTIES; *Ardara.*—District healthy.

GLENTIES; *Carrick.*—District healthy.

GLENTIES; *Doocharry.*—District healthy.

GLENTIES; *Dunglow No. 1.*—The origin of two cases of diphtheria (brother and sister) could not be traced; there were no other cases. There was an epidemic of mumps, without any ill result.

GLENTIES; *Glenties, W.*—A few cases of scarlatina during quarter of a very mild variety.

INISHOWEN; *Buncrana.*—One death registered at 104 years.

INISHOWEN; *Clonmany.*—Whooping-cough prevalent in district, from which 2 deaths were registered during the quarter. In other respects district healthy.

INISHOWEN; *Malin.*—District healthy.

LETTERKENNY; *Church Hill.*—District healthy, one case of diphtheria contracted in another district.

LETTERKENNY; *Letterkenny, W.*—Three very bad cases of typhus occurred in one house. Two cases of typhoid—all recovered.

LETTERKENNY; *Manorcunningham.*—The sanitary state of the district is fairly good.

MILLFORD; *Fanad.*—Epidemic of whooping-cough during past quarter.

MILLFORD; *Rathmullan.*—Some mild cases of scarlatina occurred during quarter.

MILLFORD; *Rosguill.*—Two cases of scarlet fever occurred in district during the quarter; no other infectious disease except influenzal sore throats, which have been rather common.

STRABANE; *Raphoe.*—Measles and whooping-cough prevalent; sporadic cases of scarlatina. Sanitation continues good.

STRANORLAR; *Cloghan.*—District healthy, except for two cases of scarlatina. Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon.*—Nine cases of scarlatina and four cases of diphtheria, of a very mild type, occurred during the quarter; cases did well. Ten of the eleven deaths reported were over 65 years of age.

### Down County.

BANBRIDGE; *Banbridge, W.*—A very healthy quarter.

BANBRIDGE; *Dromore.*—The sanitary condition of the district fairly good.

BELFAST; *Castlereagh No. 2.*—Measles continued prevalent during October and November. Scarlatina also prevalent.

DOWNPATRICK; *Ballynahinch.*—There have been three cases of mild scarlet fever in the district during quarter.

DOWNPATRICK; *Killyleagh*.—Public health in this district has been good. There were a few cases of measles, and one death has been certified as caused by the disease. The death-rate is low. Of the 25 deaths registered, 14 were of persons sixty-five years and upwards, and five below one year.

DOWNPATRICK; *Portaferry*.—Pertussis very prevalent; two deaths registered as due to it. Influenza prevalent. District otherwise healthy.

KILKEEL; *Rosstrevor*.—Sanitary arrangements of district quite satisfactory. No epidemic of infectious disease. Cold winter hard on old people—eight of the eleven deaths this quarter ranging between the ages of 57 and 90 years.

LISBURN; *Annahilt*.—Sanitary arrangements in district are good. There is no infectious disease.

LISBURN; *Ballylesson*.—The district free from any of the acute infectious fevers.

LISBURN; *Drumbeg*.—Births below average; deaths above average. Total number of deaths registered during quarter exceed total number of births registered.

LISBURN; *Saintfield*.—Several cases of scarlet fever occurred during quarter with one fatality. District otherwise healthy.

LURGAN; *Moir*.—A low birth-rate, but much lower death-rate. One-half of the deaths are uncertified.

LURGAN; *Waringstown*.—During the quarter there were 36 cases of scarlet fever, one of diphtheria, and one of erysipelas in the district. Of the scarlet fever cases, 27 were removed to hospital, and the houses and clothing disinfected. The epidemic is now abating, as only four cases were reported in the month of December. The attack was principally in the Waringstown electoral division, but there were few cases in the Donaghadee division. Three schools were temporarily closed owing to the epidemic; so far no deaths have arisen from the attack.

NEWRY; *Donaghmore*.—Sanitation generally good. Health of district fair during three months; small number of deaths.

NEWRY; *Rathfriland*.—Sanitary condition of the district is good.

NEWTOWNARDS; *Bangor*.—Public health good, also sanitary arrangements.

NEWTOWNARDS; *Comber*.—Whooping-cough very prevalent, but no other epidemic; otherwise district is very healthy.

NEWTOWNARDS; *Kilmood*.—Health of district has been very good during the quarter.

NEWTOWNARDS; *Newtownards, W.*—The health of my district continues to be particularly good.

### Fermanagh County.

ENNISKILLEN; *Enniskillen, W.*—The sanitary arrangements in the town of Enniskillen and district are fairly good. There has not been much sickness in the district during the quarter.

ENNISKILLEN; *Florencecourt*.—No contagious disease prevalent during quarter. Sanitary arrangements fairly satisfactory. One death registered as due to cancer.

ENNISKILLEN; *Holywell No. 1*.—District as a whole is healthy. Three cases of typhoid fever occurred in one family. The disease was imported from an adjoining district.

ENNISKILLEN; *Tempo*.—Health of district is excellent, save for a few cases of chicken-pox, which is fast disappearing.

IRVINESTOWN; *Clonelly*.—Health of district good. No epidemic disease.

IRVINESTOWN; *Irvinestown, W.*—Two deaths registered from tuberculosis, both occurred in Rosslare Sanatorium, Rosslare. A few mild cases of scarlet fever. One case of German measles reported. I had two cases of enteric fever, first case in Trillick dispensary district removed to Irvinestown; second case, a servant in same house in Irvinestown.

LISNASKEA; *Derrylin*.—Several cases of scarlatina during quarter, no effectual means of checking such epidemic.

LISNASKEA; *Lisnaskea, W.*—Five cases of small-pox in district during latter part of quarter. They have been removed to Fever Hospital, and there is no further spread of the disease. Source of disease is not ascertained.

### Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—The health of the district and the sanitary arrangements are satisfactory.

COLERAINE; *Garvagh*.—Health of district good; no epidemic.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—District healthy.

LIMAVADY; *Ballykelly*.—A few cases of scarlatina in district.

LIMAVADY; *Bellarena*.—District healthy. Three cases of scarlatina occurred in the Aghanloe division of the district, imported from the urban area of Limavady. No deaths.

LIMAVADY; *Dungiven*.—The district has been in a very healthy condition.

LIMAVADY; *Limavady W.*—Still a few cases of scarlatina.

LONDONDERRY; *Eglinton*.—Whooping-cough very prevalent during quarter.

MAGHERAFELT; *Moneymore*.—Many cases of influenza and bronchitis in district at present. Owing to severity of season, death-rate exceeds birth-rate. There were two outbreaks of scarlatina during quarter, having no connection with each other—kept isolated—no further extension of the disease.

### Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Whooping-cough prevalent during quarter, but no deaths recorded. District in fair sanitary condition.

CARRICKMACROSS; *Donaghmoyne*.—Typhoid fever has appeared in one family.

CASTLEBLAYNEY; *Castleblayney, W.*—Three cases of scarlatina occurred in one family in the rural district, and were removed for treatment to the fever hospital. One of them had recently returned from her residence in Belfast. Six deaths were registered at ages varying from 70 to 80 years; four from 80 to 87; and one at 96 years.

CLONES; *Clones, W.*—Scarlatina and diphtheria have been prevalent both in the urban and rural districts.

COOTEHILL; *Dawsonsgrove.*—Sanitary condition of district fairly good.

MONAGHAN; *Emyvale.*—Health of district fairly good. One case of diphtheria during quarter.

MONAGHAN; *Kilmore.*—Three cases of diphtheria with one death. Many cases of influenza of gastro-enteric type.

#### Tyrone County.

CASTLEDERG; *Castlederg, W.*—Scarlatina still very prevalent in the district, very mild type, only two deaths from complications. Sanitary state of district otherwise very healthy.

CASTLEDERG; *Drumquin.*—The sanitary conditions are fairly satisfactory; a good number of cases of scarlatina in district during quarter, but is now abated; there have been no new cases within the past three weeks.

CASTLEDERG; *Killeter.*—Deaths are nearly all of old people; no death from infectious disease.

CLOGHER; *Clogher, W.*—The condition of the district is good, and at the present time there is very little sickness.

CLOGHER; *Fivemiletown.*—The health of the district was good during the quarter.

COOKSTOWN; *Coagh.*—Health of district good. No zymotic disease.

COOKSTOWN; *Pomeroy.*—Three cases of scarlet fever; otherwise district healthy.

DUNGANNON; *Benburb.*—Health and sanitary condition of district good.

DUNGANNON; *Clonavaddy.*—One case of typhoid fever during quarter. No other infectious disease. Sanitary arrangements good.

DUNGANNON; *Coal Island.*—One case of enteric fever occurred during the quarter, and was removed to hospital.

OMAGH; *Dromore.*—The district was in a healthy condition during the quarter. The sanitary condition of the district is good.

OMAGH; *Drumquin.*—Diphtheria, enteric fever and scarlet fever were prevalent during quarter. Sanitary condition of district fair.

OMAGH; *Fintona.*—There were three cases of scarlatina reported during quarter, but it does not seem to have spread beyond these cases. Health of district fairly good.

OMAGH; *Omagh No. 2.*—District in good sanitary condition. No epidemic of any kind.

OMAGH; *Sixmilecross.*—Sanitary arrangements in the district are fairly good. In one case which I reported nothing has been done to remove the obstruction. Two cases of typhoid fever occurred during the quarter, otherwise district satisfactory.

STRABANE; *Dunnamanagh.*—There were a great many cases of whooping-cough and measles in this district during quarter.

#### IV. PROVINCE OF CONNAUGHT.

##### Galway County.

CLIFDEN; *Inishbofin.*—The district is healthy and in good sanitary condition.

GALWAY; *Galway No. 3 (Arran).*—Health of district good.

GALWAY; *Moycullen.*—The health of the district continues good.

GALWAY; *Oranmore.*—District healthy.

GALWAY; *Spiddle.*—Four cases of typhus fever occurred during the month of December.

LOUGHREA; *Bullaun.*—Six of the fourteen deaths registered were those of persons aged 73, 77, 80, 81, 84 and 87 years.

OUGHTERARD; *Cloonbur, No. 1.*—Health of district good; no zymotic disease.

OUGHTERARD; *Lettermore.*—Health of district continues good.

OUGHTERARD; *Oughterard, W.*—Health of district good. One case of scarlatinal fever. Three deaths from violence, probably drowning, no inquest held in any of the three instances.

PORTUMNA; *Portumna No. 1, W.*—Sanitary condition of district good.

PORTUMNA; *Portumna No. 2.*—The two cases of tuberculosis (pulmonary), were those of a mother and her ten years' old child.

TUAM; *Abbey.*—The sanitary arrangements in my district are fairly good.

TUAM; *Tuam No. 1, W.*—Health of district good during the quarter.

##### Leitrim County.

BALLYSHANNON; *Kinlough.*—Scarlatina epidemic in district.

BAWNBOY; *Ballinamore.*—The sanitary condition of district good. No epidemics prevailing.

CARRICK-ON-SHANNON; *Drumshanbo.*—District healthy and in good sanitary condition.

CARRICK-ON-SHANNON; *Jamestown, W.*—District healthy.

MANORHAMILTON; *Dromahaire.*—Whooping-cough has been very prevalent during the quarter.

MOHILL; *Carrigallen.*—The health and sanitary condition of the district have been good during the quarter.

MOHILL; *Mohill W.*—Sanitary condition of the district good.

MOHILL; *Rinn.*—The health of the district is good. Sanitary arrangements are working well.

**Mayo County.**

BALLINA; *Ballina, W.*—Health of the district good. No epidemic during the quarter. A death at 102 years registered.

BALLINA; *Crossmolina.*—Measles and whooping-cough prevalent. No case of any other infectious disease during the quarter.

BALLINROBE; *Ballinrobe, W.*—The health of the district is good.

BALLINROBE; *Cappaghduff.*—Some of the villages are in a deplorable condition, the people keeping cattle, swine, and poultry in their houses. There is also usually a manure heap in close proximity to their dwellings.

BALLINROBE; *Cong.*—Health of district good.

BALLINROBE; *Hollymount.*—Births much under the average. Deaths about the average. The general health of the people of this district continued good during the quarter.

BELMULLET; *Binghamstown, W.*—Health of the district in good condition.

BELMULLET; *Knocknalower.*—The epidemic of scarlatina so prevalent last quarter has not yet quite cleared off. The district is otherwise healthy.

CASTLEBAR; *Balla.*—District healthy.

CASTLEBAR; *Castlebar No. 1, W.*—Seven sporadic cases of diphtheria developed, four in rural area, and three in urban district. Three cases in the rural district, which were too advanced for removal to hospital, proved fatal.

CASTLEBAR; *Castlebar No. 2.*—The sanitation of the district is, on the whole, satisfactory from the judgment I can form since being appointed to this district as Medical Officer. The district is free from any infectious diseases; there are sporadic cases of senile cancer and pulmonary phthisis now and again presents itself, but in a form or stage amenable to favourable treatment.

CLAREMORRIS; *Ballyhaunis.*—Health of the district fairly good. No zymotic diseases or cancer. Of the 39 deaths, 26 had reached the age of 65 years and upwards. The general sanitary condition is much improved. The number of deaths of aged persons from respiratory diseases was rather high.

KILLALA; *Killala, W.*—During the quarter the health of the district was good. There was no infectious disease prevalent with the exception of a few cases of measles and whooping-cough. The sanitary arrangements are fairly satisfactory.

SWINEFORD; *Foxford.*—A few cases of diphtheria occurred during the quarter.

SWINEFORD; *Swineford, W.*—The district has been in a satisfactory condition during the past quarter. There have been two outbreaks of enteric fever, which have been kept under control by disinfection and isolation.

WESTPORT; *Ballycroy.*—Influenza very prevalent towards end of quarter (pulmonary type).

WESTPORT; *Islandeady.*—The sanitation of the district is good.

WESTPORT; *Louisburgh.*—The sanitary state of the district is satisfactory. General health good.

WESTPORT; *Newport.*—District in a healthy condition.

WESTPORT; *Westport, W.*—District healthy. One death in urban district registered at 105 years, and one in rural district at 101 years.

**Roscommon County.**

ATHLONE; *Kiltoom.*—Sanitary condition of district average. Health of district pretty good.

BALLINASLOE; *Creagh.*—The general health of the district has been good during the quarter.

BOYLE; *Boyle No. 1, W.*—There was no epidemic of infectious disease. Bronchitis was prevalent.

BOYLE; *Keadew.*—Scarlet fever and diphtheria prevalent during the quarter.

CARRICK-ON-SHANNON; *Aughrim.*—The sanitary condition of the district is good. Five deaths out of a total of eighteen were certified as due to tuberculous disease.

CASTLEREAGH; *Ballaghaderreen.*—The sanitary arrangements of the district are fairly good, and the general health of the district is good.

CASTLEREAGH; *Loughglinn.*—The district has been particularly healthy during the past quarter, a marked decrease in tuberculous forms of disease. There were three deaths of persons aged 80 years and upwards.

STROKESTOWN; *Roosky.*—Nearly all the deaths registered were those of persons varying in age from 68 to 103 years. One death from cancer, uncertified. The health of the district is good.

STROKESTOWN; *Strokestown, W.*—The greater number of deaths registered during the quarter was of persons aged 70 years and upwards.

**Sligo County.**

BOYLE; *Gurteen.*—District healthy.

DROMORE WEST; *Easky, W.*—Health of district good. No infectious disease during quarter.

DROMORE WEST; *Skreen.*—Health and sanitation of district are good.

SLIGO; *Carney No. 1.*—Sanitary condition of district good.

SLIGO; *Carney No. 2.*—The district is in a healthy condition.

SLIGO; *Riverstown.*—District now healthy. An outbreak of scarlatina has been stamped out.

TOBERCERRY; *Coolaney.*—Sanitation of district satisfactory.
